Alzheimer's Disease

Etiological Mechanisms
and Therapeutic Possibilities

J.D. Turner, K. Beyreuther, F. Theuring
Editors

With 21 Figures and 11 Tables

Springer

Table of Contents

1	Alzheimer's Disease With and Without Familial Aggregation: A Case for Phenotypical Similarity <i>O. Almkvist, V. Jelic, L. Lannfelt, A. Nordberg, M. Shigeta, L.-O. Wahlund, and B. Winblad</i>	1
2	The Vascular Dementias and Cerebrovascular Involvement in Alzheimer's Disease <i>J.G. Schulz and K.M. Einhäupl</i>	17
3	The Genes Involved in Alzheimer's Disease <i>J. Hardy and M. Hutton</i>	49
4	In Vivo Biology of Amyloid Precursor Protein/Amyloid Precursor-like Proteins and Transgenic Animal Models of Alzheimer's Disease <i>S.S. Sisodia, G. Thinakaran, B.T. Lamb, H.H. Slunt, C.S. von Koch, S.D. Ginsberg, A.C.Y. Lo, M.K. Lee, A.J.I. Roskams, E. Masliah, H. Zheng, L.H.T. Van der Ploeg, J.D. Gearhart, and D.L. Price</i>	61
5	Molecular Processing Pathways of β -Amyloid Precursor Protein: Therapeutic Implications <i>C. Haass</i>	77

6	Regulation of Amyloid β -Protein Precursor Processing by Cell Surface Receptor Ligands and Second Messengers <i>R.M. Nitsch</i>	93
7	Tau Phosphorylation and Dephosphorylation in the Pathogenesis of Alzheimer's Disease <i>M. Mawal-Dewan, J.Q. Trojanowski, and V.M.-Y. Lee</i>	109
8	Cytokines in Alzheimer's and Other Neurodegenerative Diseases <i>N.J. Rothwell</i>	127
9	Inflammation in the CNS and in Alzheimer's Disease <i>V.H. Perry, M.D. Bell, and D. Anthony</i>	147
10	Protein Modifications and Interactions in Alzheimer's Disease <i>M.A. Smith and G. Perry</i>	169
11	Protein Aging and Its Relevance to the Etiology of Alzheimer's Disease <i>E.R. Stadtman</i>	183
	Subject Index	209
	Previous Volumes Published in this Series	215
