Ronald K. Hambleton
Editors

Handbook of Modern Item Response Theory

With 57 Illustrations

Springer

Contents

Preface	v
1. <i>Item Response Theory: Brief History, Common Models, and Extensions</i> Wim J. van der Linden and Ronald K. Hambleton	1
I. Models for Items with Polytomous Response Formats	
<i>Introduction</i>	29
2. <i>The Nominal Categories Model</i> R. Darrell Bock	33
3. <i>A Response Model for Multiple-Choice Items</i> David Thissen and Lynne Steinberg	51
4. <i>The Rating Scale Model</i> Erling B. Andersen	67
5. <i>Graded Response Model</i> Fumiko Samejima	85
6. <i>The Partial Credit Model</i> Geofferey N. Masters and Benjamin D. Wright	101
7. <i>A Steps Model to Analyze Partial Credit</i> N.D. Verhelst, C.A.W. Glas, and H.H. de Vries	123
8. <i>Sequential Models for Ordered Responses</i> Gerhard Tutz	139
9. <i>A Generalized Partial Credit Model</i> Eiji Muraki	153
II. Models for Response Time or Multiple Attempts on Items	
<i>Introduction</i>	165
10. <i>A Logistic Model for Time-Limit Tests</i> N.D. Verhelst, H.H.F.M. Verstralen, and M.G.H. Jansen	169
11. <i>Models for Speed and Time-Limit Tests</i> Edward E. Roskam	187
12. <i>Multiple-Attempt, Single-Item Response Models</i> Judith A. Spray	209

III. Models for Multiple Abilities or Cognitive Components

<i>Introduction</i>	221
13. Unidimensional Linear Logistic Rasch Models	225
Gerhard H. Fischer	
14. Response Models with Manifest Predictors	245
Aeilko A. Zwiderman	
15. Normal-Ogive Multidimensional Model	258
Roderick P. McDonald	
16. A Linear Logistic Multidimensional Model for Dichotomous Item Response Data	271
Mark D. Reckase	
17. Loglinear Multidimensional Item Response Model for Polytomously Scored Items	287
Henk Kelderman	
18. Multicomponent Response Models	305
Susan E. Embretson	
19. Multidimensional Linear Logistic Models for Change	323
Gerhard H. Fischer and Elisabeth Seliger	

IV. Nonparametric Models

<i>Introduction</i>	347
20. Nonparametric Models for Dichotomous Responses	351
Robert J. Mokken	
21. Nonparametric Models for Polytomous Responses	369
Ivo W. Molenaar	
22. A Functional Approach to Modeling Test Data	381
J.O. Ramsay	

V. Models for Nonmonotone Items

<i>Introduction</i>	395
23. An Hyperbolic Cosine IRT Model for Unfolding Direct Responses of Persons to Items	399
David Andrich	
24. PARELLA: An IRT Model for Parallelogram Analysis	415
Herbert Hoijtink	

VI. Models with Special Assumptions About the Response Process

<i>Introduction</i>	431
25. Multiple Group IRT	433
R. Darrell Bock and Michele F. Zimowski	
26. Logistic Mixture Models	449
Jürgen Rost	

27. <i>Models for Locally Dependent Responses:</i>	
<i>Conjunctive Item Response Theory</i>	465
Robert J. Jannarone	
28. <i>Mismatch Models for Test Formats that Permit</i>	
<i>Partial Information To Be Shown</i>	481
T.P. Hutchinson
