# Contents

## Chapter 1

|                                                 |   |
|-------------------------------------------------|---|
| Introduction to Solid Waste Decomposition ..... | 1 |
| <i>Palmisano and Barlaz</i>                     |   |

## Chapter 2

|                                             |    |
|---------------------------------------------|----|
| Microbiology of Solid Waste Landfills ..... | 31 |
| <i>Barlaz</i>                               |    |

## Chapter 3

|                                                     |    |
|-----------------------------------------------------|----|
| Anaerobic Digestion of Municipal Solid Wastes ..... | 71 |
| <i>Chynoweth and Pullammanappallil</i>              |    |

## Chapter 4

|                                                                 |     |
|-----------------------------------------------------------------|-----|
| Composting of Municipal Solid Waste<br>and Its Components ..... | 115 |
| <i>Miller</i>                                                   |     |

## Chapter 5

|                                                    |     |
|----------------------------------------------------|-----|
| Microbial Pathogens in Municipal Solid Waste ..... | 155 |
| <i>Gerba</i>                                       |     |

## Chapter 6

|                                                                                       |     |
|---------------------------------------------------------------------------------------|-----|
| Testing the Biodegradability of Synthetic<br>Polymeric Materials in Solid Waste ..... | 175 |
| <i>Pettigrew and Johnson</i>                                                          |     |

|             |     |
|-------------|-----|
| Index ..... | 215 |
