Contents

List of Tables	viii
List of Figures	x
Acknowledgements	xi
Preface	xiv
1. Fertility, Family Planning and the Demographic Transition	1
1.1 Demographic Transition Theory	1
1.2 Family Planning in the Third World	2
1.3 Family-Planning Services	4
1.4 Demographic Transition in the Third World	5
1.5 Demographic Changes in Singapore and China	8
1.6 Papua New Guinea: The Land and Its People	10
1.7 Demographic Characteristics	13
1.8 Family-Planning Programme	15
1.9 Prior Researches	18
1.10 Specific Aims of this Study	21
2. Methodology and Data Collection	22
2.1 Research Sites	22
2.2 Sample Design	23
2.3 Sample Size	24
2.4 Selection of the Respondents	25
2.5 The Questionnaires	25
2.6 Organisation of the Fieldwork	27
2.7 Data Collection and Analysis	28
2.8 Fieldwork Results	28
2.9 Data Processing	29
3. Some Socio-economic Characteristics of the Respondents and Selected Features of the Survey Population	31
3.1 Socio-Economic Characteristics of the Sample	31
3.2 Selected Features of the Survey Population	35
3.2.1 The Survey Population	35
3.2.2 Age and Sex Structure of the Survey Population	36
3.2.3 Proportion Marrying and Marital Stability	38
3.2.4 Household Size	40
3.2.5 Household Types	40
3.2.6 Relationship to Head of Household	42

CONTENTS

4.	Breastfeeding and Sexual Abstinence	44
4.1	Introduction	44
4.2	Breastfeeding	44
4.2.1	Place of Residence	45
4.2.2	Educational Level and Socio-economic Status	46
4.2.3	Place of Birth of Urban Respondents	47
4.2.4	Place of Delivery	48
4.3	Sexual Abstinence	49
4.3.1	Place of Residence	50
4.3.2	Age at First Marriage	51
4.3.3	Household Communication	51
4.3.4	Institutional Communication	53
4.3.5	Taboos Surrounding Breastfeeding and Sexual Abstinence	54
4.4	Summary and Conclusion	55
5.	Fertility Levels, Patterns and Differentials	57
5.1	Introduction	57
5.2	Current Fertility	58
5.2.1	The Crude Birth Rate	58
5.2.2	Levels and Patterns of Age-Specific Fertility and Total Fertility Rates	60
5.2.3	Selection of Total Fertility Rates for the Study Areas	65
5.2.4	Reproduction Rates	65
5.3	Cumulative Fertility	65
5.3.1	The Mean Number of Children Ever Born	65
5.4	Differentials in Fertility	67
5.4.1	Rural-Urban Differentials	68
5.4.2	Children Ever Born	68
5.4.3	Regional Fertility Differentials	70
5.4.4	Fertility Differentials by Educational Attainment	72
5.5	Summary and Conclusion	72
6.	Mortality Levels, Patterns and Differentials	76
6.1	Introduction	76
6.2	Crude Death Rates	77
6.2.1	Current Infant Mortality Rates	79
6.3	Estimation of Infant Mortality Rates from the Number of Children Ever Born and the Number of Children who Survive	79
6.3.1	Levels and Patterns of Infant Mortality	81
6.3.2	Differentials in Infant Mortality	83
6.4	Estimation of Child Mortality Rates Using Data Classified by Age of Mother	85

6.4.1	The Method of Estimation	85
6.4.2	Levels and Patterns of Child Mortality	88
6.4.3	Differentials in Child Mortality	91
6.5	Summary and Conclusion	96
7.	Family Size and Family Planning	97
7.1	Introduction	97
7.2	Attitudes to Family Size	97
7.3	Knowledge and Use of Contraception	99
7.3.1	Sterilisation	102
7.3.2	Attitudes to Modern Contraception	103
7.3.3	Non-users of Contraception	103
7.3.4	Sources of Information about Contraception	104
7.3.5	Age at First Marriage	104
7.3.6	Education and Income	106
7.3.7	Power Structure within the Household	108
7.3.8	The Ideal Number of Children	110
7.3.9	The Desire for More Children	110
7.3.10	Accessibility to Family-Planning Services	112
7.4	Summary and Conclusion	113
8.	Concluding Comments and Policy Implications	115
8.1	Implications of Family-Planning Programmes and the Demographic Transition	115
8.2	Summary and Conclusion	116
8.3	Implications for Policy	119
	Bibliography	123
	Appendix	
A.	The Questionnaires	129
B.	Interviewer's Manual	179
C.	Adjusted Age-Specific Fertility Rates by the Application of the Brass Method	200
D.	Average Number of Children Ever Born, Average Number of Deceased Children and Proportion Dead (Rural-Urban and Regional)	202
	Author Index	204
	Subject Index	206
