1. Approaches to environmental change 1

Models of environmental change 4

The modernization paradigm 8

The declinist paradigm 10

The inclinist paradigm 14

Paradoxes of environmental change 16

2. Tree castles and population bombs 23

Tree castles and insecurity on the eve of colonial conquest 25

Portuguese violence and population flight into Ovamboland 29

Internal migration in South Africa's Ovamboland 30

Tree castles and deforestation in the 1920s to 1940s 35

Colonial concerns about overpopulation and deforestation in the 1950s 38

Population growth in Ovamboland 40

Woody vegetation resources by the close of the twentieth century 43

3. Conquest of Nature: Imperial political ecologies 47
 The political ecology of insecurity 51
 Indirect environmental rule 52
 The colonial conquest of Nature: Direct environmental rule 66
4. Fierce species: Biological imperialism 83
 Invading microbes and virgin soil epizootics 85
 Invading microbes and virgin soil epidemics 88
 A plague of donkeys: Fierce invading equines 92
 Fierce indigenous creatures on the rampage 101
5. Guns, hoes and steel:
 Techno-environmental determinism 113
 Guns 114
 Steel tools 121
 Steel plows 127
 Guns and steel in north-central Namibia 137
6. Naturalizing cattle culture: Colonialism as a deglobalizing and
 decommodifying force 139
 The cattle complex and environmental degradation 141
 Ovambo cattle as global commodities 143
 Cattle, culture and nature 144
 Overstocking and biological time bombs 149
 Colonial barriers: Conservation and fences 153
 Grazing pressure and desertification 156
 Livestock and deforestation 157
 Commodification, deglobalization and deforestation 159
7. The Palenque paradox: Beyond Nature-to-Culture 161
 Bush cities and the bush 162
 ‘Bushmen’ and the bush 168

8. The Ovambo paradox and environmental pluralism	177
Deforestation in Ovamboland	182
Reforestation in Ovamboland	186
Environmental pluralism: Multiprocessual asynchronous environmental change	190
