Preface to the second edition

page ix

1. Introduction	1
Definitions	1
Physical or mechanical biodeterioration	3
Fouling or soiling (aesthetic biodeterioration)	3
(Bio)chemical assimilatory biodeterioration	5
(Bio)chemical dissimilatory biodeterioration	5
The range of deteriogens	5
Cycling of elements	6
Recognition and costing of biodeterioration	6
 2. Natural Materials	 11
CELLULOSIC MATERIALS	11
Wood in the marine environment	17
STORED FOOD	19
Insects and mites in stored products	23
Prevention of infestation by pests of stored products	26
Farm-stored (bulk-stored) grain	28
BIODETERIORATION OF NATURAL PRODUCTS OF ANIMAL ORIGIN	29
Leather	29
Wool, fur, feathers, and museum specimens	31
Animal glue	33
Control of deterioration of wool and other animal-derived products	34
STONE	35
Microorganisms implicated in stone biodeterioration	35
Invertebrate deteriogens of stone	41

3. Biodeterioration of Refined and Processed Materials	44
BIODETERIORATION OF FUELS AND LUBRICANTS	44
Fuels	46
Control of microbial growth in fuel	53
Lubricants	54
BIODETERIORATION OF PLASTICS AND RUBBERS	61
Natural and synthetic rubbers	63
Regenerated and modified celluloses	65
Regenerated proteins	67
Polyethylenes	67
Polyesters	68
Polyurethanes	70
Polyamides	74
Additives	75
Impurities	77
GLASS	78
PAINTS	78
COSMETICS AND HEALTH PRODUCTS	85
METALS	89
Microbial concentration cells	92
Metabolic product secretion	94
ADHESIVES AND SEALANTS	101
MAGNETIC MEDIA - INFORMATION TECHNOLOGY	103
 4. Built Environment, Structures, Systems, and Transportation	 111
BUILDINGS	111
Introduction	111
Fungal growth affecting structures	112
Algal and cyanobacterial growth affecting structures	118
Control of microbial growth	121
Health problems	122
Insects and structures	123
Rodent and bird damage	130
Damage caused by plant growth	142
Historic and cultural buildings	148
TRANSPORT SYSTEMS	152
Railways	152
Roads	153
Waterways	154
Transportation - aircraft and ships	156
MUSEUMS	160

5. Investigative Biodeterioration	166
The plant audit	166
Detection techniques for biodeteriogenic microorganisms	171
Biodeterioration test techniques	177
Recent research techniques in biodeterioration	191
The future	199
Websites	199
6. The Control of Biodeterioration	203
PHYSICAL METHODS	204
CHEMICAL METHODS	208
Major chemical actives	211
Modes of action	215
Regulatory aspects	221
BIOLOGICAL METHODS	223
<i>General Index</i>	227
<i>Organism Index</i>	233
