

The Macroeconomics of Open Economies

**An Introduction to Aggregate Behaviour
and Policy**

Richard Morley

EDWARD ELGAR

Contents

<i>Preface</i>	<i>ix</i>
<i>Notation</i>	<i>xi</i>
I THE LONG RUN	1
1 <i>Prices</i>	3
1.1 The supply of output and the demand for labour	
1.2 The labour market	
1.3 Aggregate income	
1.4 Aggregate demand	
1.5 The government's budget	
1.6 The market for loanable funds	
1.7 Money and the price level	
1.8 Imports, exports and gold flows	
1.9 The model with no international market for loanable funds	
1.10 An international market for loanable funds	
1.11 Increases in capital equipment	
1.12 Summary	
Problems for chapter 1	
Further reading	
II THE MEDIUM RUN	31
2 <i>Money</i>	33
2.1 Fiduciary money	
2.2 The New Quantity Theory of the demand for money	
2.3 The original Phillips curve	
2.4 The aggregate supply function	
2.5 Monetary expansion and contraction	
2.6 Increased labour productivity	
2.7 The Monetary Rule	
2.8 Expected inflation	
2.9 The expectations-augmented Phillips curve	
2.10 Money senorage	
2.11 Purchasing Power Parity	
2.12 Summary	
Problems for chapter 2	
Further reading	
3 <i>Government Borrowing</i>	66
3.1 Crowding out	
3.2 The bond market	
3.3 Bond senorage	
3.4 The sustainable budget deficit	
3.5 Interest parity and exchange risk	
3.6 Government borrowing from foreign banks	
3.7 Summary	
Problems for chapter 3	
Further reading	

III THE SHORT RUN	83
4 <i>Quantities and the Interest Rate</i>	85
4.1 The balance of payments constraint	
4.2 The goods sector	
4.3 The monetary sector	
4.4 Monetary changes and the balance of payments	
4.5 Expansionary policies with fixed exchange rates	
4.6 Income multipliers	
4.7 Summary Problems for chapter 4 Further reading	
5 <i>Quantities and the Exchange Rate</i>	109
5.1 Devaluation	
5.2 The Marshall–Lerner conditions	
5.3 Problems of Devaluation	
5.4 Floating exchange rates	
5.5 Fiscal expansion with floating rates	
5.6 Monetary expansion with floating rates	
5.7 Monetary policy and uncertainty	
5.8 Managed floats and the need for reserves	
5.9 Summary Problems for chapter 5 Further reading	
6 <i>Quantities and the Price Level</i>	127
6.1 The aggregate demand function	
6.2 A rise in the price level	
6.3 Rules versus discretion	
6.4 Inflation	
6.5 Consumption, income and inflation	
6.6 Summary Problems for chapter 6 Further reading	
IV ADJUSTMENT	143
7 <i>Tradeables and Non-Tradeables</i>	145
7.1 Two methods of disaggregating output	
7.2 Absorption and switching	
7.3 The structuralist theory of inflation	
7.4 The effect of oil price rises on oil importers	
7.5 The Dutch disease Problems for chapter 7 Further reading	
8 <i>Adjustments and Misperceptions</i>	169
8.1 The speculative demand for money	
8.2 Rational expectations equilibrium with misperceptions	
8.3 Exchange rate overshooting when output lags	
8.4 Exchange rate overshooting when the price level lags	
8.5 Hysteresis and tradeables	
8.6 Hysteresis and unemployment	
8.7 Summary Problems for chapter 8 Further reading	

Chapter 9 <i>Towards Harmony</i>	191
9.1 Harmonious monetary policies	
9.2 Harmonious fiscal policies	
9.3 Absorption, switching and the FEER	
9.4 Institutions	
9.5 Summary Problems for chapter 9	
Further reading
