

The  
Measurement of  
Environmental  
and  
Resource  
Values

*Theory and Methods*

A. Myrick Freeman III

Resources for the Future  
Washington, D.C.

# Table of Contents

<b>Foreword</b>	
<i>Paul R. Portney</i>	xv
<b>Preface</b>	xvii
<b>1 Resource Evaluation and Public Policy</b>	<b>1</b>
The Assets of Nature	2
The Economic Concept of Value	6
Value, Benefits, and Damages	8
Economic Values in Public Policy	9
Classifications of Values	12
Ex Post and Ex Ante Analysis of Values	14
Preview	15
Mathematical Notation	16
References	16
<b>2 Measuring Values and Benefits: An Overview</b>	<b>19</b>
Resource Values as Shadow Prices	19
Approaches to Measuring Values	23
The Methodology of Indirect Measurement	26
A Model of Environmental and Resource Values	27
The Noneconomic Foundations of Resource Valuation	33
Summary	36
References	37
<b>3 Defining and Measuring Welfare Changes: Basic Theory</b>	<b>39</b>
Individual Preferences and Demand	41
Welfare Measures for Changes in Prices	46
Welfare Measures for Changes in Factor Prices	70
Welfare Measures for Quantity Changes	72
Aggregation and Social Welfare	85
Summary	88
References	89

<b>4</b>	<b>Models for Indirect Benefit Estimation: Basic Theory</b>	<b>93</b>
	Environmental Quality as a Factor Input	94
	An Individual's Demand for Environmental Quality	98
	The Structure of Preferences and Measures of Value	100
	Discrete Choice Models and Measures of Value	133
	Summary	137
	References	138
<b>5</b>	<b>Nonuse Values</b>	<b>141</b>
	Background: Motivation and Definitions	143
	A Theoretical Framework	147
	Toward Measurement	157
	Summary	161
	References	163
<b>6</b>	<b>Hypothetical Methods for Direct and Indirect Valuation</b>	<b>165</b>
	A Framework for Analyzing Validity and Reliability	167
	Forms of Hypothetical Questions	169
	The Validity of Hypothetical Responses	176
	Welfare Analysis of Hypothetical Response Data	185
	Summary	193
	References	194
<b>7</b>	<b>Aggregation of Values across Time</b>	<b>199</b>
	Individual Preferences and Intertemporal Choice	200
	Measures of Welfare Change	203
	Which Interest Rate is the Right Intertemporal Price?	207
	The Capital Costs of Environmental Policies	213
	Summary	216
	References	217
<b>8</b>	<b>Values in an Uncertain World</b>	<b>219</b>
	Individual Uncertainty and Welfare	220
	Aggregation and the Welfare Criterion	232
	Indirect Methods for Measuring Values	245
	Additional Topics in the Welfare Economics of Uncertainty	256
	Summary	267
	References	268

<b>9</b>	<b>Environmental Quality as a Factor Input</b>	<b>273</b>
	Basic Theory	274
	Multiproduct Firms	282
	Vertically Linked Markets	291
	Market Distortions	294
	Valuing Changes in the Productivity of Natural Resource Systems	300
	Summary	310
	References	311
<b>10</b>	<b>Valuing Longevity and Health</b>	<b>314</b>
	Defining and Measuring Health Effects	315
	Valuing Reduced Mortality Risks	319
	Valuing Reduced Morbidity	342
	Summary	360
	References	362
<b>11</b>	<b>Property Value Models</b>	<b>367</b>
	Historical Background	368
	The Cross-Section Hedonic Property Value Model	370
	The Repeat Sales Model	409
	Discrete Choice Models	412
	Summary	415
	References	416
<b>12</b>	<b>Hedonic Wage Models</b>	<b>421</b>
	Wage Differences and the Value of Reducing Risks	423
	Interurban Wage Differences and the Value of Amenities	430
	Summary	438
	References	439
<b>13</b>	<b>Recreational Uses of Natural Resource Systems</b>	<b>443</b>
	The Simple Travel Cost Model of Demand for a Site	445
	Issues in Model Specification	448
	Valuing Recreation Sites	456
	Valuing Changes in Site Quality	459
	Random Utility Models	469
	Other Approaches to Estimating Recreation Values	472
	Summary	478
	References	479

<b>14 Conclusions</b>	<b>484</b>
The State of the Art	486
References	493
<b>Name Index</b>	<b>495</b>
<b>Subject Index</b>	<b>503</b>
