## CONTENTS

| Pref   | reface<br>troduction  |     |
|--|---|-----|
| Intr   |   |     |
| PART ONE. SERPENTINE AS A MODEL IN EARTH HISTORY AND EVOLUTION |   |     |
| 1.   | Serpentinites and Other Ultramafic Rocks: Why They Are<br>Important for Earth's History and Possibly for Its Future | 3   |
| 2.   | Microbes in Extreme Environments: Implications for<br>Life on the Early Earth and Other Planets                     | 29  |
| 3.   | Phylogenetic Patterns of Endemism and Diversity   | 49  |
| 4.   | Plant Speciation  | 71  |
| 5.   | Intraspecific Variation, Adaptation, and Evolution  | 97  |
| 6.   | Genomic Approaches to Understanding Adaptation  | 139 |
| 7.   | Local Adaptation in Heterogeneous Landscapes:<br>Reciprocal Transplant Experiments and Beyond                       | 155 |
| 8.   | Herbivory and Other Cross-Kingdom Interactions on Harsh Soils   | 181 |
| 9.   | Invasions and the Evolution of Range Limits   | 201 |

## PART TWO. SERPENTINE AS A MODEL IN ECOLOGY AND CONSERVATION

| 10.                   | Plant Competition and Facilitation in Systems with<br>Strong Environmental Gradients                            | 223 |  |
|-----------------------|---|-----|--|
| 11.                   | Community Invasibility: Spatial Heterogeneity, Spatial Scale, and Productivity                                  | 237 |  |
| 12.                   | Disturbance and Diversity in Low-Productivity Ecosystems  | 249 |  |
| 13.                   | Plant-Pollinator Interactions in Naturally Fragmented Habitats  | 275 |  |
| 14.                   | Spatial Ecology: The Effects of Habitat Patch Size, Shape, and Isolation on Ecological Processes                | 297 |  |
| 15.                   | Systematic Conservation Planning: Protecting Rarity,<br>Representation, and Connectivity in Regional Landscapes | 309 |  |
| 16.                   | Biodiversity, Ecosystem Functioning, and Global Change  | 329 |  |
| 17.                   | Climate Change and Plant Communities on Unusual Soils   | 359 |  |
| 18.                   | Restoration and Revegetation of Harsh Soils   | 383 |  |
| PART THREE. SYNTHESIS |   |     |  |
| 19.                   | What Have We Learned from Serpentine in Evolution, Ecology, and Other Sciences?                                 | 417 |  |
| Species Index         |   | 429 |  |
