# Contents

<i>Figures</i>	<i>page</i> xii
<i>Preface</i>	xvii
<b>1 Introduction</b>	<b>1</b>
1.1 The Research Perspective	2
1.1.1 Differences between NL Generation and NL Understanding	2
1.1.2 Sharing Knowledge between Generation and Understanding	3
1.2 The Applications Perspective	4
1.2.1 Computer as Authoring Aid	5
1.2.2 Computer as Author	6
1.2.3 Uses of NLG Technology	6
1.3 Some Example NLG Systems	7
1.3.1 WEATHERREPORTER	8
1.3.2 FOG	9
1.3.3 IDAS	12
1.3.4 MODELEXPLAINER	14
1.3.5 PEBA	15
1.3.6 STOP	16
1.4 A Short History of NLG	19
1.5 The Structure of This Book	20
1.6 Further Reading	21
<b>2 National Language Generation in Practice</b>	<b>23</b>
2.1 Introduction	23
2.2 When Are NLG Techniques Appropriate?	24
2.2.1 Text versus Graphics	25
2.2.2 Natural Language Generation versus Mail Merge	26
2.2.3 Natural Language Generation versus Human Authoring	28

2.3	Using a Corpus to Determine User Requirements	30
2.3.1	Assembling an Initial Corpus of Output Texts	31
2.3.2	Analysing the Information Content of Corpus Texts	33
2.3.3	Creating a Target Text Corpus	35
2.4	Evaluating NLG Systems	37
2.5	Fielding NLG Systems	38
2.6	Further Reading	40
<b>3</b>	<b>The Architecture of a Natural Language Generation System</b>	<b>41</b>
3.1	Introduction	41
3.2	The Inputs and Outputs of Natural Language Generation	42
3.2.1	Language as Goal-Driven Communication	42
3.2.2	The Inputs to Natural Language Generation	43
3.2.3	The Output of Natural Language Generation	46
3.3	An Informal Characterisation of the Architecture	47
3.3.1	An Overview of the Architecture	47
3.3.2	Content Determination	50
3.3.3	Document Structuring	51
3.3.4	Lexicalisation	52
3.3.5	Referring Expression Generation	55
3.3.6	Aggregation	56
3.3.7	Linguistic Realisation	57
3.3.8	Structure Realisation	59
3.4	The Architecture and Its Representations	59
3.4.1	Broad Structure and Terminology	59
3.4.2	Messages	61
3.4.3	The Document Planner	63
3.4.4	Document Plans	64
3.4.5	Microplanning	65
3.4.6	Text Specifications	66
3.4.7	Phrase Specifications	67
3.4.8	Surface Realisation	71
3.5	Other Architectures	72
3.5.1	Different Representations and Modularisations	72
3.5.2	Different Architectures: Integrated Systems	76
3.6	Further Reading	77
<b>4</b>	<b>Document Planning</b>	<b>79</b>
4.1	Introduction	79
4.1.1	What Document Planning Is About	79
4.1.2	The Inputs and Outputs of Document Planning	80
4.1.3	A WEATHERREPORTER Example	82
4.2	Representing Information in the Domain	83

4.2.1	What's in a Domain Model?	86
4.2.2	Domain Modelling for WEATHERREPORTER	87
4.2.3	Implementing Domain Models	88
4.2.4	Defining Messages	89
4.2.5	Determining the Degree of Abstraction in Messages	91
4.2.6	A Methodology for Domain Modelling and Message Definition	94
4.3	Content Determination	95
4.3.1	Aspects of Content Determination	96
4.3.2	Deriving Content Determination Rules	98
4.3.3	Implementing Content Determination	100
4.4	Document Structuring	101
4.4.1	Discourse Relations	102
4.4.2	Implementation: Schemas	104
4.4.3	Implementation: Bottom-up Techniques	107
4.4.4	A Comparison of Approaches	109
4.4.5	Knowledge Acquisition	110
4.5	Document Planner Architecture	110
4.6	Further Reading	112
<b>5</b>	<b>Microplanning</b>	<b>114</b>
5.1	Introduction	115
5.1.1	Why Do We Need Microplanning?	115
5.1.2	What's Involved in Microplanning?	116
5.1.3	The Inputs and Outputs of Microplanning	117
5.1.4	The Architecture of a Microplanner	122
5.2	Lexicalisation	124
5.2.1	Simple Lexicalisation	124
5.2.2	Simple Lexical Choice	126
5.2.3	Contextual and Pragmatic Influences on Lexical Choice	128
5.2.4	Expressing Discourse Relations	129
5.2.5	Fine-Grained Lexicalisation	130
5.3	Aggregation	132
5.3.1	Mechanisms for Sentence Formation	133
5.3.2	Choosing between Possible Aggregations	140
5.3.3	Order of Presentation	142
5.3.4	Paragraph Formation	143
5.4	Generating Referring Expressions	144
5.4.1	The Nature of the Problem	144
5.4.2	Forms of Referring Expressions and Their Uses	145
5.4.3	Requirements for Referring Expression Generation	146
5.4.4	Generating Pronouns	149
5.4.5	Generating Subsequent References	152

5.5	Limitations and Other Approaches	156
5.6	Further Reading	157
<b>6</b>	<b>Surface Realisation</b>	<b>159</b>
6.1	Introduction	159
6.2	Realising Text Specifications	162
6.3	Varieties of Phrase Specifications	164
6.3.1	Skeletal Propositions	165
6.3.2	Meaning Specifications	166
6.3.3	Lexicalised Case Frames	168
6.3.4	Abstract Syntactic Structures	168
6.3.5	Canned Text	169
6.3.6	Orthographic Strings	170
6.3.7	Summary	170
6.4	KPML	171
6.4.1	An Overview	171
6.4.2	The Input to KPML	171
6.4.3	Using Systemic Grammar for Linguistic Realisation	176
6.4.4	Summary	179
6.5	SURGE	179
6.5.1	An Overview	179
6.5.2	The Input to SURGE	180
6.5.3	Functional Unification Grammar	182
6.5.4	Linguistic Realisation via Unification	183
6.6	REALPRO	186
6.6.1	An Overview	186
6.6.2	The Input to REALPRO	187
6.6.3	Meaning-Text Theory	189
6.6.4	How REALPRO Works	190
6.6.5	Summary	191
6.7	Choosing a Realiser	192
6.8	Bidirectional Grammars	194
6.9	Further Reading	196
<b>7</b>	<b>Beyond Text Generation</b>	<b>198</b>
7.1	Introduction	198
7.2	Typography	201
7.2.1	The Uses of Typography	201
7.2.2	Typography in NLG Systems	203
7.2.3	Implementing Typographic Awareness	206
7.3	Integrating Text and Graphics	208
7.3.1	The Automatic Generation of Graphical Objects	209
7.3.2	Choosing a Medium	210

7.3.3	Commonalities between Text and Graphics	213
7.3.4	Implementing Text and Graphics Integration	214
7.4	Hypertext	216
7.4.1	Hypertext and Its Uses	216
7.4.2	Implementing Hypertext-based NLG Systems	219
7.5	Speech Output	221
7.5.1	The Benefits of Speech Output	221
7.5.2	Text-to-Speech Systems	222
7.5.3	Implementing Concept-to-Speech	225
7.6	Further Reading	227
<b>Appendix: NLG Systems Mentioned in This Book</b>		<b>229</b>
