Preface

Part 1. Introduction

Chapter 1. The Meaning of Service Orientation	3
1-1 Technological Basis of the Contemporary Society	3
1-2 Industrial Structure and Employment Pattern	9
1-3 Changing Social Needs	13
1-4 The Structure of the Book	16

Part 2. Measurement of Services in Production

Chapter 2. Service Orientation in Production	23
2-1 Introduction	23
2-2 Changes in the Final Demand Structure	25
2-3 Changes in the Intermediate Demand Structure	31
2-4 Changes in the Output Structure	38
2-5 Changes in the Industrial Structure	40
2-6 The Sensitivity of Dispersion	47
2-7 Further Remarks	49
Appendix A: Industrial Classification	54
Appendix B: Compilation of Input-Output Tables in Japan	60
Chapter 3. Decomposition of Growth in Real Output	67
3-1 The Framework of Analysis	67
3-2 Decomposition into Technology Factor and Final Demand	68
3-3 Further Decomposition of Final Demand	72
Chapter 4. Structural Change of the Economy and Conservation of Energy	75
4-1 The Problem	75
4-2 Conservation of Energy – An Analysis in the Input-Output Framework	77
4-3 Empirical Observation	78
4-4 Economic Growth and Environmental Quality	79
Chapter 5. Technological Change in an Input-Output Framework	85
5-1 The Theoretical Framework	85
5-2 Empirical Findings	87
5-3 Summary	90
Chapter 6. Service Orientation of the Economy and the Effectiveness of Fiscal Policy	93
6-1 The Background	93
6-2 Methodology and Some Observations	95

6-3 Concluding Remarks on the Effectiveness of Fiscal Policy	103
6-4 An Update	105

Part 3. Measurement of Services in Employment

Chapter 7. Industrial Structure and the Employment Pattern	109
7-1 Introduction	109
7-2 The Framework of Analysis	110
7-3 Data Collection	112
7-4 Trends in Labor Input Coefficients by Industry	115
7-5 Trends in Female Labor Input	121
7-6 Further Observation	125
Appendix: Occupational Classification used in the Population Census ...	128
Chapter 8. The Input of Knowledge Workers	133
8-1 The Coming of Information Society and Knowledge Workers	133
8-2 Empirical Observation	137
8-3 Educational Background of the Workforce	143
Chapter 9. High Technology and Employment: Some Supplementary Remarks	145
9-1 The Problem	145
9-2 The Framework of Analysis and Data	149
9-3 Empirical Results	152
9-4 High-tech and Employment	159

Part 4. Social Purposes and the Input-Output Framework

Chapter 10. Resource Allocation by Social Purpose and the Input-Output Framework	167
10-1 Introduction	167
10-2 How Stable are the Converters	167
10-3 Social Purpose Account and the Input-Output Framework	170
10-4 Changing Consumption Patterns and Converters – An Exposition ..	172
10-5 Concluding Remarks	174
Chapter 11. Social, Economic, and Environmental Statistics – An Accounting Framework for Policy Analysis	181
11-1 Introduction	181
11-2 Identifying Social Purposes	183
11-3 Accounting Framework	189
11-4 Empirical Application	192
11-5 Further Remarks	203
Chapter 12. Research and Development in an Input-Output Framework —A Methodological Exposition—	209
12-1 The Problems in the Conventional Treatment	209
12-2 A Conceptual Framework	215
12-3 Empirical Feasibility	225

12-4 The Flow of R&D Benefits among Industries	233
12-5 Further Remarks	239
Appendices	
Appendix 1. 36-Sector Summary Input-Output Tables, 1951-1985	247
Appendix 2. 36-Sector Input-Output Tables in 1980 Prices, 1970 and 1975	313
Appendix 3. Industry-Occupation Matrices for Total Workers, 1950-1985	331
Appendix 4. Industry-Occupation Matrices for Female Workers, 1950-1985	349
Appendix 5. Industry-Occupation Matrices for Professional and Technical Workers, 1960-1985	367
References	381
Index	391
