# CONTENTS

<b>List of Figures</b>	<b>ix</b>
<b>List of Tables</b>	<b>x</b>
<b>Preface</b>	<b>xii</b>
<b>PART I: CONTEXT</b>	
<b>1 Overview</b>	<b>3</b>
1.1 Setting the scene	3
1.2 A historical perspective on the economy-environment relationship	5
1.3 Structure of the book	6
<b>2 Biodiversity, Ecosystem Functions and Human Activity</b>	<b>9</b>
2.1 Multilevel diversity	9
2.1.1 Genetic diversity	9
2.1.2 Species diversity	10
2.1.3 Ecosystem diversity	11
2.1.4 Functional diversity	12
2.2 Loss of biodiversity	13
2.3 Alternative perspectives on biodiversity value	15
2.3.1 Instrumental vs. intrinsic values	15
2.3.2 Monetary vs. biological indicators	15
2.3.3 Direct vs. indirect values	16
2.3.4 Biodiversity vs. biological resources	16
2.3.5 Levels of vs. changes in biodiversity	17
2.3.6 Local vs. global diversity	17
2.3.7 Genetic vs. other life organization levels	17
2.3.8 Holistic vs. reductionist approaches	17
2.3.9 Expert vs. general public assessments	18

**PART II:  
BIO-ECOLOGICAL FOUNDATIONS**

<b>3</b>	<b>Conceptualizing Biodiversity and Ecosystem Functions</b>	<b>21</b>
3.1	Introduction	21
3.2	The '4-box model'	23
3.3	Biodiversity functions	24
3.4	Community, ecosystem and ecological organization	25
3.5	Ecosystem health	26
<b>4</b>	<b>Measuring Biodiversity</b>	<b>31</b>
4.1	Introduction	31
4.2	Biotic richness: genetic, species and ecosystem diversity	31
4.2.1	Genetic diversity	31
4.2.2	Species diversity	32
4.2.3	Ecosystem diversity	33
4.3	Ecological methods for biodiversity analysis	34
4.3.1	Overview	34
4.3.2	Red List of threatened species	34
4.3.3	Definition of sites of special scientific interest	36
4.3.4	Population dynamics of species and ecosystems	37

**PART III:  
ECONOMIC FOUNDATIONS**

<b>5</b>	<b>Economic Analysis of Biodiversity Values</b>	<b>43</b>
5.1	The concept of economic value	43
5.2	General aspects of economic valuation of biodiversity	45
5.3	Motivation for economic valuation of biodiversity	46
5.3.1	Multiple reasons	46
5.3.2	Cost-benefit analysis	46
5.3.3	Environmental accounting	47
5.3.4	Natural resource damage assessment and legal claims	48
5.3.5	Proper pricing	48
5.4	A classification of economic values of biodiversity	49
<b>6</b>	<b>Measuring Economic Value of Biodiversity Benefits</b>	<b>51</b>
6.1	Alternative valuation methods and their degree of applicability	51
6.2	Biodiversity valuation studies	53
6.2.1	Overview	53
6.2.2	Genetic diversity and bioprospecting	53

---

6.2.3 Biodiversity and species preservation	55
6.2.4 Biodiversity and natural habitat preservation	56
6.2.5 Biodiversity and ecosystem functions and services flows	59
6.2.5.1 Soil and wind erosion valuation studies	60
6.2.5.2 Water quality valuation studies	61
6.2.5.3 Wetland ecosystem function valuation studies	62
6.3 Discussion of the valuation results	62
 <b>PART IV:</b>	
<b>ECONOMICS-ECOLOGY INTERFACE</b>	
<b>7 Integrated Ecological-Economic Modeling and Analysis of Biodiversity</b>	<b>67</b>
7.1 Introduction	67
7.2 Frameworks and theories underlying integrated modeling	67
7.3 Integrated model assessment	68
7.4 Specific methods and models	70
7.5 Interaction between integrated modeling and monetary valuation	72
7.6 Advantages and disadvantages of integrated modeling	73
7.7 A spatial-economic-hydroecological model for biodiversity evaluation	74
7.7.1 Background	74
7.7.2 Description of the area	75
7.7.2.1 Current situation	75
7.7.2.2 Threats to the wetlands	75
7.7.2.3 Development scenarios	77
7.7.3 Method of integrated research	77
7.7.4 Results	79
<b>8 Multicriteria Evaluation</b>	<b>83</b>
8.1 Introduction	83
8.2 Multicriteria decision models	84
8.3 Practical applications to biodiversity issues	86
8.3.1 An example of coastal habitats	87
8.3.2 Examples for the Netherlands	89
<b>9 Research Synthesis and Value Transfer</b>	<b>93</b>
9.1 Introduction	93
9.2 Meta-analytical methods	94
9.2.1 Statistical techniques	94
9.2.2 Other techniques	96
9.2.2.1 Rough set analysis	96
9.2.2.2 Fuzzy set analysis	97
9.2.2.3 Content analysis	97

9.3 Value transfer	98
9.4 A comparative study of biodiversity values	99
9.4.1 Background	99
9.4.2 Meta-analytical method used	102
9.4.3 Results	103
 <b>PART V:</b>	
<b>POLICY AND CONCLUSIONS</b>	
 <b>10 Biodiversity Policy</b>	 <b>107</b>
10.1 Introduction	107
10.2 Public policy strategies	108
10.2.1 Direct government intervention	108
10.2.2 Information provision	109
10.3 Biodiversity certification and ecolabeling as biodiversity policies	110
10.3.1 Motivation	110
10.3.2 Consumer awareness	111
10.3.3 The incentive of firms to undertake certification and ecolabeling	113
10.3.4 Sensitivity of consumer demand for biodiversity price premiums	113
10.3.5 Illustrations of certification, ecolabeling and mixed policy instruments	114
10.3.5.1 The European organic food market	114
10.3.5.2 The Dutch green-certification system for the energy market	115
10.3.5.3 The timber certification market	115
10.3.6 Evaluation of biodiversity certification and ecolabeling policy instruments	116
 <b>11 Conclusions</b>	 <b>119</b>
 <b>Appendix: Red Book Classification of Species</b>	 <b>123</b>
 <b>References</b>	 <b>129</b>
 <b>Index</b>	 <b>157</b>
