EDITOR'S NOTE

During the course of the research survey, several changes have taken place in the State and Local Government Areas pertaining to the information we sourced. Such changes include cabinet reshuffles, retirements, reassignments of political leaders and in some cases deaths have occurred. In view of their political significance, such names of political leaders, even where changed remain historically important at that period in our dynamic national and political development efforts. Changes not reflected must have taken place after we have gone to press.
