Lessons for Development Policy

EDITED BY

**Robert E. Evenson
and Gustav Ranis**

Westview Press
BOULDER & SAN FRANCISCO

**PART IV
RELEVANT EXPERIENCE AT THE SECTOR LEVEL**

8	Science and Technology Policy: Lessons from the Agricultural Sector in South and Southeast Asia, <i>Carl E. Pray and Vernon W. Ruttan</i>	179
9	Industrial Efficiency and Technology Choice, <i>Howard Pack</i>	209
10	Private Inventive Activity in Indian Manufacturing: Its Extent and Determinants, <i>Anil B. Deolalikar and Robert E. Evenson</i>	233

**PART V
THE PROCESS OF INTERNATIONAL TRANSMISSION
OF TECHNOLOGY**

11	Trade and Technology in the Developing Countries, <i>Raymond Vernon</i>	255
12	R&D by Multinational Firms and Host Country Exports, <i>Robert E. Lipsey, Magnus Blomström, and Irving B. Kravis</i>	271
13	Technology Transfer for Development, <i>Frances Stewart</i>	301
14	Intellectual Property Rights, R&D, Inventions, Technology Purchase, and Piracy in Economic Development: An International Comparative Study, <i>Robert E. Evenson</i>	325
	References	357
	Index	377

Tables and Figures

TABLES

2.1	Representative Countries at Various Stages of Scientific and Technological Development	22
2.2	Typical Country Profiles at Various Stages of Scientific and Technological Development	24
3.1	Comparative Advantages (CA): Structuralist (S) and Neoclassical (N) Perspectives	47
3.2	Infrastructure and Type of Structural Change	49
3.3	I&T Policy Levels: I. Macroeconomic Level	62
3.4	I&T Policy Levels: II. Current Support & III. Strategic Levels	63
3.5	Industrial and Technological Policy: Examples (Various Levels)	64
5.1	Technological Capabilities	84
5.2	Scoring Scales	88
5.3	Industries Included in the Area Samples	93
5.4	Summary of Firm Descriptor Information	94
5.5	Sample Composition by Individual Characteristics	95
5.6	Selected Sample Statistics	98
5.7	Attribute Regressions for Individual Capabilities: Summary Statistics	105
5.8	Attribute Regressions for Aggregate Capabilities: Summary Statistics	107
5.9	Sophistication of Technologies in BioTech Firms	110
5.10	Capability Scores Regressed against Sophistication Scores	111
5.11	Capability Regressions: Selected Results	116
5.12	Technological Capabilities and Functional Correlations	120
5.13	Sketch of a Microscopic Approach to Policy Research	128

7.1	The Capital-Labor Ratio in the Japanese and Indian Cotton Textile Industries: Spindles/Workers	162
7.2	Average Annual Number of Patent Applications and Registrations in Japan (1885-1979)	168
7.3	Average Annual Applications and Registrations of Utility Models in Japan (1905-1979)	169
8.1	Trends in R&D Expenditures	180
8.2	Public Sector Research and Extension in Asia as a Percent of Value of Agricultural Product	181
8.3	Research Expenditures by Type of Institution, 1985 (Millions of US\$)	182
8.4	Private and Public R&D by Commodity in the Philippines (millions of pesos)	182
8.5	Availability of Patent or Variety Protection for Different Categories of Inventions in Selected Countries	186
8.6	Rates of Return to Research in Asia	194
8.7	HYV Wheat, Rice, and Maize in Asia	195
9.1	Productivity Relative to Best Practice	217
9.2	Increase in Output Obtainable from Realization of Total Factor Productivity Equal to 85 Percent of Best Practice	218
9.3	Productivity-Reducing Factors: Spinning	222
9.4	Productivity-Reducing Factors: Weaving	223
9.5	Potential Benefit-Cost Ratios Stemming from Productivity Enhancement Project	225
10.1	International Comparisons of R&D Intensity, 1973-74	234
10.2	Sectorwise Expenditure on R&D and Science & Technology, India, 1958-59 to 1976-77	235
10.3	Research and Development Expenditure in Indian Private Sector Manufacturing: 1964-65 to 1980-81	236
10.4	Size of R&D Labor Force in Indian Industry: 1969-70 and 1980-81	237
10.5	Number of Patents Granted to Nationals in India, by Industry and Year, 1954-1957 to 1975-1978	238
10.6	Distribution of Patents by Origin	239
10.7	Patent Characteristics by Industry	240
10.8	Proportion of Firms Doing R&D in Selected Industries Grouped by Market Structure: India, 1978-79	242
10.9	R&D Expenditures on Current Account as Percent of Sales, by Ownership Group, 1977-78 to 1980-81	248

10.10	Functional Distribution of R&D Expenditures on Current Account, 1977-78 to 1980-81	249
10.11	Characteristics of Indian Inventors by Industrial Class (Percent)	250
11.1	Categories of Industrial Technology	264
12.1	Shares of U.S. Majority Owned Foreign Affiliates in LDC Exports of Manufactures, Selected Years, 1957-1986 (Percentages)	272
12.2	Shares of U.S. MOFAs in LDC Exports of Manufactures, by Industry Group, Selected Years, 1966-1986 (Percentages)	272
12.3	Shares of U.S. MOFAs in LDC Exports of Manufactures, by Country and Region, Selected Years, 1966-1986 (Percentages)	273
12.4	Exports of Manufactures by Country of Origin, Selected Years, 1966-1986 (million dollars)	274
12.5	Manufactured Exports by Developing Countries by Industry, Selected Years, 1966-1986 (million dollars)	275
12.6	Manufactured Exports from Developing Countries by U.S., Japanese, and Swedish Multinationals, by Industry: Selected Years, 1966-1986 (million dollars)	276
12.7	Exports of Manufactures by Japanese Affiliates and Their Host Countries (million dollars)	277
12.8	Exports of Manufactures by Swedish Affiliates and Their Host Countries (millions dollars)	278
12.9	Distribution, by Industry Group, of Manufactured Exports by Countries and by Foreign Affiliates (Percentages)	280
12.10	Absolute Differences between Shares of Industries in Exports of Affiliates in Developing Countries and in Exports of Home Countries and Developing Countries (Percentage Points)	281
12.11	R&D Characteristics of U.S. Manufacturing Parent Firms and Their Industries, 1977	283
12.12	Comparative R&D Characteristics of U.S. Manufacturing Firms and Their Industries, by Status as Foreign Investors, 1972	286
12.13	Industry Distribution of Aggregate Assets of Parents Investing in Each Area or Country, 1977	288
12.14	Measures of Technological Intensity of Parent Companies, by Location of Investment, 1977	289
12.15	Affiliate R&D Expenditures as Percent of Sales, 1982	293

12.16	Parent R&D Expenditures as Percent of Sales, 1982	293
12.17	Payments of Royalties and License Fees by Affiliates Relative to Their R&D Expenditures	294
12.18	Affiliate Royalty and License Receipts as Percent of Payments	294
12.19	Equations Relating Shares of Various Technology Classes in a Country's Exports to Per Capita Income and the R&D Intensity of U.S. Affiliate Operations	296
13.1	Agricultural Biotechnology Venture-Capital Firms: Selected University-Based Researchers, Financial Linkages, and Areas of Research	312
13.2	Frequency of Selected Restrictive Clauses in Technology Transfer Contracts in Four Southeast Asian Developing Countries (percentage)	317
14.1	Availability of Patent or Variety Protection for Different Categories of Inventions in Selected Countries	332
14.2	R&D Expenditures: International Comparison	338
14.3	Invention Patent Summary	340
14.4	Patent Balance Data (1980)	341
14.5	Other IPRs: Summary (1980)	342
14.6	Total Patents and Utility Models Granted with Domestic Priority in Selected Developing Countries, 1976-78 and 1986-88, Disaggregated by Industry of Manufacture	344
14.7	Total Patents Granted with Foreign Priority in Selected Developing Countries, 1976-78 and 1986-88, Disaggregated by Industry of Manufacture	345
14.8	Percentage Allocations across Industry of Manufacture of Patents and Utility Models Granted in Selected Developing Countries, 1976-78 and 1986-88, Disaggregated by Residence of Inventor	346
14.9	Percentage Allocations across Industry of Use of Patents and Utility Models Granted in Selected Developing Countries, 1976-78 and 1986-88, Disaggregated by Residence of Inventor	348
14.10	Comparative Summary of Type by Economy	351

FIGURES

2.1	Alternative Pathways of Scientific and Technological Development	32
3.1	Aggregate (Structuralist) Production Function	52
3.2	Structuralist Marginal Product of Capital Functions	52
8.1a	Demand for Commercial HYV Rice and Wheat Seed	191
8.1b	HYVs of Hybrid Corn, Sorghum, and Pearl Millet	191
9.1	The Effect of Productivity on the Choice of Technology	215
13.1	Postwar Growth in Labor (Q/L) and Capital Productivity (Q/K) in the U.K. Manufacturing Sectors (1948-1984 by SIC sector)	307
13.2	Levels of Technology Transfer	309
