Editors

Biochemistry and Physiology of Anaerobic Bacteria

;

With 71 Illustrations

Springer

Contents

Preface	vii
Contributors	xiii
1 Anaerobes in the Recycling of Elements in the Biosphere'	1
HOWARD GEST	
2 The Diversity of Energy Sources of Microorganisms	11
HANS GÜNTER SCHLEGEL	
3 Mechanism of Hydrogen Activation	20
SIMON P.J. ALBRACHT	
4 Reductive Activation of Aerobically Purified <i>Desulfovibrio</i> <i>vulgaris</i> Hydrogenase: Mössbauer Characterization of the Catalytic H Cluster	35
BOI HANH HUYNH, PEDRO TAVARES, ALICE S. PEREIRA, ISABEL MOURA, AND JOSÉ J.G. MOURA	
5 Iron-Sulfur Cluster Biosynthesis	46
JEFFREY N. AGAR, DENNIS R. DEAN, AND MICHAEL K. JOHNSON	
6 Genes and Proteins Involved in Nickel-Dependent Hydrogenase Expression	67
R.J. MAIER, J. OLSON, AND N. MEHTA	
7 Genes and Genetic Manipulations of <i>Desulfovibrio</i>	85
JUDY D. WALL, CHRISTOPHER L. HEMME, BARBARA RAPP-GILES, JOSEPH A. RINGBAUER, JR., LAURENCE CASALOT, AND TARA GIBLIN	

8	Function and Assembly of Electron-Transport Complexes in <i>Desulfovibrio vulgaris</i> Hildenborough	99
	GERRIT VOORDOUW	
9	Iron-Sulfur Proteins in Anaerobic Eukaryotes	113
	RICHARD CAMMACK, DAVID S. HORNER, MARK VAN DER GIEZEN, JAROSLAV KULDA, AND DAVID LLOYD	
10	Oxygen and Anaerobes	128
	DONALD M. KURTZ, JR.	
11	One-Carbon Metabolism in Methanogenic Anaerobes	143
	JAMES G. FERRY	
12	Selenium-Dependent Enzymes from <i>Clostridia</i>	157
	WILLIAM T. SELF	
13	How the Diverse Physiologic Potentials of Acetogens Determine Their In Situ Realities	171
	HAROLD L. DRAKE AND KIRSTEN KÜSEL	
14	Electron-Transport System in Acetogens	191
	AMARESH DAS AND LARS G. LJUNGDAHL	
15	Microbial Inorganic Sulfur Oxidation: The APS Pathway	205
	DONOVAN P. KELLY	
16	Reduction of Metals and Nonessential Elements by Anaerobes	220
	LARRY L. BARTON, RICHARD M. PLUNKETT, AND BRUCE M. THOMSON	
17	Chemolithoautotrophic Thermophilic Iron(III)-Reducer	235
	JUERGEN WIEGEL, JUSTIN HANEL, AND KAYA AYGEN	
18	Electron Flow in Ferrous Biocorrosion	252
	E.J. LAISHLEY AND R.D. BRYANT	
	Index	261
