|--------------|------|
| Contributors | xiii |
| Preface | xvii |

PART I

PROKARYOTES

1

mRNA Degradation in Prokaryotic Cells: An Overview Joel G. Belasco

| | |
|--|----|
| I. Introduction | 3 |
| II. Ribonucleases | 5 |
| III. Structural Determinants of mRNA Stability and Instability | 6 |
| IV. Mechanisms of mRNA Degradation | 8 |
| References | 11 |

2

The Role of the 3' End in mRNA Stability and Decay

Christopher F. Higgins, Helen C. Causton,
Geoffrey S. C. Dance, and Elisabeth A. Mudd

| | |
|--|----|
| I. Introduction | 13 |
| II. The 3'-5' Exoribonucleases: PNPase and RNase II | 16 |
| III. 3' Stem-Loop Structures Stabilize Upstream mRNA | 18 |
| IV. How Do Stem-Loop Structures Stabilize Upstream mRNA? | 20 |
| V. 3' Stem-Loop Structures Influence Gene Expression | 21 |
| VI. Degradation of mRNA Stabilized by 3' Stem-Loops | 23 |

| | |
|--|----|
| VII. Stem-Loop-Binding Proteins | 24 |
| VIII. Chloroplasts | 25 |
| IX. Concluding Remarks: The Role of the 3' End in Regulation | 26 |
| References | 27 |

3

5' mRNA Stabilizers

David Bechhofer

| | |
|---|----|
| I. Introduction | 31 |
| II. Function of a 5' Stabilizer | 32 |
| III. <i>Escherichia coli trp</i> mRNA | 37 |
| IV. <i>Escherichia coli ompA</i> Message | 39 |
| V. <i>erm</i> Genes of Gram-Positive Bacteria | 45 |
| VI. Conclusions | 50 |
| References | 50 |

4

RNA Processing and Degradation by RNase K and RNase E

Öjar Melefors, Urban Lundberg, and Alexander von Gabain

| | |
|--|----|
| I. Introduction | 53 |
| II. Original Phenotypes of the <i>Escherichia coli ams^{ts}</i> and <i>rne^{ts}</i> Mutations | 54 |
| III. The <i>ams^{ts}</i> and <i>rne^{ts}</i> Mutations Map to the Same Gene | 55 |
| IV. The Endoribonucleases RNase K and RNase E | 56 |
| V. The <i>ams/rne</i> Gene Product and Its Relation to RNase K and RNase E | 58 |
| VI. <i>ams/rne</i> -Dependent Cleavage Sites | 63 |
| VII. Concluding Summary | 66 |
| References | 67 |

5

RNA Processing and Degradation by RNase III

Donald Court

| | |
|--|----|
| I. Introduction | 71 |
| II. RNase III Enzyme and Its Substrates | 71 |
| III. <i>rnc</i> : The Gene for RNase III | 79 |

| | |
|--|-----|
| IV. Regulation of <i>rnc</i> Expression and RNase III Activity | 83 |
| V. Ribosomal RNA Processing | 85 |
| VI. Control of Gene Expression by RNase III | 87 |
| VII. RNase III of <i>Schizosaccharomyces pombe</i> and Other Organisms | 106 |
| VIII. Homology between RNase III and Other Double-Strand RNA-Binding Proteins | 107 |
| References | 108 |

6

Translation and mRNA Stability in Bacteria: A Complex Relationship

Carsten Petersen

| | |
|--|-----|
| I. The Relation of Translation to mRNA Stability | 117 |
| II. Effects of Interfering with Translation on mRNA Stability | 119 |
| III. The Expected Relation between Translation Frequency and mRNA Stability | 123 |
| IV. The Observed Relation between Translation Frequency and mRNA Stability | 130 |
| V. Conclusion | 137 |
| Appendix | 138 |
| References | 141 |

PART II

EUKARYOTES

7

mRNA Degradation in Eukaryotic Cells: An Overview

George Brawerman

| | |
|--|-----|
| I. Importance in Control of Gene Expression | 149 |
| II. Basis for Selectivity in mRNA Degradation | 150 |
| III. Nucleases Involved in mRNA Decay, and Their Targets | 153 |
| IV. Relation of mRNA Decay to the Translation Process | 156 |
| References | 159 |

8

**Hormonal and Developmental Regulation of
mRNA Turnover**

**David L. Williams, Martha Sensel, Monica McTigue, and
Roberta Binder**

- I. Introduction 161
- II. History 162
- III. Mechanistic Aspects of Regulated mRNA Turnover 169
- IV. Linkage to Signal Transduction Pathways 171
- V. Turnover Elements and trans-Acting Turnover Factors 177
- VI. Degradation Target Sites and Nucleases 182
- VII. Summary and Perspective 188
- References 190

9

**Control of the Decay of Labile Protooncogene and
Cytokine mRNAs**

Michael E. Greenberg and Joel G. Belasco

- I. Introduction 199
- II. The Sequence Determinants Controlling ERG mRNA Decay 202
- III. Mechanisms of mRNA Decay: The Importance of
Protein Synthesis 207
- IV. Deadenylation as the First Step in ERG mRNA Decay 209
- V. The Cellular Factors That Control Rapid ERG mRNA Decay 213
- VI. Conclusions 215
- References 215

10

**Translationally Coupled Degradation of
Tubulin mRNA**

Nicholas G. Theodorakis and Don W. Cleveland

- I. Introduction 219
- II. Tubulin Synthesis Is Autoregulated 220
- III. Tubulin Synthesis Is Regulated by Changes in the Stability of
Cytoplasmic Tubulin mRNAs 223
- IV. The Minimal Regulatory Sequence That Confers the Selective
Instability of β -Tubulin mRNA Is the First Four Translated
Codons 223

- V. Degradation of β -Tubulin mRNA Is Mediated by Cotranslational Binding of a Cellular Factor to the β -Tubulin Nascent Peptide 224
- VI. What Binds to the Nascent β -Tubulin Peptide? 229
- VII. Regulation of α -Tubulin Synthesis 231
- VIII. Other Mechanisms Regulating Tubulin Expression 233
- IX. A Model for Cotranslational Tubulin RNA Degradation: Parallels with Other Examples of Cotranslational mRNA Decay 234
- References 236

11

Iron Regulation of Transferrin Receptor mRNA Stability

Joe B. Harford

- I. Overview of Cellular Iron Homeostasis 239
- II. Iron Acquisition 240
- III. Iron Sequestration 240
- IV. Regulation of Cellular and Iron Homeostasis 240
- V. The Iron-Responsive Element-Binding Protein as the Cellular "Ferrostat" 243
- VI. The Rapid Turnover Determinant of the Transferrin Receptor mRNA 247
- VII. The Structure of the TfR mRNA Regulatory Region 252
- VIII. The Mechanism of TfR mRNA Decay 256
- IX. Summary and Perspectives 261
- References 262

12

Degradation of a Nonpolyadenylated Messenger: Histone mRNA Decay

William F. Marzluff and Roberta J. Hanson

- I. Introduction 267
- II. Control of Histone mRNA Stability 270
- III. Biochemical Mechanisms Regulating Histone mRNA Degradation 275
- IV. Cell-Cycle Specific Signals and Histone mRNA Degradation 285
- V. Why Degrade Histone mRNA? 286
- References 287

13

mRNA Turnover in *Saccharomyces cerevisiae*

Stuart W. Peltz and Allan Jacobson

- I. Introduction 291
- II. Measurement of mRNA Decay Rates in Yeast 293
- III. Are Nonspecific Determinants Important Effectors of the
Differences between Stable and Unstable mRNAs? 298
- IV. cis-Acting Determinants of mRNA Instability 301
- V. Approaches to Identifying trans-Acting Factors Involved in mRNA
Decay 310
- VI. Why Are Translation and Turnover Intimately Linked? 318
- References 321

14

Control of mRNA Degradation in Organelles

Wilhelm Grissem and Gadi Schuster

- I. Introduction 329
- II. Post-transcriptional Control of mRNA Accumulation 331
- III. Roles of Nuclear Proteins in Organelle mRNA Stability 341
- IV. Role of Translation in Organelle mRNA Stability 346
- V. cis- and trans-Factors Affecting Organelle mRNA Stability 348
- VI. Conclusions 359
- References 360

15

Control of Poly(A) Length

Ellen J. Baker

- I. Background: Poly(A) and the Poly(A)-Binding Protein 367
- II. Poly(A) Addition in the Nucleus 370
- III. Cytoplasmic Poly(A) Metabolism 376
- IV. Polyadenylation and Deadenylation in Gametes and Early
Embryos 388
- V. The Role of Poly(A) in mRNA Stability 400
- VI. Concluding Comments 406
- References 407

16

mRNA Decay in Cell-Free Systems

Jeff Ross

- I. Introduction 417
- II. Rationale 417
- III. Useful Approaches for Analyzing mRNA Stability *in Vitro* 420
- IV. mRNA Decay Pathways, mRNases, and Regulatory Factors
Identified in Cell-Free mRNA Decay Systems 426
- V. Future Directions 440
- References 444

17

Eukaryotic Nucleases and mRNA Turnover

Audrey Stevens

- I. Introduction 449
- II. Hydrolysis of mRNA Cap Structures 451
- III. Exoribonucleases 455
- IV. Endonucleases 460
- V. mRNA Deadenyating Enzymes 463
- VI. Concluding Remarks 465
- References 467

PART III

METHODS OF ANALYSIS

18

Experimental Approaches to the Study of mRNA Decay

Joel G. Belasco and George Brawerman

- I. Kinetics of mRNA Decay 475
- II. Measurement of Decay Rates 476
- III. Estimation of Changes in mRNA Stability by Comparison of
Transcription Rates and Relative mRNA Levels 485
- IV. Measurement of Poly(A) Sizes 486
- V. Identification of Structural Elements That Affect mRNA
Stability 489
- References 491
