SPECIAL RECOGNITION FROM RICHARD E. BISCHKE xxiii

**CHAPTER 1 INTRODUCTION TO SUBSURFACE
MAPPING 1**

TEXTBOOK OVERVIEW 1

THE PHILOSOPHICAL DOCTRINE OF SUBSURFACE MAPPING 3

TYPES OF SUBSURFACE MAPS AND CROSS SECTIONS 5

**CHAPTER 2 CONTOURING AND CONTOURING
TECHNIQUES 6**

INTRODUCTION 6

THREE-DIMENSIONAL PERSPECTIVE 7

RULES OF CONTOURING 10

METHODS OF CONTOURING 14

**CHAPTER 3 DIRECTIONALLY DRILLED WELLS
AND DIRECTIONAL SURVEYS 21**

INTRODUCTION 21

APPLICATION OF DIRECTIONALLY DRILLED WELLS 21

COMMON TYPES OF DIRECTIONALLY DRILLED WELLS 22

General Terminology 22

DIRECTIONAL WELL PLAN 24

DIRECTIONAL TOOLS USED FOR MEASUREMENTS 26

- Magnetic Surveys 26
- Nonmagnetic Surveys 26

DIRECTIONAL SURVEY CALCULATIONS 28**DIRECTIONAL SURVEY UNCERTAINTIES 30****DIRECTIONAL WELL PLOTS 36**

CHAPTER 4 LOG CORRELATION TECHNIQUES 37

INTRODUCTION 37

- General Log Measurement Terminology 37

**ELECTRIC LOG CORRELATION PROCEDURES
AND GUIDELINES 38****CORRELATION TYPE LOG 42****ELECTRIC LOG CORRELATION—VERTICAL WELLS 46**

- Log Correlation Plan 46
- Basic Concepts in Electric Log Correlation 48
- Faults Vs Variations in Stratigraphy 50
- Pitfalls in Vertical Well Log Correlation 54

**ELECTRIC LOG CORRELATION—DIRECTIONALLY DRILLED
WELLS 57**

- Log Correlation Plan 58
- Correlation of Vertical and Directionally Drilled Wells 61
- Estimating the Size of Faults 64
- MLT, TVDT, TVT, and TST 76

REPEATED SECTION 78

ESTIMATING RESTORED TOPS	83
Vertical Wells	84
Deviated Wells	85
UNCONFORMITIES	88
ANNOTATION AND DOCUMENTATION	93

**CHAPTER 5 INTEGRATION OF GEOPHYSICAL DATA
 IN SUBSURFACE MAPPING 94**

prepared by Clay Harmon

INTRODUCTION AND OVERVIEW	94
Discussion of Objectivity	94
Seismic Data Applied to Subsurface Interpretations	95
Assumptions and Limitations	96
THE PROCESS	97
DATA VALIDATION AND INTERPRETATION	98
Examining the Seismic Section	98
Concepts in Tying Seismic Data	105
Procedures in Tying Seismic Data	108
Mis-ties	115
DATA EXTRACTION	127
Picking and Posting	127
Converting Time to Depth	128
SOME FINAL THOUGHTS ON SEISMIC MAPPING	133

CHAPTER 6 CROSS SECTIONS 134

INTRODUCTION	134
PLANNING A CROSS SECTION	135
STRUCTURAL CROSS SECTIONS	135
Electric Log Sections	139
Stick Sections	141
STRATIGRAPHIC CROSS SECTIONS	142
PROBLEM-SOLVING CROSS SECTIONS	144
FINISHED ILLUSTRATION (SHOW) CROSS SECTIONS	146
CORRELATION SECTIONS	152
CROSS SECTION DESIGN	155
Extensional Structures	156
Diapiric Salt Structures	156
Compressional Structures	158
Wrench Fault Structures	160
VERTICAL EXAGGERATION	161
PROJECTION OF WELLS	165
Plunge Projection	165
Strike Projection	169
Other Types of Projections	172
Projection of Deviated Wells	172
Projecting a Well into a Seismic Line	174
CROSS SECTION CONSTRUCTION ACROSS FAULTS	177

THREE-DIMENSIONAL VIEWS	182
Log Maps	182
Fence Diagrams	182
Isometric Projections	187
Three-Dimensional Reservoir Analysis Model	187

CHAPTER 7 FAULT MAPS 195

INTRODUCTION	195
FAULT TERMINOLOGY	197
Definitions	198
DEFINITION OF FAULT DISPLACEMENT	199
MATHEMATICAL RELATIONSHIP OF THROW TO VERTICAL SEPARATION	200
Quantitative Relationship	202
FAULT DATA DETERMINED FROM WELL LOGS	203
FAULT SURFACE MAP CONSTRUCTION	206
Contouring Guidelines	209
Fault Surface Map Construction Techniques	210
TYPES OF FAULT PATTERNS	217
Extensional Faulting	217
Compressional Faulting	231
FAULT DATA DETERMINED FROM SEISMIC INFORMATION	243
Seismic and Well Log Data Integration—Fault Surface Map Construction	248
Seismic Pitfalls	251

GROWTH FAULTS	256
Estimating the Size of Growth Faults	257
Fault Surface Map Construction	262
EXPANSION INDEX FOR GROWTH FAULTS	265
DIRECTIONAL SURVEYS AND FAULT MAPS	270
Directional Well Pitfalls	275
Fault Maps, Directional Wells, and Repeated Sections	279
FAULT CUT SIZE—CORRECTION FACTOR AND DOCUMENTATION	279

CHAPTER 8 STRUCTURE MAPS 280

INTRODUCTION	280
GUIDELINES TO CONTOURING	282
SUMMARY OF THE METHODS OF CONTOURING	289
CONTOURING FAULTED SURFACES	292
Techniques for Contouring Across Faults	292
Error Analysis—Procedure for Checking Structure Maps	298
The Legitimate Contouring of Throw	301
FAULT AND STRUCTURE MAP INTEGRATION	304
Normal Faults	304
Reverse Faults	313
FAULT TRACES AND GAPS—SHORTCUTS AND PITFALLS	316
Rule of "45"	318
Tangent or Circle Method	318
New Circle Method	324
Equation to Determine Radius	325
Equation to Determine Heave	326
Fault Gap Vs Fault Heave	327

STRUCTURE MAP—GENERIC CASE STUDY	328
THE ADDITIVE PROPERTY OF FAULTS	331
INTEGRATION OF SEISMIC AND WELL DATA FOR STRUCTURE MAPPING	334
OTHER MAPPING TECHNIQUES	336
The Mapping of Unconformities	336
Mapping Across Vertical Faults	341
Structure Top Vs Porosity Top Mapping	342
Contour Compatibility—Closely Spaced Horizons	345
APPLICATION OF CONTOUR COMPATIBILITY ACROSS FAULTS	348
Exceptions to Contour Compatibility Across Faults	350
MAPPING TECHNIQUES FOR VARIOUS TECTONIC HABITATS	353
Extensional Tectonics	353
Diapiric Salt Tectonics	376
Wrench Fault Tectonics	386
Compressional Tectonics	389
REQUIREMENTS FOR A REASONABLE STRUCTURAL INTERPRETATION	397
Multiple Horizon Mapping	397

**CHAPTER 9 STRUCTURAL GEOMETRY
AND BALANCING 400**

INTRODUCTION 400

MECHANICAL STRATIGRAPHY 401

CLASSICAL BALANCING TECHNIQUES	403
Volume Accountability Rule	404
Area Accountability	404
Bed Length Consistency	405
Pin Lines	406
STRUCTURAL OUTLINE MAPPING (LONG WAVELENGTH DOMAIN MAPPING)	407
CROSS SECTION CONSISTENCY	408
CROSS SECTION CONSTRUCTION	411
Busking	412
Kink Method	414
DEPTH TO DETACHMENT CALCULATIONS	417
NONCLASSICAL METHODS	419
Introduction	419
Suppe's Postulates	420
Fault Bend Folds	421
Fault Propagation Folds	429
Imbricate Structures	433
Box and Lift-Off Structures	444
Triangle Zones and Wedge Structures	446
Interference Structures	447
A Strategy for Balancing Cross Sections	453
EXTENSIONAL STRUCTURES: BALANCING AND INTERPRETATION	454
Introduction	454
Compaction Effects Along Normal Faults	454
Inverting Fault Dips to Determine Sand/Shale Ratios	458
Origin of Rollover	461
Chevron Method (Vertical Breakup Theory)	464
Coulomb Collapse Theory	465
Origin of Synthetic, Antithetic, and Keystone Structures; and Downward Dying Growth Effects	472
Three-Dimensional Effects and Cross Structures	483

CHAPTER 10 ISOPACH MAPS 488

INTRODUCTION	488
SAND/SHALE DISTRIBUTION	492
BASIC CONSTRUCTION OF ISOPACH MAPS	493
Bottom Water Reservoir	493
Edge Water Reservoir	494
METHODS OF CONTOURING THE WEDGE ZONE	505
Limited Well Control or Evenly Distributed Shale	505
Walking Wells	506
VERTICAL THICKNESS DETERMINATIONS	513
The Impact of Correction Factors	518
VERTICAL THICKNESS AND FLUID CONTACTS IN DEVIATED WELLS	520
STRUCTURE TOP VS POROSITY TOP MAPPING	524
FAULT WEDGES	527
Conventional Method	528
Mid-Trace Method	529
CONFIGURATION OF A NET PAY ISOPACH MAP	535
RESERVOIR VOLUME DETERMINATIONS FROM ISOPACH MAPS	535
Horizontal Slice Method	535
Vertical Slice Method	539
Choice of Method	539

INTERVAL ISOPACH MAPS 540

Well Logs 540

When Is a Perpendicular Not a Perpendicular? 543

CHAPTER 11 FIELD STUDY METHODOLOGY 546

INTRODUCTION 546**BACKGROUND 547****FIELD STUDY METHODOLOGY 548**

Objectives 548

Phase I—Data Collection 548

Flow of Geologic and Geophysical Work 551

Flow of Engineering Work 553

ORGANIZATION OF A SYNERGISTIC STUDY TEAM 554

Manpower Requirements 555

*Geologist 556**Petroleum engineer 558**Development geophysicist 560**Technical support 561*

Computer Requirements 561

INTRODUCTORY RESERVOIR ENGINEERING 562

Reservoir Characterization 563

Estimate of Reserves 563

Field Production History 565

CASE HISTORY 565**SUMMARY OF FIELD STUDY 566****INTRODUCTION 567****FIELD DEVELOPMENT AND HISTORY 568**

FIELD STUDY METHODOLOGY	571
Objectives	571
Data Collection, Cataloging, and Generation of Data Files	571
Flow of Work—Geologic	572
Flow of Work—Engineering	583
VOLUMETRIC ANALYSIS—GENERAL VOLUMETRIC PARAMETERS	583
Formation Temperature Analysis	585
Determination of Formation Properties	586
Determination of Oil Zone Parameters	586
Determination of Gas Zone Parameters	588
PERFORMANCE ANALYSIS	590
GENERAL OVERVIEW OF GOLDEN MEADOW GEOLOGY	592
Structural Geology	592
Stratigraphy of the Field	593
RESERVES	601
Reserves Determination	604
Reservoir Packets	604
Cumulative Production, Estimated Reserves, and Ultimate Recovery	604
DEVELOPMENT AND EXPLORATORY PROSPECTS	604
Prospect Presentation	606
CONCLUSION	621
APPENDIX	622
