

Ch. Hemleben M. Spindler O.R. Anderson

# Modern Planktonic Foraminifera

With 109 Figures

Springer-Verlag  
New York Berlin Heidelberg  
London Paris Tokyo

# Table of Contents

Preface .....	v
Table of Contents .....	ix
1. Introduction .....	1
2. Taxonomy and Species Features .....	8
2.1 Introduction .....	8
2.2 Species List .....	10
2.2.1 Spinose Planktonic Foraminifera .....	10
2.2.2 Non-spinose Planktonic Foraminifera .....	20
3. Collecting and Culture Methods .....	33
3.1 Introduction .....	33
3.2 Collection for Ecological Studies .....	34
3.3 Fixation and Storing of Samples .....	34
3.4 Laboratory Preparations .....	35
3.5 Collection for Physiological and Ecological Studies .....	35
3.5.1 Net Collection .....	36
3.5.2 SCUBA Collection .....	37
3.6 Isolation and Preparation for Maintenance Culture .....	39
3.7 Maintenance Cultures .....	42
3.8 Monitoring Vitality and Growth of the Cultures .....	45
3.9 Feeding Techniques .....	49
3.9.1 Algal Prey .....	49
3.9.2 Animal Prey .....	51
3.10 Cataloguing and Storing Shells .....	54
3.11 Summary .....	55

4.	Cellular Ultrastructure .....	56
4.1	Introduction .....	56
4.2	Fixation of Planktonic Foraminifera for Fine Structure Analysis .....	58
4.3	Cytoplasmic Streaming .....	60
4.4	Peripheral Cytoplasm and Rhizopodial Morphology .....	61
4.4.1	Cytoskeletal Structures .....	64
4.4.2	Filaments .....	65
4.5	Fine Structure of Cytoplasmic Organelles .....	66
4.5.1	Nucleus .....	66
4.5.2	Mitochondria .....	69
4.5.3	Peroxisomes .....	70
4.5.4	Endoplasmic Reticulum, Golgi Complex, and Vacuolar System .....	71
4.5.5	Fibrillar Bodies .....	76
4.5.6	Lipids and Various Cytoplasmic Inclusions .....	78
4.6	Comparative Fine Structure Data of Benthic and Planktonic Species .....	80
4.7	Comparative Fine Structure of Planktonic Foraminifera and Radiolaria .....	83
4.8	Summary .....	84
5.	Host and Symbiont Relationships .....	86
5.1	Introduction .....	86
5.2	Symbiosis, Commensalism and Parasitism .....	87
5.3	Symbiont Morphology and Structural Association with Host ..	93
5.3.1	Dinoflagellate Symbiont Fine Structure .....	96
5.3.2	Chrysophycophyte Symbiont Fine Structure .....	97
5.4	Symbiont and Host Physiological Interactions .....	100
5.5	Origin of Symbionts .....	108
5.6	Major Features of Algal Symbionts .....	109
5.7	Summary .....	111
6.	Trophic Activity and Nutrition .....	112
6.1	Introduction .....	112
6.2	Natural Prey .....	113
6.3	Laboratory Studies of Trophic Activity .....	121

6.3.1	Prey Acceptance and Rate of Digestion .....	121
6.3.2	Cannibalism .....	126
6.3.3	Fine Structure Studies of Prey Capture and Digestion .....	126
6.3.4	Trophic Activity and Longevity .....	127
6.3.5	Laboratory Studies of Omnivorous Feeding .....	132
6.4	Prey Abundance and Foraminiferal Distribution .....	133
6.5	Predators on Planktonic Foraminifera .....	134
6.6	Comparative Data with Benthic Foraminifera and Radiolaria .....	136
6.7	Summary .....	136
7.	Reproduction .....	139
7.1	Introduction .....	139
7.2	Gametogenesis .....	140
7.2.1	Light Microscopic Data .....	142
7.2.2	Fine Structure Data .....	145
7.3	Morphological Changes during Gametogenesis .....	152
7.4	Reproductive Cycles .....	155
7.5	Comparisons with Benthic Foraminifera and Radiolaria ...	160
7.6	Summary .....	163
8.	Shell Ontogeny .....	164
8.1	Introduction .....	164
8.2	Ontogenetic Concept for Spinose Species .....	167
8.2.1	Five Stage Concept .....	167
8.2.2	Ontogeny of <i>Globigerinoides sacculifer</i> .....	170
8.3	Variations in Developmental Morphology of Spinose Species .....	171
8.4	Variations in Developmental Morphology of Non-spinose Species .....	174
8.5	Quantitative Ontogeny .....	177
8.6	Coiling Directions .....	181
8.7	Taxonomic Applications .....	185
8.8	Summary .....	186
9.	Shell Architecture .....	187
9.1	Introduction .....	187
9.2	Chamber Deposition and Pore Formation .....	187

9.2.1	Chamber Formation in Non-spinose Species . . . . .	188
9.2.2	Pore Formation and Wall Thickening . . . . .	194
9.2.3	Keel Development . . . . .	199
9.2.4	Pustule Formation . . . . .	201
9.3	Chamber Formation in Spinose Species . . . . .	203
9.3.1	Spine Types . . . . .	209
9.4	Wall Thickening and Gametogenic Calcification . . . . .	210
9.5	Physiological Mechanism and Rates of Calcification . . . . .	213
9.6	Organic Composition of the Calcitic Wall . . . . .	214
9.7	Resorption and Repair Processes . . . . .	216
9.8	Abnormal Shell Growth . . . . .	218
9.9	Summary . . . . .	218
10.	Ecology . . . . .	220
10.1	Introduction . . . . .	220
10.2	Statistical Treatment and the Transfer Function . . . . .	221
10.3	Stable Isotopes . . . . .	224
10.4	Distributional Pattern of Planktonic Foraminifera . . . . .	226
10.4.1	Horizontal Distribution . . . . .	226
10.4.2	Seasonal Distribution . . . . .	231
10.4.3	Vertical Distribution . . . . .	235
10.4.4	Patchiness and Daily Vertical Migration . . . . .	237
10.4.5	General Sea Surface Temperature in the Past . . . . .	239
10.5	Population Dynamics . . . . .	242
10.5.1	Reproductive Strategies . . . . .	243
10.5.1.1	Lunar Periodicity . . . . .	243
10.5.1.2	Annual Periodicity . . . . .	244
10.5.2	Water Mass Boundary Effects . . . . .	247
10.6	Experimental Studies . . . . .	248
10.7	Summary . . . . .	257
11.	Sedimentation — Settlement of Shells . . . . .	258
11.1	Introduction . . . . .	258
11.2	Shells Released by Reproduction and Juvenile Mortality . . . . .	259
11.3	Aggregates — Sedimentation . . . . .	260
11.4	Predation . . . . .	262
11.5	Residence Time and Sinking Velocity . . . . .	263
11.6	Seasonal Fluctuations in the Settlement . . . . .	265

11.7	Dissolution in the Deep Water .....	266
11.8	Summary .....	273
12.	Concluding Remarks .....	274
12.1	Effects Influencing the Isotopic Signal .....	276
12.1.1	Temperature Effect .....	276
12.1.2	Glacial Effect .....	277
12.1.3	Water Mass Effect .....	277
12.1.4	Vital Effect .....	278
12.1.5	Selective Production .....	279
12.1.6	Differential Dissolution .....	280
12.2	Carbon Isotopes .....	280
12.3	Summative Perspective .....	284
13.	References .....	286
14.	Glossary .....	328
15.	Index .....	337
