

Lars Lundqvist · Lars-Göran Mattsson
Tschangho John Kim (Eds.)

Network Infrastructure and the Urban Environment

Advances in Spatial Systems Modelling

With 53 Figures
and 52 Tables

Springer

Contents

Preface	v
1 Network Infrastructure and the Urban Environment: Introduction and Summary	1
Lars Lundqvist, Lars-Göran Mattsson and Tschangho John Kim	
Part I ISSUES	
2 Infrastructure and Economic Milieu: Swedish Contributions 1960–1995	19
Börje Johansson	
3 The Changing Context of Transportation Modeling: Implications of the New Economy, Intermodalism and the Drive for Environ- mental Quality	53
T.R. Lakshmanan	
4 Excess Commuting in U.S. Metropolitan Areas	72
Edwin S. Mills	
5 Household Commuting: Implications of the Behavior of Two-Worker Households for Land-Use/Transportation Models	84
Peter Gordon, Yu-chun Liao and Harry Richardson	
Part II DYNAMICS AND EQUILIBRIA IN NETWORK MODELLING: NEW THEORETICAL AND METHODOLOGICAL DEVELOPMENTS	
6 Disequilibrium Network Design: A New Paradigm for Transportation Planning and Control	99
Terry L. Friesz, Samir Shah and David Bernstein	

7	Infinite Dimensional Formulations of Some Dynamic Traffic Assignment Models David Bernstein and Terry L. Friesz	112
8	Introduction to Projected Dynamical Systems for Traffic Network Equilibrium Problems Anna Nagurney and Ding Zhang	125
9	Worker and Workplace Heterogeneity and Residential Location: A Historical Perspective on Stockholm Björn Hårsman and John M. Quigley	157
10	Parameter Estimation for Combined Travel Choice Models David E. Boyce and Yu-Fang Zhang	177
11	Discrete Spatial Price Equilibrium Sven Erlander and Jan T. Lundgren	194
12	Integration of Freight Network and Computable General Equilibrium Models Terry L. Friesz, Zhong-Gui Suo and Lars Westin	212
13	A Spatial Computable General Equilibrium Approach for Measuring Multiregional Impacts of Large Scale Transportation Projects Toshihiko Miyagi	224
Part III INTEGRATED ANALYSIS OF ACTIVITY LOCATION AND TRANSPORTATION IN URBAN AND REGIONAL SYSTEMS		
14	Applied Models of Urban Land Use, Transport and Environment: State of the Art and Future Developments Michael Wegener	245
15	Results from Implementation of Integrated Transportation and Land Use Models in Metropolitan Regions Stephen H. Putman	268
16	Improved Logit Formulations for Integrated Land Use, Transport and Environmental Models Tomás de la Barra	288

17	Modelling Land-Use and Transport Interaction: Policy Analyses Using the IMREL Model Christer Anderstig and Lars-Göran Mattsson	308
18	A Combined Model for Analysing Network Infrastructure and Land-Use/Transportation Interactions Lars Lundqvist	329
19	Development of a Compact Urban Simulation Model John R. Roy, Leorey O. Marquez, Michael A.P. Taylor and Takayuki Ueda	344
20	An Interactive Computer System for Land-Use Transport Analysis Geoffrey G. Roy and Folke Snickars	361
21	A Combined Economic Activity and Transportation Model: A Solution Procedure and Application to Multi-Regional Planning Paul F. Hanley and Tschangho John Kim	381
22	Road Infrastructure and Corridor Development Sytze A. Rienstra, Piet Rietveld, Maarten T.H. Hilferink and Frank R. Bruinsma	395
