Preface xii

1 The continent and its people	1
Geophysical structure	1
Population	2
Population density and urbanization	2
Age structure and life expectancy	3
GNP per capita	4
The seven main subregions	6
North Africa	6
The Sahel subregion	7
Non-Sahelian West Africa	8
The Central African subregion	8
East African subregion	9
The Southern African subregion	9
The island states of the Indian Ocean	10
The development climate	10
2 The historical development of science and technology	18
Origins and development of policy-making organs	18
Anglophone Africa	19
Francophone Africa	20
Other imperial powers	22
Post-colonial era: the wind of change	22
CASTAFRICA I	25
Critical perspectives on CASTAFRICA I	28
CASTAFRICA II	29
The role of United Nations agencies	32
3 Science and government	36
Political process	37
Ethnic structure and political management	37
System of government	38
The party machinery	40
Nongovernmental levels	41
Technological dependency	41

4 National science and technology policy	44
Objectives and priorities	45
Policy-making organs	48
Trends and analysis	49
Obstacles and difficulties	56
5 Government structures and mechanisms for S&T policy-making	58
Integrating science and technology in national development plans	62
West Africa	63
Eastern and Southern Africa	63
North Africa	65
Central Africa	67
6 Human resources in science and technology	70
Educational policies	70
Higher education	72
Women in higher education	73
Field of study	73
Study abroad	76
Educational constraints	77
Institutions	79
Scientists and engineers	82
Expenditures	90
Major deficiencies in S&T policies	94
Government attitudes towards S&T	97
Generating a new climate	99
7 Agricultural science and technology	104
Policy and research	104
Food policy	111
Forestry and biosphere	114
The environment	117
Policy dilemmas	118
Institutions	120
African ministerial conference on the environment (AMCEN)	122
Agriculture and emerging new technologies	124
The dominance of agriculture	124
8 Medical sciences and biotechnology	129
Historical perspectives	129
Western-oriented medical care	130
Traditional medical care	130
Policy approaches	132
Training and economic support	134
Some selected diseases	136
Biotechnology	140
Conclusion	143

9 Industrial research and development	146
<i>John E. Udo Ndebbio</i>	
Public and private research efforts	147
Industrial research and development expenditures	148
Research contribution to productivity growth	149
Industrial production in Africa	149
Industrial research and development	151
Constraints	151
Prospects	153
Conclusion	154
10 Research and development in the petroleum industry	156
<i>John E. Udo Ndebbio</i>	
Exploration, discovery and production	156
Petroleum technological development	160
Transnationals and the marketing of petroleum products	162
Petrochemicals	162
Major African oil producing countries and petrochemical projects	163
Oil technology transfer	164
Conclusion	164
11 Energy and development	166
<i>John E. Udo Ndebbio, Akpan H. Ekpo and John W. Forje</i>	
Energy problem theorizing	166
Energy and the global economy	167
Pattern of energy production and consumption	167
Africa's energy situation: problems and prospects	170
Household energy	172
Household energy strategy studies	173
Energy efficiency and strategy planning	174
Woodfuel	175
Biomass	178
Biogas	180
Wind power	181
Solar energy	181
Conclusion	181
12 Computer technology and development	184
<i>Akpan H. Ekpo and John E. Udo Ndebbio</i>	
Technology and development: unsettled issues	184
Outlook for computer technology in Africa	185
Transfer of computer technology	185
Conclusion	187
13 Cooperation in science and technology	189
Cooperation at regional level	191
The subregional level	193

The international level	198
South-South cooperation	200
Interregional cooperation	204
Africa/Latin America accord	204
Africa and India	206
Africa and China	206
Selected meetings, organizations and missions	207
Cooperative actions through multilateralism	209
Conclusion	214

14 Militarization: technology and development 218

Military budgets	219
Technology transfer	221
Manpower and equipment	221
Arms arsenal contra development	228
Military R&D and the industrial sector	231
Conclusion	232

15 Popularization of science and technology 234

Mechanisms for popularization	237
Scientific and professional societies	238
Libraries and computer technology	241
Radio and other communication channels	243
Conclusion	245

16 Transport and communications 250

Telecommunications	251
Satellite communications	251
International Telecommunications Network (ITU)	252
International Civil Aviation Organization (ICAO)	252
Universal Postal Union (UPU)	252
Panafrican Telecommunications Network (PANAFTEL)	253
Transafrican Highway	253
Aviation	254
Conclusion	255

Conclusions and recommendations 257

Appendices

1 The Brazzaville Declaration on Science and Technology	260
2 The Kilimanjaro Declaration	261
3 Directory of research establishments	264
Organizations responsible for national science and technology policy	264
Major research establishments	267
