Preface The Global Invasive Species Program (GISP)	xiii
<i>Harold A. Mooney</i>	

1 Introduction	1
<i>Charles Perrings, Mark Williamson and Silvana Dalmazzone</i>	

## PART I ANALYSIS

2 Economic factors affecting vulnerability to biological invasions	17
<i>Silvana Dalmazzone</i>	
3 Infectious diseases as invasives in human populations	31
<i>Doriana Delfino and Peter J. Simmons</i>	
4 Risk reduction strategies against the 'explosive invader'	56
<i>Jason F. Shogren</i>	
5 The economics of an invading species: a theoretical model and case study application	70
<i>Duncan Knowler and Edward B. Barbier</i>	
6 Weed invasions of Australian farming systems: from ecology to economics	94
<i>Andrew R. Watkinson, Robert P. Freckleton and Peter M. Dowling</i>	

## PART II CASE STUDIES

7 An introduced disease in an invasive host: the ecology and economics of rabbit calicivirus disease (RCD) in rabbits in Australia	117
<i>Piran C.L. White and Geraldine Newton-Cross</i>	
8 Invasive species in tropical rain forests: the importance of existence values	138
<i>Jon C. Lovett</i>	

9	Economic consequences of alien infestation of the Cape Floral Kingdom's Fynbos vegetation <i>Jane Turpie and Barry Heydenrych</i>	152
10	The impact of invasive species in African lakes <i>Victor Kasulo</i>	183
11	Economic evaluation in classical biological control <i>Garry Hill and David Greathead</i>	208
PART III CONCLUSIONS		
12	Conclusions <i>Charles Perrings, Mark Williamson and Silvana Dalmazzone</i>	227
	<i>Index</i>	241
