

# The Colonization of the Pacific

## A Genetic Trail

---

EDITED BY

ADRIAN V. S. HILL

*Wellcome Senior Research Fellow, Institute of Molecular Medicine,  
John Radcliffe Hospital, University of Oxford*

AND

SUSAN W. SERJEANTSON

*Professor of Human Genetics, John Curtin School of Medical Research,  
Australian National University, Canberra, Australia*

CLARENDON PRESS · OXFORD

1989

# Contents

List of contributors	ix
1. The colonization of the Pacific: some current hypotheses <i>P. S. Bellwood</i>	1
2. Population genetic studies in the Pacific: red cell antigen, serum protein, and enzyme systems <i>R. L. Kirk</i>	60
3. HLA genes and antigens <i>S. W. Serjeantson</i>	120
4. Genetic variants of the serum complement components <i>P. R. Ranford</i>	174
5. Immunoglobulin allotypes <i>D. Propert</i>	194
6. Mitochondrial DNA <i>M. Stoneking and A. C. Wilson</i>	215
7. Haemoglobin and globin gene variants in the Pacific <i>A. V. S. Hill, D. F. O'Shaughnessy, and J. B. Clegg</i>	246
8. The colonization of the Pacific: the genetic evidence <i>S. W. Serjeantson and A. V. S. Hill</i>	286
