CONTENTS

Preface	XIII
Introduction	XV
PART I THEORY AND METHODS	
1 Evaluating communicative planning	3
Andreas Faludi and Willem Korthals Altes	
1.1 Introduction	3
1.2 The purpose of planning	4
1.3 The quality of decisions	7
1.4 Communication	9
1.5 Conformance versus performance	12
1.6 Conclusions	17
2 On the role of will-shaping in planning evaluation	23
Henk Voogd	
2.1 Introduction	23
2.2 Characteristics of planning evaluation	24
2.3 Some theoretical observations	25
2.4 Structuring the evaluation process	27
2.5 Some concluding remarks	30
3 Integrating environmental assessment with development planning	35
Nathaniel Lichfield	
3.1 Focus	35
3.2 Evolution of impact assessment on projects to plans, policies and programmes	36
3.3 Methodology of SEA	37
3.4 Role of evaluation in the planning process	38
3.5 Strategic environmental assessment and strategic plan evaluation	41

4 Evaluation in environmental conservation planning 45

Luigi Fusco Girard

4.1	Introduction	45
4.2	Valorization and Market	46
4.3	Environmental resources evaluation	47
4.4	The different economic values of environmental/cultural resources	49
4.5	Evaluation in the strategies for public/private conflict resolution	50
4.6	Multicriteria evaluation in conflict solving	52
4.7	Conclusions	53

5 Evaluating sustainability: three paradigms 57

Silvia Macchi and Enzo Scandurra

5.1	From unlimited growth to sustainable development	57
5.2	The culture of evaluation	59

6 Ecology, landscape ecology, environmental evaluation and planning 67

Vittorio Ingegnoli

6.1	Introduction	67
6.2	Environment and planning in Italy: a historical perspective	68
6.3	Some principle of advanced ecology	69
6.4	Consequences of ecological theory on environmental evaluation and planning	70
6.5	Obstacles to scientific information in planning processes	73
6.6	Ecological applications: some new indexes, available also for planning	75

PART II PRACTICE

7 Beyond dialogue to transformative learning: how deliberative rituals encourage political judgment in community planning processes 81

John Forester

7.1	Introduction	81
7.2	Two powerful models that help, but don't help enough: beyond understanding and dialogue to practical transformation	82
7.3	The importance of messiness: letting the details surprise and teach us	83
7.4	Letting stories supplement our limited rationality: reminding ourselves via ritual performance	85
7.5	Learning about value in ritualized story-telling processes	87

CONTENTS	IX
7.6 Transforming relationships and identities	87
7.7 Transforming issues and agendas	88
7.8 Transforming ends: what's at stake	88
7.9 The ritual structuring of unpredictability as the ground for learning, or decision-making when interests, parties and priorities are changing	89
7.10 From garbage cans to transformative rituals	90
7.11 Learning from structured complexity: rituals as aids to dialogic and deliberative rationality	93
7.12 Acknowledging others: encouraging a politically deliberative community	95
7.13 Conclusion: the significance of ritual in participatory and deliberative settings	96
8 Assessing the political dimension of structure planning process	105
Abdul Khakee	
8.1 Introduction	105
8.2 The political nature of the structure plan	106
8.3 Theoretical premises	107
8.4 Empirical analysis	109
8.5 Politics of planning	110
8.6 Concluding reflections	114
9 Evaluation of qualities in spatial planning processes	117
Riccardo Roscelli	
9.1 Plan as a process of change	117
9.2 Evaluation procedures	119
9.3 Concluding remarks	121
10 Problems of urban land-use and transportation planning: cognition and evaluation models	123
Angela Barbanente, Dino Borri and Valeria Monno	
10.1 Introduction	123
10.2 Sustainability and transport planning	123
10.3 Land use and transportation planning: seeking an environmental-oriented integration	127
10.4 Expert cognitive models for managing land-use environment conflicts in transportation problems	131
10.5 Conclusions	135

**11 Criteria for choice and evaluation procedures:
the case of urban transport infrastructures 141**

Donato Caiulo, Francesca Pace and Francesco Selicato

11.1	Introduction	141
11.2	North-south arterial road in Bari	141
11.3	Brindisi: the Pittachi Road	144
11.4	From decision taking to realization: comparison of the two cases	146
11.5	Evaluation procedures	149
11.6	Conclusions	150

**PART III ENVIRONMENTAL POLICIES AND URBAN RURAL
INTERPLAY**

**12 Environmental considerations in minerals planning:
theory versus practice 157**

Simin Davoudi

12.1	Introduction	157
12.2	Environmentalism and planning, a historical perspective	157
12.3	Development plans and sustainable development	159
12.4	Minerals planning	160
12.5	Conclusion	163

**13 Operationalizing environmental considerations in the
British planning system 167**

Patsy Healey and Tim Shaw

13.1	Introduction	167
13.2	The planning system, plans and environment	168
13.3	The contemporary environmental agenda: sustainable development and ecological modernisation	169
13.4	Environmental sustainability and planning debate	172
13.5	The treatment of "environment" in development plans: 1940s - 1990s	174
13.6	Environment, economy and planning	183
13.7	"Entrenching" environmental sustainability conceptions within the planning system	184

14	Landscape evaluation and planning in the Veneto region	193
Giorgio Franceschetti and Tiziano Tempesta		
14.1	Introduction	193
14.2	Individual preferences and public aims of protecting the landscape	194
14.3	The effects of landscape protection on real-estate values: the case of the Colli Euganei Regional Park	197
14.4	Conclusion	205
15	Evaluating functions in urban-rural areas	209
Giovanna De Fano and Giovanni Grittani		
15.1	Introduction	209
15.2	The functions of peripheral farming	209
14.3	The evaluation approach	210
15.4	Conclusions	213
16	A method for the evaluation of a large area: the case of central Apulia system	217
Sebastiano Carbonara		
16.1	Conceptual framework of the analysis	217
16.2	The analysis phase to date	220
16.3	Identified sub-areas and indicators	225
16.4	The evaluative assumption	227
17	Planning in urbanized areas under natural risk	231
Francesco Gentile, Fabio Milillo and Giuliana Trisorio-Liuzzi		
17.1	Preliminary remarks	231
17.2	Criteria for the inclusion in planning schemes of areas subject to risk generated by natural phenomena	237
17.3	Conclusions	244
