

Geotechnical Measurements and Modelling

Leihgabe der
Senckenberg Gesellschaft
für Naturforschung

Edited by

O. Natau

Institute of Soil Mechanics and Rock Mechanics, University of Karlsruhe, Germany

E. Fecker

Geotechnisches Ingenieurbüro Prof. Fecker & Partner Gml H, Ettlingen, Germany

E. Pimentel

Institute of Soil Mechanics and Rock Mechanics, University of Karlsruhe, Germany

Table of Contents

Geotechnical measurements and modelling in underground openings

Tunnelling in Germany: State of the art – Tunnel driving methods (English) <i>M. Nußbaumer & U. Hartwig</i>	3
Tunnelbau in Deutschland: Stand der Technik – Vortriebsverfahren (German) <i>M. Nußbaumer & U. Hartwig</i>	19
Innovations in geotechnical on-site engineering for tunnels <i>W. Schubert & G.M. Vavrovsky</i>	35
Die Anwendung der Beobachtungsmethode bei Planung und Ausführung; am Beispiel des Tunnels Denkendorf <i>R. Floss, A. Bauer, H. Quick & Th. May</i>	45
Belastungsmodelle von Tunnelausbauten auf der Basis von Spannungsmessungen <i>B. Fröhlich</i>	53
JointMetriX3D – Measurement of structural rock mass parameters <i>A. Gaich, A. Fasching & W. Schubert</i>	59
Uetlibergtunnel/Zürich – Geotechnische Modellierung zur Auswahl des Vortriebsverfahrens in den Lockergesteinstrecken und deren Erfahrungen <i>H. Hagedorn & Th. Eppler</i>	65
The role of time in NATM <i>D. Kolymbas</i>	73
Mechanism of swelling tunnels driven through mudstone <i>R. Nakano</i>	79
Approach of field tests and adjacent site investigations to improve the geotechnical site model and design of dams and underground structures <i>V. Schenk</i>	87
Monitoring of Metro Line C construction in Prague <i>V. Veselý, K. Kolesa & R. Bucek</i>	95
Influence of the zero reading time and position on geodetical measurements <i>G.M. Volkmann, E.A. Button & W. Schubert</i>	101
Rock mass – Pipe roof support interaction measured by chain inclinometers at the Birgl tunnel <i>G.M. Volkmann</i>	105
3D numerical analysis of deep tunnel through short weak zone <i>W. Wu, S. Malla, J. Kaelin & D. Fellner</i>	111
Ensuring behavioural requirements of tunnelling through natural and man-made ground by employing the Observational Method <i>M.K. Zacas, V.O. Vandolas, N.A. Rahaniotis & K. Tzima</i>	117

Geotechnical measurements and modelling in underground waste disposals

Development of an excavation disturbed zone in claystone (Opalinus Clay) <i>P. Blümling & H. Konietzky</i>	127
---	-----

Partial backfilling effect in underground mines <i>T. Collet, F. Masrouri & C. Didier</i>	133
Initial rock stress in the Gorleben salt dome measured during shaft sinking <i>S. Heusermann, R. Eickemeier, K.-H. Sprado & F.-J. Hoppe</i>	139
The geomechanical influence of insolubles in solution mining for mining layout in Alpine salt rock <i>G. Pittino</i>	145
Modelling of flow and transport phenomena in a granitic fracture <i>A. Pudewills</i>	155
Geophysical methods as one way to detect and assess sources of danger in engineering and mining <i>H. Thoma, U. Lindner, O. Klippel & Th. Schicht</i>	161

Geotechnical measurements and modelling in slope engineering and retaining structures

Visco-hypoplasticity and observational method for soft ground <i>G. Gudehus</i>	169
Numerical analysis of block movements at the Spis Castle <i>L. Baskova & J. Vlcko</i>	181
Weak rocks in engineering practice <i>T. Durmeková, R. Holzer & P. Wagner</i>	185
Mass movements in the central-southern Marches monoclinial relief (Central Italy): 3D modelling of the Montegiorgio landslide <i>B. Gentili, G. Pambianchi, N. Sciarra & F. Pallotta</i>	193
Experiences about the behavior of stress in a brown coal pit <i>R. Glözl & J. Krywult</i>	199
Investigation and remediation of the leaking areas in the large navigation locks <i>J. Hulla, P. Slašt'an & J. Hummel</i>	205
Measurements of the deformations of a high retaining structure <i>N. Meyer, F. Bussert & H. Obermeyer</i>	211
Geotechnical measurements for the assessment of the kinematic and long-term behaviour of unstable mountainsides <i>M. Moser</i>	217
A multidisciplinary integrated approach to geological and numerical modelling of the Lodrone landslide (Oriental Alps, Trentino Region, Italy) <i>M.L. Rainone & N. Sciarra</i>	225
Monitoring and physical model simulation of a complex slope deformation in neovolcanics <i>J. Rybář & B. Košťák</i>	231
Time settlement behaviour of a ship lock with a flat foundation <i>T. Schanz & D. Alberts</i>	239
Increasing safety of unstable slopes by unconventional pore pressure release technique <i>R. Schulze & H.J. Köhler</i>	245

Risk assessment and management

Numerical simulation of sinkhole formation using the UDEC computer code: influence of horizontal stress <i>A. Abbass Fayad, M. Al Heib, Ch. Didier & Th. Verdel</i>	255
--	-----

Development and use of knowledge-based systems for risk assessment in geotechnical engineering <i>J.U. Döbbelin</i>	261
Risk management during construction of the Gotthard Base Tunnel <i>H. Ehrbar & J. Kellenberger</i>	267
The usage of the multi-task learning concept in landslide recognition with artificial neural nets <i>T.M. Fernández-Steeger, J. Rohn & K. Czurda</i>	273
Rock cleaning along Bavaria's road network <i>P. Jirovec</i>	279
Field intensity measurements of erosion instability in flysch deposits in Istria, Croatia <i>V. Jurak, D. Aljinović, J. Petraš & D. Gajski</i>	283
Better understanding of field measurements by means of Data Mining <i>A. Prokhorova & M. Ziegler</i>	291
Adaptive ground modelling in geotechnical engineering <i>M. Schönhardt & K.J. Witt</i>	297
Safety analysis in geotechnical engineering by means of risk simulations <i>M. Ziegler</i>	307

New technologies for laboratory and field tests

The use of a relative humidity sensor for suction measurement of compacted bentonite-sand mixtures <i>S.S. Agus & T. Schanz</i>	315
A solution to concurrent measurement of the normal and tangential earth pressure in model tests <i>M. Arnold, D. Franke & U. Bartl</i>	321
Direct shear testing system <i>M. Blümel & M. Pötsch</i>	327
An experimental method to avoid temperature bias on instrumentation measurements <i>M. Ceccucci, M. Ferrari & A. Roasio</i>	333
A modular triaxial testing device for unsaturated soils <i>J. Engel, C. Lauer & M. Pietsch</i>	341
Long-term monitoring of 4500 kN rock anchors in the Eder gravity dam using fibre-optic sensors <i>W.R. Habel</i>	347
Stress measurements in salt mines using a special hydraulic fracturing borehole tool <i>G. Manthei, J. Eisenblätter & P. Kamlot</i>	355
Experimental and model studies on the Modified Tension Test (MTT) – a new and simple testing method for direct tension tests <i>R.J. Plinninger, K. Wolski, G. Spaun, B. Thomée & K. Schikora</i>	361
Swelling behaviour of sedimentary rocks under consideration of micromechanical aspects and its consequences on structure design <i>E. Pimentel</i>	367
Presentation of a new soil investigation technique: the in situ triaxial test <i>Ph. Reiffsteck & G. Reverdy</i>	375
Resonant column tests with cohesive and non-cohesive granular materials <i>S. Richter & G. Huber</i>	381

Water percolation inducing micro-seismicity: evidences from small scale in-situ experiment <i>V. Saetta, D. Amitrano, G. Senfaute & Y. Guglielmi</i>	389
Measurement of the spatially distributed water content in geotechnics <i>A. Scheuermann, A. Bieberstein, R. Becker, W. Schädel, S. Schlaeger, R. Nüesch, C. Hübner & R. Schuhmann</i>	395
Fiber optic sensor systems for static and dynamic strain measurements of geotechnical structures <i>C. Schmidt-Hattenberger, M. Naumann & G. Borm</i>	401
Laboratory swell tests on overconsolidated clay and diagenetic solidified clay rocks <i>P.-A. von Wolffersdorff & S. Fritzsche</i>	407
Damage evolution during uniaxial compressive tests evaluated by acoustic emission monitoring <i>J. Wassermann, D. Amitrano, G. Senfaute & F. Homand</i>	413
Assessment of a loading test on highly sensitive deformable soil <i>M.M. Zimmerer, M.D. Datcheva & T. Schanz</i>	419
 <i>Recent developments in modelling (Workshop)</i>	
A non-local elasto-plastic model to simulate localizations of deformations in quasi-brittle materials <i>J. Bobinski & J. Tejchman</i>	429
Intermediate soils for physical modelling <i>K. Boussaïd, V. Ferber, J. Garnier & L. Thorel</i>	435
Experimental and numerical investigation of the influence of local site conditions on the ground motion during strong earthquakes <i>M.M. Bühler, R. Cudmani, V.A. Osinov, A.B. Libreros-Bertini & G. Gudehus</i>	441
New approaches in modelling recent subsrosion processes <i>W. Busch, C. Hanusch, St. Knospe & K. Maas</i>	451
Modelling of soil behaviour <i>J. Fedá</i>	457
Speed of elastic waves in inhomogeneous media with initial stresses <i>A.G. Kolpakov</i>	461
Testing and modelling the ductility of buried jetgrout structures <i>P. Kudella, P.M. Mayer & G. Möller</i>	467
A numerical model for the site response analysis and liquefaction of soil during earthquakes <i>V.A. Osinov</i>	475
A database for the performance of numerical modelling of retaining wall <i>Y. Riou, Ph. Mestat, P. Kudella & P. von Wolffersdorff</i>	483
Stability of deep wellbores in mobile saliferous layers <i>S. Rübel, E. Kunz & O. Natau</i>	489
Effect of cyclic deformations on the evolution of localizations in granular bodies <i>J. Tejchman</i>	493
 <i>Author index</i>	 499
