TABLE OF CONTENTS

Preface	vii
Contributors	xxi
SECTION I: END USER DEMAND	
1. Experimental Psychology	1
Effective Consumer Information Interventions: Concepts, Design and Impacts Using Field Experiments R.A. Winett, K.D. Kramer, W.B. Walker, S.W. Malone, and M.K. Lane	3
Dynamics of Adaptive Demand J.G. Cross	23
A Methodology for Specification and Aggregation in Product Concept Testing D.A. Gautschi and V.R. Rao	37
2. Economic Approaches to Consumer Choice	65
The Effects of User Cost on the Demand for Telecommunication Service D.A. Dunn and Hyung Sik Oh	67
A Theory of Consumption Decision: The Stochastic Commodity Model N. Curien and A. de Fontenay	87
3. Econometrics/Discrete Choice	103
Residential Demand for Access to the Telephone Network L.D. Taylor and D. Kridel	105
Estimating Local Call Elasticities with a Model of Stochastic Class of Service and Usage Choice J.P. Kling and S.S. Van Der Ploeg	119
Micro-Simulation of Local Residential Telephone Demand under Alternative Service Options and Rate Structures T. Atherton, M. Ben-Akiva, D. McFadden, and K. Train	137

4. Measurement	165
Probabilistic Multidimensional Choice Models for Marketing Research G. De Soete and J.D. Carroll	167
Multidimensional Analysis of Preference Structures R.A. Harshman and M.E. Lundy	185
Ordinal Network Scaling of Communication Networks H. Feger	205
SECTION II: ECONOMETRICS OF MARKET BEHAVIOR	
1. Theory	219
Testing the Specification of Econometric Models in Regression and Non-Regression Directions R. Davidson and J.G. MacKinnon	221
Consistent Estimation of Limited Dependent Variable Models Despite Misspecification of Distribution P.A. Ruud	241
On Estimating Dynamic Models with Seasonality E. Ghysels	261
2. Application	277
Sample Design Considerations for Telephone Time-of-Use Pricing Experiments with an Application to OTC-Australia D.J. Aigner and D.G. Fiebig	279
A General Theory of Point-to-Point Long Distance Demand A.C. Larson, D.E. Lehman and D.L. Weisman	299
Relation of Conversation Time to Message Frequency in Residential Usage J.G. Veitch	319
Generalized Gamma Family Regression Models for Long Distance Telephone Call Durations T.A. Cameron and K.J. White	333

SECTION III: USER MARKET STRUCTURE

1. Access and Market Structure	351
Competition with Lock-In J. Farrell	353
Algorithmic Analyses of Oligopolistic Competition in Space B. Von Hohenbalken and D.S. West	363
Carrier Bypass and Competitive Strategy C.P. Buxton and P. Cartwright	383
Forecasting Technology Adoption with an Application to Telecommunications Bypass J.H. Rohlfs and R.J. Gilbert	399
2. Pricing and Regulation	413
Consumption Externalities in Telecommunication Services B. Bental and M. Spiegel	415
A Theoretical Framework for Designing Access Charges M.A. Einhorn	433
Performance Indicators for Regulated Industries W.E. Diewert	447
