Contents

1 Introduction 1

2 The Theoretical Framework 5

2.1 A Prototype Life-Cycle Consumption Model 6
2.2 A Consumption Model with Liquidity Constraints 15
2.3 A Consumption Model with Planned Bequests 27

3 The Importance of Consumption Behavior for the Effects of Government Fiscal Policies 31

3.1 Long-Run Fiscal Policy and Growth 31
3.2 Short-Run Fiscal Policy and Aggregate Demand 38
3.3 Previous Empirical Studies 40
3.4 Summary and Conclusion 55

4 An Estimable Consumption Model with Liquidity Constraints 56

4.1 The Model with Certain Lifetimes 56
4.2 Adaptation of the Model to the Case of Uncertain Lifetimes 59
4.3 The Detailed Econometric Specification 61
4.4 Comparative Dynamics 65
4.5 Uncertainty 68

5 The Data and Variable Definitions 72

5.1 Variable Definitions 73
5.2 The Sample Selection Criteria 85

6 The Econometric Methodology 87

6.1 The Stochastic Specification and the Estimation Procedure 87
6.2 The Estimation Algorithm 89
6.3 Statistical Inference 91
6.4 Errors in Variables and Varying Tastes 92

7 The Estimated Consumption Function and Its Interpretation 100

7.1 The Preferred Model 100
7.2 The Importance of Liquidity Constraints 109
7.3 The Model's Fit 115
7.4 Summary and Conclusion 130

8 Social Security, Intergenerational Transfers, and Consumption 132

8.1 The Model with Intergenerational Transfers 132
8.2 The Parameter Estimates 138
8.3 Evidence Relating Directly to Intergenerational Transfers 143
8.4 Summary and Conclusion 155

9 Liquidity Constraints and Preretirement Saving: A Simulation Approach 156

9.1 The Simulation Methodology 156
9.2 The Simulations 158
9.3 Summary and Conclusion 175

10 Temporary Taxes and Aggregate Consumption 177

10.1 Sample Estimates 177
10.2 Estimates for a Hypothetical Population 179
10.3 Summary and Conclusion 184

11 Life-Cycle Savings, Social Security, and Steady-State Capital Intensity: Theory and Simulations 186

11.1 The Steady-State Equilibrium 186
11.2 Social Security and Steady-State Factor Supplies 190
11.3 The Simulations 195
11.4 Summary and Conclusion 213

12 Summary and Conclusion 217

APPENDIXES

A The Intertemporal Utility Function 221

A.1 A General Model 221
A.2 Separability Assumptions and the Indirect Utility Function 222
A.3 Separability of Goods and Leisure 224
A.4 Temporal Separability 225

B The General Proofs of Propositions 2.1 and 2.2 227

B.1 The General Proof of Proposition 2.1—A Sketch 227
B.2 The General Proof of Proposition 2.2 228

C The Hall and Mishkin Study 229

D Consumption under Uncertainty 233

D.1 Labor-Income Uncertainty 233
D.2 Rate-of-Return Uncertainty 236

E Steady-State Life-Cycle Asset Supply and the Real Net Rate of Return 243
