Contents

1 Introduction

1.1	What are indicators and what is their utility?	1
1.2	What are the characteristics of a good indicator?	2
1.3	Book structure	3

2 Review of ecological indicators and their characteristics

2.1	Brief reference to terrestrial ecological indicators	5
2.2	Brief reference to freshwater ecological indicators	8
2.2.1	Macroinvertebrates	8
2.2.2	Phytobenthos	12
2.2.3	Fish	14
2.3	Review of the ecological indicators used in assessing coastal and marine environments	15
2.3.1	Indicators based on indicator species	15
2.3.1.1	Measures based on indicator species	18
2.3.1.2	Bioaccumulator indicator species	24
2.3.2	Indicators based on ecological strategies	28
2.3.2.1	Belsher Index (Belsher, 1982)	28
2.3.2.2	Benthic Opportunistic Polychaeta Amphipoda Index, BOPA (Dauvin & Ruellet, 2007)	31
2.3.2.3	FSI (Milovidova & Alyomov, 1992)	32
2.3.2.4	ITI (Word, 1980)	32
2.3.2.5	ITD (Heip <i>et al.</i> , 1985)	33
2.3.2.6	MI (Bongers <i>et al.</i> , 1991; Bongers, 1999)	33
2.3.2.7	Meiobenthic Pollution Index (MMI) (Losovskaya, 1983)	34
2.3.2.8	Mollusc Mortality Index (Petrov, 1990)	34
2.3.2.9	Nematodes/Copepods Index (Raffaelli & Mason, 1981)	34
2.3.2.10	Polychaeta/Amphipoda Ratio (Gómez-Gesteira & Dauvin, 2000)	34
2.3.2.11	Rhodophyceae/Phaeophyceae Index (Feldmann, 1937)	35

2.3.3	Indicators based on diversity	35
2.3.3.1	Berger–Parker Index (Berger & Parker, 1970; May, 1975)	36
2.3.3.2	Deviation from the log-normal distribution (Gray & Mirza, 1979)	36
2.3.3.3	Fisher's α Index (Fisher <i>et al.</i> , 1943)	36
2.3.3.4	Hulbert Index (Hulbert, 1971)	36
2.3.3.5	<i>K</i> -Dominance curves (Lambshead <i>et al.</i> , 1983)	37
2.3.3.6	Margalef Index (Margalef, 1969)	37
2.3.3.7	Pielou Evenness Index (Pielou, 1969)	37
2.3.3.8	Ranked species abundance (dominance) curves	37
2.3.3.9	Rarefaction curves (Sanders, 1968)	37
2.3.3.10	Shannon–Wiener Index (Shannon & Weaver, 1963)	38
2.3.3.11	Simpson Index	39
2.3.3.12	Taxonomic distinctness measures (Warwick & Clarke, 1995; Clarke & Warwick, 1998, 2001)	39
2.3.4	Indicators based on species biomass and abundance	41
2.3.4.1	ABC method (Warwick, 1986)	41
2.3.4.2	<i>W</i> -Statistic Index (Warwick & Clarke, 1994)	42
2.3.5	Multimetric indices	42
2.3.5.1	APBI (Hale & Heltshe, 2008)	43
2.3.5.2	Benthic Condition Index (Engle <i>et al.</i> , 1994; Engle & Summers, 1999)	45
2.3.5.3	BHQ (Nilsson & Rosenberg, 1997)	46
2.3.5.4	Benthic Index of Biotic Integrity (B-IBI) (Weisberg <i>et al.</i> , 1997)	47
2.3.5.5	Benthic Quality Index (BQI) (Rosenberg <i>et al.</i> , 2004)	50
2.3.5.6	BRI (Smith <i>et al.</i> , 2001)	51
2.3.5.7	IBI for fishes (McGinty & Linder, 1997)	52
2.3.5.8	Coefficient of pollution (Satsmadjis, 1982, 1985)	52
2.3.5.9	EQI (Fano <i>et al.</i> , 2003)	53
2.3.5.10	EBI (Deegan <i>et al.</i> , 1993)	53
2.3.5.11	FHI (Cooper <i>et al.</i> , 1993)	53
2.3.5.12	M-AMBI (Muxika <i>et al.</i> , 2007)	54
2.3.5.13	OSI (Rhoads & Germano, 1986)	55
2.3.5.14	PLI (Jeffrey <i>et al.</i> , 1985)	55
2.3.5.15	P-BAT (Teixeira <i>et al.</i> , submitted)	56
2.3.5.16	Portuguese marine macroalgae assessment tool (P-MarMAT) (Neto <i>et al.</i> , submitted)	57
2.3.5.17	TRIX (Vollenweider <i>et al.</i> , 1998)	59
2.3.5.18	VPBI (Paul <i>et al.</i> , 2001)	59
2.3.6	Indices thermodynamically oriented or based on network analysis	60
2.3.6.1	Ascendency (Ulanowicz, 1980)	60
2.3.6.2	Eco-Exergy (Jørgensen & Mejer, 1979, 1981)	63

2.4	Brief review of socio-economic indicators: the case of coastal environments	66
3	Decision tree for selecting ecological indicators based on benthic invertebrate fauna data sets	
3.1	Selecting ecological indicators: practical constraints	71
3.2	Decision tree.	72
4	Decision tree for selecting adequate indices or ecological indicators: examples of application	
4.1	Description of the study areas and the types of data available	77
4.1.1	The Mondego estuary	77
4.1.2	The Mira estuary	79
4.1.3	The Mar Menor lagoon	80
4.1.4	Escombreras basin	83
4.1.5	Cape Tiñoso	83
4.2	Indicator selection as a function of data availability	85
4.3	Results of the application.	88
4.3.1	The Mondego estuary	88
4.3.2	The Mira estuary	98
4.3.3	The Mar Menor lagoon	106
4.3.4	The Escombreras basin	108
4.3.5	Cape Tiñoso	110
4.4	Was the ecological indicator's performance satisfactory in the case studies?	114
4.4.1	Indices based on indicator species	114
4.4.2	Indices based on ecological strategies	115
4.4.3	Biodiversity as reflected in diversity measures	117
4.4.4	Indicators based on species biomass and abundance.	119
4.4.5	Thermodynamically oriented indicators: Exergy-based indices	119
4.4.6	Integrative indices: B-IBI.	120
5	Combining indicators to characterise a system's ecological quality status	
5.1	Ecological quality status assessment – multimetric approaches within the WFD.	126
5.1.1	Transitional waters: The Mondego estuary case study.	126
5.1.1.1	Opportunistic macroalgae EQS assessment	131
5.1.1.2	Benthic macroinvertebrates EQS assessment	134
5.1.1.3	Integration of different biological quality elements' classification into a final EQS for the Mondego estuary.	143
5.1.2	Coastal waters: The Buarcos Bay case study	144
5.1.2.1	Marine macroalgae EQS assessment	147
5.1.2.2	Benthic macroinvertebrates EQS assessment	150

5.1.2.3	Integration of different biological quality elements' classification into a final EQS for the Buarcos Bay . . .	152
---------	--	-----

5.2	Final remarks	153
