<i>General preface</i>	xi
<i>Acknowledgements</i>	xiii
<i>List of symbols, conventions, and abbreviations</i>	xv
1 Introduction	1
1.1 Concealed questions: what are they?	1
1.2 Concealed questions: why are they interesting?	3
1.3 Beyond definite concealed questions	5
1.4 (Concealed) questions and meta-questions	9
1.5 Outline of the book	10
2 Concealed questions and questions	13
2.1 Introduction	13
2.2 The origin of the question approach	13
2.3 CQs are only semantically questions	17
2.4 A challenge and a refinement	20
2.4.1 Copular questions are ambiguous—CQs are not	20
2.4.2 CQs denote specificational questions	21
2.5 A semantic implementation	26
2.6 More on selection	28
2.7 Summary	32
3 Concealed questions and individual concepts	35
3.1 Introduction	35
3.2 Concealed questions and individual concepts	36
3.2.1 Montague and the temperature paradox	36
3.2.2 Heim's (1979) analogy	39
3.2.3 Romero (2005) on <i>know</i> _{CQ}	40
3.2.4 Abstraction and quantification over concepts	42
3.3 NPs as predicates of individual concepts	44
3.3.1 Montague and the temperature paradox, take #2	44
3.3.2 Reactions to Montague's proposal	46
3.3.3 Gupta's syllogism	50
3.3.4 Lasersohn (2005)	52
3.3.5 Romero (2006, 2007)	54
3.3.6 Schwager (2007)	57
3.3.7 The modification argument	58

3.4	On the proper treatment of quantification over concepts	59
3.4.1	The type-shifter approach: first attempt	59
3.4.2	Identifying the domain of quantification	60
3.4.3	Meaningfully sorted concepts	63
3.5	Interim conclusions	65
3.6	An account of quantified CQs and simple abstraction	66
3.6.1	Defining the domain of quantification	66
3.6.2	Quantification: <i>Clara knows every price</i>	70
3.6.3	Abstraction: <i>The price that Milcs knows is rising</i>	73
3.6.4	Side note: the Q-shifter and traces of type <s,e>	74
3.7	Challenges	75
3.7.1	Set readings with quantified CQs	75
3.7.2	Set readings with indefinite CQs	77
3.7.3	Meta-question readings	80
3.7.4	Puzzling counterparts	81
3.7.5	Pair-list readings with one-to-many relational nouns	82
3.8	Summary	85
4	Pair-list and set readings	87
4.1	Introduction	87
4.2	On the distribution of pair-list and set readings	87
4.3	Set readings and the IOD shifter	89
4.4	Toward an account of set readings	91
4.4.1	The problem of semantically impoverished traces	91
4.4.2	The copy theory of movement	92
4.4.3	The interpretation of copy-traces	93
4.4.4	Tackling set readings (first pass)	95
4.4.5	Second pass: copy-traces in intensional contexts	97
4.4.6	Third (and final) pass: exhaustivity and non-factive verbs	99
4.5	Pair-list readings (round 2)	105
4.5.1	Quantification over concepts with copy-traces	105
4.5.2	One-to-many relational nouns and the PAIR-shifter	107
4.5.3	A note on restrictive modification	108
4.6	Pair-list and set readings in the temporal domain	109
4.7	Comparison with Romero (2010)	111
4.7.1	Romero (2010) on set readings	111
4.7.2	Open issues for Romero (2010)	113
4.8	Summary	118
4.9	Appendix: equivalence with the Q-based analysis	120

5 Concealed questions and meta-questions	123
5.1 Introduction	123
5.2 Hyper-intensional CQ-readings	123
5.3 Heim's ambiguity	125
5.3.1 The challenge of meta-question readings	125
5.3.2 Romero's (2005) analysis	127
5.4 Two additional readings	130
5.5 The matching analysis of relative clauses	131
5.6 Set Q/MQ-readings	132
5.6.1 Deriving set/MQ-readings	133
5.6.2 Relative clauses can be extraposed	135
5.6.3 Deriving set/Q readings	138
5.7 A second look at Heim and Romero's Q/MQ-readings	140
5.7.1 Romero (2005) with copy-traces	140
5.7.2 The PAIR-shifter and Heim's ambiguity	141
5.8 Summary	145
5.9 Appendix: other possible LFs	146
Conclusion	149
