<i>List of tables</i>	8
<i>List of figures</i>	10
<i>Preface</i>	11
1 Introduction	13
Part One: Orientation	
2 Defining development	35
Development as economic growth – Development as modernization – Development as distributive justice – Development as socio-economic transformation – The nature of underdevelopment	
3 Geographic space and development	51
Space as part of socio-economic formation – Defining spatial structure – Elements of spatial organization – Development as spatial reorganization	
Part Two: Rural Development	
4 Collapse of traditional rural structures	71
Traditional rural structures in Africa – The impact of colonial exploitation – Effects on the traditional rural structure – Post-colonial aggravation of rural conditions	
5 The nature of rural development	94
A critique of rural development projects – The nature of rural spatial reorganization – Social relations in spatial reorganization	

6 Contents

6 Strategy of rural development

118

Conceptual basis for the strategy of the 'big push' – Empirical evidence: Britain, United States, Soviet Union, China, Tanzania

Part Three: Urban Development

7 Emergent urbanization

151

Typology of colonial urbanization – Colonial impact on the traditional urban economy – Post-colonial urbanization and import-substituting industrialization – Emergent urban systems in underdeveloped countries – Patterns of urbanization

8 Urban crisis of underdevelopment

175

Growth of the urban population – Urban unemployment and the growth of the informal sector – Environmental problems of cities in underdeveloped countries – Social alienation and urban management

9 Urban system and national development

199

The conceptual basis of urban development – Demand factors in the strategy of urbanization – Technological choices and industrial development – Programme of urban development – Urban planning and management

Part Four: National Integration

10 Integrating the national population

223

Population growth – Population density – The concept of a human carrying capacity – The role of social development – Population mobility and spatial interaction – Population planning and national integration

11 Information flows

250

The nature of information – Network of information channels – Information flow and popular mobilization – Developing a control information system

12 Movements of goods and services	276
Colonial spatial integrative strategy – A model of transportation development – Transportation for self-centred development – Organizing the flow of goods and services	
13 External relations	304
Problems of external dependent relations – The role of multinational corporations – The metropolitan interests – The constraints of future global resources – The concept of selective closure – The imperative of regional organizations	
14 Conclusion	333
The investment–mobilization distinction – The ideological smokescreen – The question of class analysis – Conclusion	
15 Postscript	346
'Selective closure' and structural adjustment programmes – Adjustment conditionalities and self-reliant development in Nigeria – The urban impact of structural adjustment – The rural impact of structural adjustment – Conclusion: can the Nigerian experience be generalized?
