Foreword by G. Edward Schuh *xxv*

Preface *xxvii*

List of Abbreviations *xxxii*

**1 Introduction: Social Learning, Development Goals, and Political Systems 1**

Agricultural Development in the Perspective of World History 2 ?

Development as Social Learning: Increasing Control over Technological, Institutional, Economic, and Social Variables 4

The Goals of Development 5 ✓

Political Systems and Agricultural Development 6

Important Concepts 6

Sample Questions 7

**I Agricultural Progress and Structural Transformation in Less Developed Nations**

Introduction to Part I 11

**2 Population, Resources, and Agricultural Development 13**

Population Growth 13

The Malthusian Model 13

The Demographic Transition Model 14

Prospects for Population Growth 16

Physical Resources for Agriculture in Less Developed Nations 18

Climate, Water, Soils, and Biological Environment 18

Arable Land Availability 19

Size of the Farming Unit 21

Implications of Physical Resources for Agricultural Development 21

Growth and Declines in Food and Agricultural Production	21
The Demand and Supply Framework	21
Real and Nominal Price and Income Changes	23
Total and per Capita Food and Agricultural Production	24
Food Grain Prices, Stocks, and Trade	26
The Gradually Declining Real Cost of Food Grains	26
Comfortable Levels of World Cereal Stocks	26
Historic Increases in Grain Exports from More Developed Nations	27
Summary and Conclusions	28
Important Concepts	29
Sample Questions	29

### 3 The Role of Agriculture in Economic Development 31

Development: Its Meaning and Measurement	31
Meanings of Development	31
Measures of Economic Growth	32
Measures of Development	33
Growth and Variability in World Income	36
Per Capita Income and National Economic Growth	36
World Concentration of Income and Human Productivity	37
Inequality in Personal Income Distribution	38
Changing Consumer Demand and Income Growth	41
Gradual Growth of Personal Savings	41
Patterns of Consumption with Economic Growth	41
Nutritional Need and the Economic Demand for Food	43
The Growing Demand for Food and Agricultural Products	46
The Rate of Population Growth and Food Demand	46
Effect of Income on Food Demand	47
Rate of Growth in Food Demand	48
The Structural Transformation of Less Developed Economies	49
Measurement of Changes in Economic Structure	49
Forces Causing Changes in Economic Structure	49
Increasing Functional Specialization and Uneven Regional Growth	50
The Role of Agriculture in Economic Development	52
Contributions of Agriculture to Other Sectors	53
Contributions of Other Sectors to Agriculture	53
Important Concepts	53
Sample Questions	54

## II The Economic and Social Theory of Agricultural Development

Introduction to Part II	57
-------------------------	----

<b>4</b>	<b>Economics of Traditional Agriculture</b>	<b>59</b>
	Traditional Agriculture: Definitions and Hypotheses	59
	What Is Traditional Agriculture?	60
	The Importance of the Study of Low-Income Farming Areas	61
	Five Hypotheses About the Economics of Traditional Agriculture	61
	Empirical Findings About Traditional Agriculture	62
	The Productivity of Land, Livestock, and Labor	63
	The Price Responsiveness of Traditional Farmers	65
	Productivity and Farm Size	67
	Uncertainty and Variability in Traditional Agriculture	69
	The Economic Equilibrium Model of Traditional Agriculture	70
	Little Change in Technological, Institutional, Economic, and Cultural Variables	70
	Equilibrium in Supply and Demand	72
	Efficient Allocation of Resources by Traditional Farmers	73
	Low Return on Investment in Traditional Agriculture	77
	Growth in Traditional Agriculture	79
	The Neoclassical Model of Economic Growth	79
	Greater Use of Traditional Agricultural Inputs	79
	Program Failures, Economic Theory, and Agricultural Development Strategies	82
	Development Program Failure Due to Wrong Theory	82
	The Implications for Development Strategy	83
	Conclusions	84
	Important Concepts	85
	Sample Questions	85
<b>5</b>	<b>Theories of Socioeconomic Change, Cultural Variables, and Agricultural Growth</b>	<b>88</b>
	Social System Change and Agricultural Development	88
	Introduction and Objectives	88
	Pecuniary Variables Insufficient to Explain Economic Actions	90
	Theories of Socioeconomic Development	91
	Evolutionary Modernization Theories	92
	Conflict and Marxist Theories	97
	Cultural Variables and Agricultural Development	99
	The Components of Cultural Systems	99
	Institutions, Organizations, and Change	100
	Institutions and Agricultural Development	102
	Institutions and Economic Behavior	103
	Organizations and Institutions in Agriculture	107
	Conclusions	109
	Important Concepts	111
	Sample Questions	111

**6 Agricultural Development Theory 113**

**Introduction 113**

The Value of Economic Theory for Practitioners 113

Investment Concepts 114

Classical and Modern Agricultural Production Functions 117

**Partial Theories of Economic and Agricultural Development 119**

The Conservation Model 119

The Industrial Fundamentalism Model 121

The Urban-Industrial Impact Model 123

The Diffusion Model 123

The Cultural-Change-First Model and the Community Development Movement 125

The Neo-Marxist and Dependency Models 127

Growth-Stage Theories 130

The Schultz High-Payoff Input Model 132

**The Induced Innovation Model of Agricultural Development 134**

The Four Elements of the Induced Innovation Model 135

The Central Concepts of Induced Technological Innovation 136

Induced Institutional Innovation 143

Induced Innovation in the Public Sector 146

Criticisms and Conclusions About the Induced Innovation Model 148

**Income Distribution and Agricultural Development 151**

Economic and Social Theory of Personal Income Distribution 151

Four Economic Factors That Influence Income Equity 152

Government Strategies to Reduce Income Disparities 158

**Important Concepts 159**

**Sample Questions 160**

**7 Land Expansion and Labor Supply 161**

**Introduction 161**

**Land in Agricultural Development 163**

Economic Evaluation of Land Development 164

Higher Returns to Investment in Currently Farmed Land 167

New Land Development and Technological, Institutional, and Economic Change 167

Alternative Arrangements for Investment in New Land 169

Criteria and Policies for Land Development 175

**Labor in Agricultural Development 175**

Economics of Household Labor Allocation 176

Female Labor in Agricultural Development 178

Labor Supply 182

Labor Demand 185

Labor Productivity, Employment, and Wages 190

Policies for Increased Employment, Productivity, and Equity 194

Important Concepts 195

Sample Questions 195

### **III Sources of Accelerated Change in Agriculture: Investment in Technology, Institutions, and Human Capital**

Introduction to Part III 199

#### **8 Economics of Change in Biological and Chemical Technologies 203**

Increasing Crop Productivity on Currently Farmed Lands 203

Guidelines from Economic Theory 204

Large Shifts to More Productive Inputs 206

Economics of the Seed and Fertilizer (Green) Revolution 207

Farm Level Effects 207

National Effects 209

Future Prospects 211

Demand for Other Complementary Inputs 216

Increasing Animal Productivity 219

Characteristics of Animal Production in Less Developed Nations 219

Limited Increases in Animal Productivity 221

Strategies for Increasing Animal Productivity 222

Conclusions 223

Important Concepts 224

Sample Questions 224

#### **9 Economics of Change in Mechanical Technologies 226**

Introduction 226

Agricultural Mechanization in Less Developed Nations 226

The Isoquant Framework for Analyzing the Economics of Mechanization 227

New Hand Tools for Agriculture 230

Animal-Powered Mechanization 231

Increasing the Productivity of Animal-Powered Mechanization 232

Introducing Animal Power in New Areas 232

Stationary and Wheeled Motorized Power 234

Stationary and Hand-Carried Motorized Machinery 234

Tractor-Powered Machinery 235

Irrigation and Drainage 239

The Importance and Potential of Irrigation 239

Large Gravity-Flow and Pump Irrigation Projects 240

Economic Issues in Managing and Servicing Agricultural Machinery 242

Policy Issues in Agricultural Mechanization 243

Research, Development, and Supply	245
Import Controls, Taxes, and Subsidies	246
Employment and Income Distribution	247
Important Concepts	247
Sample Questions	247
10 Economics of Change in Institutions	249
Institutional Change, Technology, and the Role of the Social Sciences	250
The Role of Governing Institutions	250
Externalities	250
Technology and Institutional Change	251
The Social Sciences and Institutional Change	251
Improving Rural Financial Markets and Farm Credit	252
The Expanding Demand for Financial Services	253
Empirical Studies of Rural Financial Markets	254
Augmenting the Supply of Savings and Credit	260
Policies for Improved Rural Financial Markets	263
Cooperative Institutions and Agricultural Development	265
The Principles of Member-Controlled Cooperatives	266
The Example of the Comilla Village Cooperatives	267
Cooperatives and Development	268
Changes in Rights to the Use of Land: Land Reforms, Collective Farming, and Communes	269
The Wide Range of Landholding Arrangements	270
The Great Variability in Farm Size, Tenancy, and Landlessness	272
Land Reform, Tenure Reform, and Agricultural Productivity	274
Experiences with Agrarian Reform Programs	277
Conclusions About Changes in Landholding Arrangements	282
Important Concepts	283
Sample Questions	283
11 Investing in Research, Education, Extension, and Communications	285
The History of Agricultural Productivity Growth	286
Slow Increases in Agricultural Productivity in Human History	286
The Transition to a Science-Based Agriculture	289
High Total Agricultural Productivity Growth Rates in More Developed Nations	290
Accelerating Agricultural Research in Less Developed Nations	291
The Complexity of Technological and Socioeconomic Constraints	292
The Agricultural Research Gap	292
Economics of the Demand and Supply of Agricultural Research	295
The Dependency of Research Demand upon Expected Returns	296
High Social Returns of Much Agricultural Research	296

Demand for Social Science Knowledge	297
Price Elasticity of Agricultural Products and the Demand for Research	298
Increasing the Supply of Agricultural and Institutional Research and Technology Transfer	300
Future Prospects for Agricultural Research: The New Genetics and Other Breakthroughs	306
School Education for Increased Agricultural Productivity	308
Education as an Investment in Human Capital	308
The Demand for School Education	309
Supplying School Education for Agricultural Development	311
Agricultural Extension, Nonformal Education, and Communication Investments	313
Demand and Supply of Nonformal Education	313
Returns to Investment in Nonformal Education	314
Agricultural Extension: Problems and a Model	315
Economics of Communication Services	316
Complementarities and Substitutions in Agricultural Research, Education, and Communication Investments	317
Important Concepts	318
Sample Questions	318

## **IV National Policies and Programs for Agricultural Development**

### **Introduction to Part IV 323**

12 Transforming Traditional Agricultural Marketing	325
Marketing Problems, Functions, and Models	325
Marketing Problems	325
The Economic Functions of Marketing	326
Marketing Models	327
Marketing and Economic Growth	331
Factors Causing Growth in Marketing	331
The Role of Marketing in Development	334
Evaluating Market System Performance	336
Limitations of the Perfect Competition Model of Marketing	336
The Environment-Behavior-Performance Model	336
Facilitating Agricultural Input Marketing	338
Biological Inputs	339
Chemical Inputs	340
Mechanical Inputs	343
Aiding Agricultural Product Marketing	346
Increasing Marketing Performance	346
Increasing the Productivity of Urban Food Marketing	349
Government Roles and Policies to Increase Marketing Performance	352

Institutional Arrangements for Market Intervention 352

Activities to Increase Marketing Performance 354

Summary 358

Important Concepts 359

Sample Questions 359

**13 Changing Comparative Advantage and Trade Policies in Agricultural Development 360**

The Role of Trade in Agricultural Development 361

The Theory of Comparative Advantage 362

Changing Comparative Advantage 366

The Trade Experiences and Opportunities of Less Developed Countries 368

The Changing Structure of Trade 368

Shares of Different Products in Less Developed Countries' Agricultural Exports and Imports 369

Conditions Under Which International Trade Contributes to Economic Growth 371

Managing Agricultural Input and Product Trade 373

Import Substitution 373

Balance of Payments Controls 374

Inflation Controls 374

Government Revenues 375

Measures for Trade Intervention 375

Price Measures 375

Nonprice Measures 376

Economics of Trade Intervention 377

Arguments Against Trade Intervention 377

Arguments for Trade Intervention 378

Alternative Trade Strategies for Economic and Agricultural Development 382

Important Concepts 382

Sample Questions 383

**14 Price Policies and Planning for Agricultural Development 384**

The Role of Government in Planning for Agricultural Development 384

Introduction 384

The Economic Functions of Markets and Prices 385

The Causes and Range of Government Intervention 386

Private and Social Valuation and the Role of Government 386

The Range of Government Intervention 388

The Role of Agricultural Prices in Economic Development 389

Methods of Agricultural Price Intervention 392

The Objectives of Pricing Policy 392

The Instruments of Price Intervention	393
The Effects of Price Interventions on Agricultural Development	401
Conclusions	402
Important Concepts	403
Sample Questions	403

## **V Accelerating Agricultural Development**

Introduction to Part V	407
------------------------	-----

### **15 Agricultural Development Strategies 409**

Accelerating the Economic and Social Transformation of Agriculture	410
The Need for a National Consensus on the Goals of Development	411
The Importance of Understanding How Economic and Social Systems Can Be Changed	412
The Central Role of Agriculture in Economic Growth	413
The Government as Facilitator of Development	413
Core Strategic Elements for Rapid Growth in Agriculture	415
Investment in High-Return Activities	415
Investment in Applied Research	415
Investment in Human Capital	416
Complementarity Among Investments	417
Domestic Prices that Reflect Resource Costs	418
Maximizing the Limited Contributions of International Aid	418
Moderating Undesirable Income Distribution Effects	419
Enhancing Government Performance	421
Three Strategies for Agricultural Development	422
The High-Payoff Input Strategy	422
The Improved-Income-Distribution-with-Growth Strategy	423
The Regional, Total-Resource-Focused Strategy	423
Summary	425
The Different Paths of Agricultural Development in the Twenty-first Century	425
Important Concepts	426
Sample Questions	427
