Preface	xxi	2.5 Reproductive System	18
Contributors	xxiii	2.6 Immune System	18
		2.7 Muscle, Liver, Adipose, and Gastrointestinal Tissues	19
		2.8 Cardiovascular System	20
		2.9 Hurdles and Future Developments	20
		References	21
<b>Part I</b>			
<b>Undergirding Themes</b>			
<b>1. Avian Genomics</b>		<b>3. Avian Proteomics</b>	
<i>Jerry B. Dodgson</i>		<i>Dusan Kunec and Shane C. Burgess</i>	
1.1 Introduction	3	3.1 Introduction	25
1.2 Genome Size	3	3.2 Protein Identification and Analysis	26
1.3 Chromosomes	3	3.2.1 Two-Dimensional Gel Electrophoresis-Based Proteomics	26
1.3.1 Karyotypes	3	3.2.2 Gel-Free Based Proteomics	27
1.3.2 Sex Chromosomes	4	3.3 Quantitative Proteomics	28
1.3.3 Telomeres and Centromeres	4	3.4 Structural Proteomics	28
1.4 Genome Sequences	4	3.5 Application of Proteomics in Avian Research	29
1.4.1 Approach	4	3.5.1 Organ and Tissue Proteomics	29
1.4.2 Coverage	4	3.5.2 Proteomics of Cell Metabolism	30
1.5 Annotation	7	3.5.3 Production Proteomics	31
1.6 Genome Browsers	7	3.5.4 Proteomics of Disease and Infection	32
1.7 Genes	7	3.6 Conclusions	34
1.8 Transposons	8	References	34
1.9 Genome Diversity	8		
1.9.1 SNP Discovery	8	<b>4. Mitochondrial Physiology</b>	
1.9.2 SNP Diversity	9	<i>Walter Bottje</i>	
1.9.3 Recombination	9	4.1 Mitochondria: An Introduction	39
1.10 Connecting Sequence to Phenotype	9	4.1.1 Overview	39
1.10.1 Avian-Specific Genes	9	4.1.2 Physical Description	39
1.10.2 Mapping Mutations and QTL	10	4.1.3 Mitochondrial and Nuclear DNA Interaction for Assembly and Function	39
1.10.3 Resequencing	10	4.1.4 Mitochondrial Fusion and Fission	41
1.11 Conclusions and Summary	10	4.1.5 The Respiratory Chain and ATP Synthesis	41
References	11	4.1.6 Assessing Mitochondrial Function	42
		4.1.7 Mitochondrial Role in Apoptosis	42
<b>2. Transcriptomics of Physiological Systems</b>		4.2 Mitochondrial Inefficiencies	43
<i>Tom E. Porter</i>		4.2.1 Electron Transport Defects and Oxidative Stress	43
Abbreviations	15	4.2.2 Antioxidants	45
2.1 Introduction	15	4.2.3 Mitochondrial Uncoupling and Attenuation of Oxidative Stress	45
2.2 Early Efforts	15		
2.3 Nervous System	17		
2.4 Endocrine System	17		

4.3 Matching Energy Production to Energy Need	46
4.3.1 Mitochondrial Biogenesis	46
4.3.2 AMP-Activated Protein Kinase	47
4.3.3 Sirtuins	47
References	47

## Part II

### Sensory Biology and Nervous System Theme

#### 5. The Avian Somatosensory System: A Comparative View

*J. Martin Wild*

Abbreviations	55
5.1 Introduction	55
5.2 Body Somatosensory Primary Afferent Projections in Different Species	56
5.2.1 Spinal Cord	56
5.2.2 Brainstem	57
5.3 Ascending Projections of the Dorsal Column Nuclei	58
5.4 Telencephalic Projections of Thalamic Nuclei Receiving Somatosensory Input	60
5.5 Somatosensory Primary Afferent Projections from the Beak and Tongue to the Trigeminal Column	61
5.5.1 Principal Sensory Trigeminal Nucleus	61
5.5.2 Nucleus of the Descending Trigeminal Tract (nTTD)	62
5.6 Nucleus Basorostralis	63
5.7 The Meeting of the Spinal and Trigeminal Systems	64
5.8 The Somatosensory-motor System in Birds	64
5.9 Somatosensory Projections to the Cerebellum	65
5.10 Magnetoreception and the Trigeminal System	65
5.11 Summary and Conclusions	66
References	66

#### 6. Avian Hearing

*Christine Köppl*

Abbreviations	71
6.1 Introduction: What Do Birds Hear?	71
6.2 Outer and Middle Ear	72
6.2.1 No Specialized Outer Ear Structures, Except in Owls	72
6.2.2 The Single-Ossicle Middle Ear	72
6.2.3 Coupled Middle Ears?	73

6.3 Basilar Papilla (Cochlea)	73
6.3.1 General Morphology and Physiology	73
6.3.2 Hair-Cell Types: A Remarkable Example of Evolutionary Convergence in Birds and Mammals	76
6.3.3 Hair-Cell Regeneration: Birds Never Lose Their Hearing	76
6.3.4 Cochlear Specializations: Auditory Foveae, Infrasound Hearing	77
6.3.5 Auditory Nerve: What the Ear Conveys to the Brain	77
6.4 The Auditory Brain	78
6.4.1 Basic Organization of Auditory Pathways	78
6.4.2 The Generation of an Auditory Space Map in the Barn Owl	81
6.4.3 Developmental Plasticity: Auditory Space is Calibrated by Vision	82
6.4.4 The Special Processing of Birdsong	82
6.4.5 Echolocating Birds	83
6.5 Summary	84
References	84

#### 7. The Chemical Senses in Birds

*Larry Clark, Julie Hagelin and Scott Werner*

7.1 Chemical Senses	89
7.2 Chemesthesis	89
7.2.1 Trigeminal and Somatosensory Nerves	89
7.2.2 Performance Characteristics of Nociceptors	90
7.2.3 Receptor Mechanisms	90
7.2.4 Chemical Structure–Activity Relationships to Irritants	92
7.2.5 Responses to Respiratory Stimuli	93
7.2.6 Nasal and Respiratory Irritation and Interaction of Olfaction and Chemesthesis	93
7.2.7 Behavioral Responses to Irritants	94
7.2.8 Applications	94
7.3 Olfaction	94
7.3.1 Morphology of Olfactory System	94
7.3.2 Innervation of Olfactory Receptors	94
7.3.3 Olfactory Neuronal Response	96
7.3.4 Laboratory Detection Thresholds, Discrimination, and Seasonal Change	96
7.3.5 Development	98
7.3.6 Field Studies and Behavioral Ecology	98
7.3.7 Summary	99
7.4 Gustation	100
7.4.1 Taste Receptors	100
7.4.2 Response to Sweet	100
7.4.3 Response to Salt	102
7.4.4 Response to Sour	102

7.4.5 Response to Bitter	102
7.4.6 Response to Umami	103
7.4.7 Response to Calcium	103
7.4.8 Taste Behavior and Applications	103
7.4.9 Summary	104
References	104

## 8. Magnetoreception in Birds and Its Use for Long-Distance Migration

*Henrik Mouritsen*

8.1 Introduction	113
8.2 Magnetic Fields	113
8.3 The Earth's Magnetic Field	114
8.4 Changing Magnetic Fields for Experimental Purposes	115
8.5 Birds Use Information from the Earth's Magnetic Field for Orientation and Navigation	115
8.6 The Magnetic Compass of Birds	118
8.7 Do Birds Possess a Magnetic Map?	119
8.8 Interactions with Other Cues	120
8.9 How Do Birds Sense the Earth's Magnetic Field?	121
8.10 The Induction Hypothesis	121
8.11 The Iron-Mineral-Based Hypothesis	121
8.12 The Light-Dependent Hypothesis	125
8.13 Irreproducible Results and the Urgent Need for Independent Replication	129
8.14 Where Do We Go from Here?	129
References	129

## 9. The Avian Subpallium and Autonomic Nervous System

*Wayne J. Kuenzel*

9.1 Introduction	135
9.2 Components of the Subpallium	136
9.2.1 Dorsal Somatomotor Basal Ganglia	136
9.2.2 Ventral Viscerolimbic Basal Ganglia	139
9.2.3 Extended Amygdaloid Complex: Central Extended Amygdala and Medial Extended Amygdala	142
9.2.4 Basal Telencephalic Cholinergic and Noncholinergic Corticopetal System	144
9.2.5 Septum and Septal Neuroendocrine Systems	145
9.3 Components of the Autonomic Nervous System	149
9.3.1 Sympathetic Nervous System	149
9.3.2 Parasympathetic Nervous System	150
9.4 Functional Neural Pathways Involving the Subpallium and ANS	150

9.4.1 Regulation of the Reproductive System	150
9.4.2 Regulation of Food Intake	151
9.5 Summary and Conclusions	154
Acknowledgments	154
References	155

## Part III Organ Systems Theme

### 10. Blood

*Colin G. Scanes*

10.1 Introduction	167
10.2 Plasma	167
10.2.1 Circulating Electrolytes	167
10.2.2 Circulating Nutrients and Other Small Organic Molecules	167
10.2.3 Plasma Proteins	168
10.3 Erythrocytes	171
10.3.1 Structure of the Erythrocyte	171
10.3.2 Erythrocyte Chromatin and Transcription	171
10.3.3 Metabolism of Erythrocytes	172
10.3.4 Number of Erythrocytes and Packed Cell Volume (Hematocrit)	173
10.3.5 Production of Erythrocytes	173
10.3.6 Lifespan of Erythrocytes	174
10.3.7 Hemoglobin	174
10.3.8 Carbonic Anhydrase	175
10.3.9 Transporters	176
10.3.10 Hormonal Effects on Erythrocytes	176
10.3.11 Effect of Stressors	176
10.3.12 Other Roles for the Avian Erythrocyte	177
10.4 Blood Gases	177
10.5 Leukocytes	177
10.5.1 Populations	177
10.5.2 Heterophils	179
10.5.3 Lymphocytes	181
10.5.4 Eosinophils	181
10.5.5 Monocytes	182
10.5.6 Basophils	182
10.6 Thrombocytes	182
10.6.1 Structure	183
10.6.2 Function	183
10.6.3 Number	183
10.6.4 Production	183
10.7 Clotting	184
10.8 Avian Blood Models	184

10.8.1 $\beta$ -adrenergic Receptors	184	12.4 The Avian Salt Gland	298
10.8.2 Transgenic Chickens	185	12.4.1 Structure of the Salt Glands	298
10.8.3 Avian IgY Antibodies	185	12.4.2 Product of Salt Gland Secretion	299
10.8.4 Nutritional Models	185	12.4.3 Control of Salt Gland Secretion	299
References	185	References	299
<b>11. The Cardiovascular System</b>		<b>13. Respiration</b>	
<i>Edward M. Dzialowski and Dane A. Crossley II</i>		<i>Frank L. Powell</i>	
11.1 Introduction	193	13.1 Overview	301
11.2 Heart	193	13.1.1 Oxygen Cascade	301
11.2.1 Gross Structure and Function	193	13.1.2 Symbols and Units	301
11.2.2 Cardiac Variables	197	13.2 Anatomy of the Avian Respiratory System	301
11.2.3 Fine Structure and Cardiac Electrophysiology	198	13.2.1 Upper Airways	302
11.3 General Circulatory Hemodynamics	205	13.2.2 Lungs	303
11.4 The Vascular Tree	206	13.2.3 Air Sacs	305
11.4.1 Arterial System	206	13.2.4 Respiratory System Volumes	306
11.4.2 Capillary Beds	215	13.3 Ventilation and Respiratory Mechanics	307
11.4.3 Venous System	218	13.3.1 Respiratory Muscles	307
11.4.4 Embryonic Shunts	221	13.3.2 Mechanical Properties	307
11.5 Control of the Cardiovascular System	222	13.3.3 Ventilatory Flow Patterns	309
11.5.1 Control Systems	222	13.4 Pulmonary Circulation	312
11.5.2 Control of Peripheral Blood Flow	223	13.4.1 Anatomy of the Pulmonary Circulation	312
11.5.3 Control of the Heart	231	13.4.2 Pulmonary Capillary Volume	312
11.5.4 Reflexes Controlling the Circulation	253	13.4.3 Pulmonary Vascular Pressures, Resistance, and Flow	312
11.5.5 Integrative Neural Control	258	13.4.4 Fluid Balance	313
11.5.6 Development of Cardiovascular Control	259	13.5 Gas Transport by Blood	314
11.6 Environmental Cardiovascular Physiology	266	13.5.1 Oxygen	314
11.6.1 Flight	266	13.5.2 Carbon Dioxide	317
11.6.2 Swimming and Diving	269	13.5.3 Acid-Base	318
Acknowledgments	271	13.5.4 Blood Gas Measurements	318
References	271	13.6 Pulmonary Gas Exchange	318
<b>12. Osmoregulatory Systems of Birds</b>		13.6.1 Basic Principles of Oxygen Transport	319
<i>Eldon J. Braun</i>		13.6.2 Cross-Current Gas Exchange	320
12.1 Introduction	285	13.6.3 Lung Diffusing Capacity	321
12.1.1 Organs of Osmoregulation in Vertebrates	285	13.6.4 Heterogeneity in the Lung	322
12.1.2 Osmoregulation by Birds	285	13.6.5 Frontiers: Gas Exchange during High-Altitude Flight	323
12.2 The Avian Kidney	286	13.7 Tissue Gas Exchange	324
12.2.1 Vascular Anatomy of the Kidney	287	13.7.1 Microcirculation	324
12.2.2 Glomerular Filtration	289	13.7.2 Myoglobin	325
12.2.3 Ion Transport by Renal Tubules	290	13.7.3 Effects of Hypoxia and Exercise	325
12.2.4 The Renal Medulla	291	13.8 Control of Breathing	325
12.2.5 Concentration and Dilution of Urine	292	13.8.1 Respiratory Rhythm Generation	326
12.2.6 Nitrogen Excretion	294	13.8.2 Sensory Inputs	327
12.2.7 Form of Uric Acid in Avian Urine	295	13.8.3 Ventilatory Reflexes	328
12.3 The Avian Lower Gastrointestinal Tract	297	13.8.4 Ventilatory Response to Exercise	330
		13.8.5 Frontiers: Extreme Hyperventilation at High Altitude	330
		References	330

## 14. Gastrointestinal Anatomy and Physiology

*D. Michael Denbow*

<b>14.1 Anatomy of the Digestive Tract</b>	<b>337</b>
14.1.1 Beak, Mouth, and Pharynx	337
14.1.2 Esophagus and Crop	338
14.1.3 Stomach	340
14.1.4 Small Intestine	341
14.1.5 Ceca	341
14.1.6 Colon (Rectum) and Cloaca	342
<b>14.2 Anatomy of the Accessory Organs</b>	<b>342</b>
14.2.1 Pancreas	342
14.2.2 Liver	342
<b>14.3 Motility</b>	<b>342</b>
14.3.1 Esophagus	342
14.3.2 Gastrointestinal Cycle	343
14.3.3 Small Intestine	345
14.3.4 Ceca	345
14.3.5 Colon	346
14.3.6 Other Influences on Motility	347
<b>14.4 Neural and Hormonal Control of Motility</b>	<b>347</b>
14.4.1 Rate of Passage	351
<b>14.5 Secretions and Digestion</b>	<b>351</b>
14.5.1 Mouth	352
14.5.2 Esophagus and Crop	352
14.5.3 Stomach	352
14.5.4 Intestines	354
14.5.5 Colon	355
14.5.6 Pancreas	355
14.5.7 Bile	355
<b>14.6 Absorption</b>	<b>356</b>
14.6.1 Carbohydrates	356
14.6.2 Amino Acids and Peptides	357
14.6.3 Fatty Acids and Bile Acids	359
14.6.4 Volatile Fatty Acids	359
14.6.5 Electrolytes	359
14.6.6 Water, Sodium, and Chloride	359
14.6.7 Vitamins	360
<b>14.7 Age-Related Effects on Gastrointestinal Function</b>	<b>360</b>
14.7.1 Microflora	361
<b>References</b>	<b>361</b>
<b>Further Reading</b>	<b>366</b>

## 15. Poultry Bone Development and Bone Disorders

*M. Pines and R. Reshef*

<b>15.1 Introduction</b>	<b>367</b>
<b>15.2 Bone Development</b>	<b>367</b>
15.2.1 Somitogenesis and Sclerotome Formation	367

15.2.2 Signaling Molecules Influence Sclerotome Formation	368
15.2.3 Tissue Interactions and Gene Activity in Limb Development	368
15.2.4 Molecular Mechanisms Controlling Chondrogenesis	369
<b>15.3 Bone Disorders</b>	<b>370</b>
15.3.1 Inherited and Rare Bone Disorders	370
15.3.2 Bone Disorders of the Spine	370
15.3.3 Bone Disorders due to Mycoplasma Infection	371
15.3.4 Bacterial Chondronecrosis with Osteomyelitis—Femoral Head Necrosis	372
15.3.5 Angular Limb Deformities	372
15.3.6 Vitamin and Mineral Deficiencies	372
15.3.7 Tibial Dyschondroplasia	373
<b>15.4 Conclusions</b>	<b>373</b>
<b>References</b>	<b>374</b>

## 16. Skeletal Muscle

*Sandra G. Velleman and Douglas C. McFarland*

<b>16.1 Introduction</b>	<b>379</b>
<b>16.2 Diversity of Avian Skeletal Muscle</b>	<b>379</b>
<b>16.3 Embryonic Origins of Skeletal Muscle</b>	<b>380</b>
<b>16.4 Postnatal or Posthatch Skeletal Muscle Development</b>	<b>381</b>
16.5 Skeletal Muscle Growth	381
16.6 Skeletal Muscle Fiber Types	384
16.7 Muscle Structure and Contraction	384
16.8 Muscle Development: Function of Myogenic Regulatory Factors	386
16.9 Satellite Cell and Myoblast Heterogeneity	386
<b>16.10 Maternal Inheritance and Growth Selection on Breast Muscle Morphology</b>	<b>387</b>
<b>16.11 Effect of Selection for Increased Growth Rate on Muscle Damage</b>	<b>389</b>
<b>16.12 Extracellular Matrix Regulation of Muscle Development and Growth</b>	<b>390</b>
<b>16.13 Regulation of Muscle Growth Properties by Cell-Membrane Associated Extracellular Matrix Macromolecules</b>	<b>395</b>
<b>16.14 Regulation of the Myogenic Regulatory Factors by the Extracellular Matrix</b>	<b>396</b>
<b>16.15 Novel Genes Involved in Avian Myogenesis</b>	<b>396</b>
<b>16.16 Summary</b>	<b>396</b>
<b>Acknowledgment</b>	<b>396</b>
<b>References</b>	<b>396</b>

## 17. The Avian Immune System

*Pete Kaiser and Adam Balic*

17.1 Introduction	403
17.2 The Organs and Cells of the Avian Immune Response	403
17.2.1 Primary Lymphoid Tissues	403
17.2.2 Secondary Lymphoid Tissues	406
17.3 Regulation of the Immune Response	410
17.3.1 Molecules and Cells of the Innate Immune Response	410
17.3.2 The Major Histocompatibility Complex	411
17.3.3 Cytokines and Chemokines	411
17.4 Summary and Conclusions	414
References	415

## Part IV Metabolism Theme

### 18. Carbohydrate Metabolism

*Colin G. Scanes*

18.1 Overview of Carbohydrate Metabolism in Birds	421
18.2 Circulating Concentrations of Carbohydrates	421
18.2.1 Introduction: Circulating Concentrations of Glucose across Avian Species	421
18.2.2 Domestication and Circulating Concentrations of Glucose	422
18.2.3 Fasting and Circulating Concentrations of Glucose	422
18.2.4 Influence of Feeding	423
18.2.5 Shifts in Circulating Concentration with Age, Reproductive State, and Migration	423
18.2.6 Shifts in Circulating Concentrations of Glucose due to Disease, Toxicants, and Husbandry Practices	425
18.2.7 Temperature and Circulating Concentrations of Glucose	425
18.3 Glucose Utilization	425
18.3.1 Developmental Changes	425
18.3.2 Fasting and Glucose Utilization	425
18.4 Glucose Transport	426
18.5 Intermediary Metabolism	428

18.5.1 Glucose Phosphorylation and Dephosphorylation	428
18.5.2 Glycolysis	428
18.5.3 Citric Acid or Tricarboxylic Acid Cycle	429
18.6 Gluconeogenesis	430
18.6.1 Gluconeogenesis and Fasting	430
18.6.2 Relative Importance of the Liver and the Kidney	431
18.7 Glycogen	431
18.7.1 Overview	431
18.7.2 Synthesis and Breakdown	431
18.7.3 <i>In ovo</i> Feeding	433
18.7.4 Glycogen Body	433
18.8 Carbohydrate Digestion and Absorption	434
18.8.1 Starch Digestion	434
18.8.2 Disaccharide Digestion	434
18.8.3 Glucose Absorption	434
18.8.4 Gastrointestinal Storage of Ingesta	435
18.8.5 Intestinal Fermentation	435
18.9 Conclusions	436
18.9.1 In starvation and metabolism	437
References	437

### 19. Adipose Tissue and Lipid Metabolism

*Johan Buyse and Eddy Decuyper*

Abbreviations	443
19.1 Introduction	443
19.2 Development of Adipose Tissue	443
19.3 Adipocyte Proliferation and Differentiation	444
19.4 Distribution of Body Fat	444
19.5 Lipid Metabolism	445
19.5.1 Lipoprotein Metabolism	445
19.5.2 Hormonal Control of Lipid Metabolism	446
19.6 Functions of Adipose Tissue	448
19.7 Factors Affecting Fat Metabolism and Deposition	450
19.8 Summary and Conclusions	451
References	451

### 20. Protein Metabolism

*Colin G. Scanes*

20.1 Introduction	455
20.1.1 Protein Metabolism: Overview	455
20.1.2 Muscle	455
20.1.3 Feathers	456
20.2 Digestion of Proteins	456
20.2.1 Protein Digestion in the Gizzard and Proventriculus	456

20.2.2 Protein Digestion in the Small Intestine	457	21.7 Differences between Birds and Mammals	480
20.2.3 Amino Acid Absorption in the Small Intestine	457	References	480
20.2.4 Large Intestine and Protein Digestion	458	Further Reading	485
<b>20.3 Protein Synthesis and Degradation</b>	<b>458</b>		
20.3.1 Whole-Body Synthesis and Degradation	458		
20.3.2 Muscle Protein Synthesis and Degradation	458		
20.3.3 Liver and Gastrointestinal Tract	461		
20.3.4 Protein Metabolism in Immune Tissues	462		
20.3.5 Proteins and Reproduction	462		
<b>20.4 Amino Acids and Metabolism</b>	<b>463</b>		
20.4.1 Amino Acid Transfer into Muscle and Other Cells	463		
20.4.2 Nitrogenous Waste	463		
20.4.3 Amino Acids as Energy Sources	464		
20.4.4 Amino Acid Derivatives	464		
<b>20.5 Extranutritional Effects of Amino Acids</b>	<b>465</b>		
20.5.1 Amino Acids in the Control of Metabolism	465		
References	465		
<b>21. Food Intake Regulation</b>			
<i>D. Michael Denbow and Mark A. Cline</i>			
21.1 Introduction	469		
21.2 Peripheral Regulation of Food Intake	469		
21.3 CNS Control of Food Intake	470		
21.4 Classical Neurotransmitters	470		
21.5 Peptides	472		
21.5.1 Neuropeptide Y	472		
21.5.2 Melanocortins	475		
21.5.3 Corticotrophin-Releasing Hormone	476		
21.5.4 Obestatin	476		
21.5.5 AMP-Activated Protein Kinase	476		
21.5.6 Opioids	476		
21.5.7 FMRFamides	477		
21.5.8 Galanin	477		
21.5.9 Visfatin	477		
21.5.10 Somatostatin	478		
21.5.11 Cannabinoids	478		
21.5.12 Glucagon-like Peptide	478		
21.5.13 Cholecystokinin	478		
21.5.14 Glucagon Superfamily	478		
21.5.15 Insulin	479		
21.5.16 Bombesin	479		
<b>21.6 Selection for Body Weight Alters Food Intake Control Mechanisms</b>	<b>479</b>		
		<b>22. Avian Endocrine System</b>	
		<i>Colin G. Scanes</i>	
		22.1 Introduction	489
		22.2 Avian Phylogeny	489
		22.3 Peptides and Other Chemical Messengers Controlling Physiology	490
		22.4 Chemical Messengers Found in Birds but Not Mammals	490
		22.5 Hormones Produced by Nontraditional Endocrine Organs	490
		22.5.1 Adiponectin	490
		22.6 Unique Aspects of Birds	490
		22.6.1 Song	490
		22.6.2 Salt Glands	490
		22.6.3 Unique Aspects of Metabolism	494
		22.6.4 Reproduction	494
		22.6.5 Opportunities for Transgenic Poultry	495
		22.7 The Enigma of Leptin	495
		References	495
		<b>23. Pituitary Gland</b>	
		<i>Colin G. Scanes</i>	
		23.1 Introduction	497
		23.2 Anatomy of the Hypothalamic–Hypophyseal Complex	497
		23.2.1 The Anterior Pituitary Gland or Pars Distalis	497
		23.2.2 Pars Tuberalis	498
		23.2.3 Posterior Pituitary Gland or Pars Nervosa	498
		23.3 Gonadotropins	500
		23.3.1 Structure	500
		23.3.2 Action of Gonadotropins	500
		23.3.3 Control of Gonadotropin Release	501
		23.3.4 Control of Expression of Gonadotropin Subunits	504
		23.3.5 Pituitary Origin of Gonadotropins	505
		23.3.6 Ontogeny of Gonadotropins	505

<b>23.4 Thyrotropin</b>	<b>505</b>	<b>23.10 Neurohypophysis</b>	<b>517</b>
23.4.1 Structure	505	23.10.1 Introduction	517
23.4.2 Actions of TSH	505	23.10.2 Actions of AVT	518
23.4.3 Control of Thyrotropin Release	505	23.10.3 Actions of MT	518
23.4.4 Control of TSH $\beta$ -Subunit Expression (in the Pars Distalis)	506	23.10.4 Behavioral Effects of Mesotocin and AVT	519
23.4.5 Origin of Thyrotropin	506	23.10.5 Control of AVT and MT Release	519
23.4.6 Ontogeny of Thyrotropin	506	23.10.6 AVT and MT Expression	519

## Part VI Reproductive Theme

### 28. Reproduction in the Female

*Alan L. Johnson*

28.1 Introduction	635
28.2 Development and Function of the Female Reproductive System	635
28.2.1 Late-Embryonic and Posthatch Ovary	636
28.2.2 Sexually Mature Ovary	637
28.2.3 Follicle Selection and Establishment of the Preovulatory Hierarchy	639
28.2.4 Follicle Atresia	640
28.2.5 Ovulation and Postovulatory Follicles	640
28.2.6 Domesticated Hen Ovary as a Model for Human Ovarian Cancer	641
28.2.7 Reproductive Tract and Sperm Storage Glands	641
28.3 Ovarian Hormones	643
28.3.1 Embryo and Posthatch Ovary	643
28.3.2 Mature Ovary	643
28.4 Endocrine and Physiologic Factors Affecting Ovulation and Oviposition	646
28.4.1 Ovulation	646
28.4.2 Oviposition	648
28.5 Reproductive Seasonality, Breeding, and Ovulation–Oviposition Cycles	648
28.5.1 Ovulation–Oviposition Cycle and Rate of Lay	649
28.5.2 Parthenogenesis	650
28.5.3 Maternal and Environmental Effects on the Embryo	651
28.5.4 Photorefractoriness, Broodiness, Molt, and Reproductive Senescence	651
28.6 Composition and Formation of the Yolk, Albumen, Organic Matrix, and Shell	653
28.6.1 Yolk	653
28.6.2 Albumen	653

28.6.3 Organic Matrix	654
28.6.4 Layers of Crystallization	655
28.6.5 Calcium Availability	656
References	658
Further Reading	665

### 29. Reproduction in Male Birds

*Jorge Vizcarra, Rebecca Alan and John Kirby*

29.1 Introduction	667
29.2 Reproductive Tract Anatomy	667
29.2.1 Testis	667
29.2.2 Excurrent Ducts	669
29.2.3 Accessory Organs	670
29.3 Ontogeny of the Reproductive Tract	671
29.3.1 Overview	671
29.3.2 Formation of the Undifferentiated Gonad	672
29.3.3 Gonadal Differentiation and Müllerian Duct Regression	673
29.3.4 Formation of the Excurrent Ducts	673
29.4 Development and Growth of the Testis	674
29.4.1 Proliferation of Somatic and Stem Cells in the Testis	674
29.4.2 Differentiation of Somatic Cells within the Testis	674
29.4.3 Initiation of Meiosis	676
29.4.4 Altering the Pattern of Testis Growth and Maturation	676
29.5 Hormonal Control of Testicular Function	676
29.5.1 Central Control of Testicular Function	676
29.5.2 Control of Adenohypophyseal Function in Males	677
29.5.3 Effects of Gonadotropins on Testicular Function	681
29.6 Spermatogenesis and Extragonadal Sperm Maturation	681
29.6.1 Spermatogenesis	681
29.6.2 Extragonadal Sperm Transport and Maturation	683
29.7 Seasonal Gonadal Recrudescence and Regression	686
29.7.1 Photoperiodic Control of Gonadal Regression and Recrudescence	686
29.7.2 Other Factors Affecting Gonadal Maturation and Regression	686
References	687

### 30. Reproductive Behavior

41.3 Life-Cycle of EDCs in the Environment	981		
41.4 Classes of EDCs	982		
41.4.1 Categorizing Potential Endocrine			
Disruptors According to Structure and Function		982	
41.4.2 General Mechanisms of Action of EDCs in Vertebrates		984	
41.4.3 Predicting Risk: Adverse Outcomes Pathways		985	
41.4.4 Predicting Impact: Toxic Equivalency Factor and Toxic Equivalence Quotient		985	
41.4.5 Why are Birds Unique?		987	
41.4.6 Discerning EDC Impacts in Field Birds		987	
41.4.7 Developing Testing Paradigms to Reveal Endocrine Disruption in Birds		990	
41.4.8 Pertinent Endpoints for Assessing Potential Endocrine Disruption		991	
41.5 Conclusions		995	
Acknowledgment		995
