Innsbruck, Austria

CONTENTS

Preface	13
<i>R. Margreiter. INNSBRUCK</i>	13
Trends in Bioenergetics. An Introduction	14
<i>E. Gnaiger, F.N. Gellerich. INNSBRUCK</i>	14
"German Ideology" as seen by Erwin Schrödinger in Letters to Hans Thirring. From Their Correspondence (1946 - 1949)	19
<i>G. Oberkofler, P. Goller. INNSBRUCK</i>	19

PART 1 WHAT IS NEGATIVE ENTROPY? FROM WORLD VIEWS TO BIOENERGETICS

Erwin Schrödinger's World View. The Role of Physics and Biology in his Philosophical System	23
<i>J. Götschl. GRAZ</i>	23
Science, Art and Revelation	32
<i>J. Wagensberg. BARCELONA</i>	32
Negentropy and Historical Arrow of Time - Thermodynamical and Informational Aspects of the Darwinian Revolution	38
<i>G.F. Azzone. PADOVA</i>	38
Negative Entropy: Another Approach	45
<i>C.P. Lantos. BUENOS AIRES</i>	45
Schrödinger's <i>What is Life?</i> : The Biophysical Legacy 50 Years Later	48
<i>G.R. Welch. NEW ORLEANS</i>	48
What is (Schrödinger's) Negentropy?	50
<i>M.-W. Ho. LONDON</i>	50
Negative Entropy for Living Systems. Controversy between Nobel Laureates Schrödinger, Pauling and Perutz	62
<i>E. Gnaiger. INNSBRUCK</i>	62
A Paradigm for Energy Balance in Muscle Function	71
<i>M.J. Kushmerick. SEATTLE</i>	71
A Controlled Chaotic Attractor Controls Life	77
<i>D. Lloyd. CARDIFF</i>	77
Disease as Instability, Error and Entropy	81
<i>G.F. Azzone. PADOVA</i>	81

PART 2

CONTROL AND REGULATION: THEORY, MODELS, AND EXPERIMENT

The Macro- and Microworld of Control Theory <i>B.N. Kholodenko, H.V. Westerhoff, M. Cascante.</i> <i>MOSCOW, AMSTERDAM, BARCELONA</i>	88
How Should we Quantify Metabolic Regulation? <i>J.-H.S. Hofmeyr, A. Cornish-Bowden. STELLENBOSCH, MARSEILLE</i>	91
Control and Regulation: The Best of Both Worlds <i>H.V. Westerhoff, P.R. Jensen, J.M. Rohwer, B.N. Kholodenko.</i> <i>AMSTERDAM, LYNGBY, MOSCOW</i>	95
Evolutionary Optimization of Enzymes on the Basis of Kinetic and Thermodynamic Principles <i>R. Heinrich, E. Klipp, A. Stephani, T. Wilhelm, BERLIN</i>	99
Detecting Elementary Modes of Functioning in Metabolic Networks <i>S. Schuster, C. Hilgetag, D.A. Fell. BERLIN, OXFORD</i>	103
Modular Control and Regulation. <i>A.A. van der Gugten, H.V. Westerhoff. AMSTERDAM</i>	106
Regulation of hierarchically organized metabolic systems. <i>J.-H.S. Hofmeyr, H.V. Westerhoff. STELLENBOSCH, AMSTERDAM</i>	106
Determining Elasticities from Measured Fluxes and Metabolite Concentrations: An Inverse Problem. <i>C. Giersch. DARMSTADT</i>	107
Measuring Elasticities by Means of the Multiple Modulation Method. <i>C. Giersch, L. Bartosch, S. Lenz. DARMSTADT</i>	108
Co-Response Analysis: A New Strategy for Experimental Metabolic Control analysis. <i>J.-H.S. Hofmeyr, A. Cornish-Bowden. STELLENBOSCH, MARSEILLE</i>	109
An Invariance Property of Co-response Coefficients in Modular Metabolic Control Analysis. <i>J.M. Rohwer, S. Schuster, H.V. Westerhoff. AMSTERDAM, BERLIN</i>	109
Error and Bias in Control Coefficient Values as a Consequence of the Non-Linearity of Matrix Method Equations. <i>S. Thomas, D.A. Fell. OXFORD</i>	110
Bistability and Irreversible Transitions in the PFK/F-1,6-P ₂ ase Cycle in Cell-Free Extracts from Rat Liver. <i>W. Schellenberger, J. Frenzel, K. Eschrich. LEIPZIG</i>	111
Irreversible Transitions between Stationary States in the F-6-P/F-1,6-P ₂ cycle in Yeast Extracts. <i>W. Schellenberger, J.-F. Hervagault. LEIPZIG, COMPIÈGNE</i>	111
Control over Electron Transfer between Ubiquinol and Cytochrome <i>c</i> During Light Driven Electron Transfer. <i>B.J. van Rotterdam et al. AMSTERDAM, STELLENBOSCH</i>	112
Computer Simulation of State 4 → State 3 Transitions in Isolated Mitochondria. <i>B. Korzeniewski. KRAKOW</i>	112
Control Analysis of Stimulation of Oxidative Phosphorylation in Heart Mitochondria by Calcium Ions. <i>V. Mildaziene et al. KAUNAS, MOSCOW, LONDON</i>	113
Top-Down Control Analysis of Palmitoyl-CoA Oxidation in Isolated Coupled Rat Liver Mitochondria. <i>R.A. Makins, P.A. Quant. Cambridge</i>	114
Object-Oriented Biochemical Simulation Applied to Systems of Dioxxygen Free Radical Reactions. <i>J.P.C. Moniz Barreto, J.H. Woods, D.A. Fell. OXFORD</i>	115
Control of the P _{II} Protein in the Glutamine Synthetase Adenylylation Cascade. <i>W.C. van Heeswijk et al. AMSTERDAM, CASTANET-TOLOSAN</i>	116
Protein Burden in <i>Zymomonas mobilis</i> : Negative Flux and Growth Control due to Overexpression of Recombinant Protein. <i>J.L. Snoep et al. GAINESVILLE, AMSTERDAM</i>	117
The Determination of Intracellular Fluxes and Intermediate Concentrations <i>In Vivo</i> by Magnetic Resonance Spectroscopy. <i>R. Schuster et al. BERLIN, BORDEAUX</i>	118

Is Light a Substrate? On Microscopic Reversibility of Light Reactions.

G. Meszéna, H.V. Westerhoff. BUDAPEST, AMSTERDAM 119

PART 3

COUPLING AND MECHANISMS IN THE REGULATION OF ELECTRON, ATP AND ION FLUXES

Leaks and Slips during Mitochondrial Electron Transfer <i>S. Luvisetto, M. Canton, I. Schmehl, G.F. Azzone. PADOVA</i>	122
Experimental Discrimination between Proton Leak and Redox Slip during Mitochondrial Electron Transport <i>M.D. Brand, L.-F. Chien, P.H. Diolez. CAMBRIDGE, BORDEAUX</i>	125
Permeability of the Inner Mitochondrial Membrane and Respiration <i>M. Canton, S. Luvisetto, I. Schmehl, G.F. Azzone. PADOVA</i>	129
The Uncoupling Mechanism of the Anesthetic Bupivacaine <i>I. Schmehl, M. Canton, S. Luvisetto, G.F. Azzone. PADOVA</i>	133
Influence of the Mechanism of Change in ATP Synthase-ATPase Stoichiometry on the Control of Oxidative Phosphorylation <i>in situ</i> <i>X. Leverve, E. Fontaine, P. Espié, C. Keriél, B. Guérin, M. Rigoulet.</i> <i>GRENOBLE, BORDEAUX</i>	137
ATP Synthesis in Permeabilized Cells: Assessment of the ATP/O Ratios <i>In Situ</i> <i>R. Ouhabi, M. Boue-Grabot, J.-P. Mazat. BORDEAUX</i>	141
Permeabilized Spheroplasts as a Tool for Studying the Mecha- nistic Stoichiometry of Yeast Oxidative Phosphorylation <i>V. Fitton, R. Ouhabi, B. Guérin, M. Rigoulet. BORDEAUX</i>	145
Investigations upon the Effect of Monovalent Cations on Oxidative Phosphorylation in Yeast Mitochondria <i>S. Manon, X. Roucou, M. Guérin. BORDEAUX</i>	150
Can Mitochondria Sequester Calcium from Physiological Calcium Pulses? <i>G. Sparagna, K.K. Gunter, S.-S. Sheu, T.E. Gunter. ROCHESTER</i>	154
Mitochondrial Calcium Spiking: The Physiological Face of Permeability Transition? <i>F. Ichas, L.S. Jouaville, S.S. Sidash, J.-P. Mazat,</i> <i>E.L. Holmuhamedov. BORDEAUX, PUSHCHINO, KALAMAZOO</i>	159
Developmental regulation of Na ⁺ , K ⁺ - and Ca ²⁺ -ATPases in muscle <i>M.J. Dauncey, T. Clausen, A.P. Harrison. CAMBRIDGE, ÅRHUS</i>	163
What is controlling the cell membrane potential? <i>J. Siegenbeek van Heukelom et al. AMSTERDAM, MOSCOW</i>	169
Effects of Propofol on the Ca ²⁺ -Induced Permeability Transition of Rat Heart Mitochondria. <i>F. Sztark et al. BORDEAUX</i>	174
The High Affinity Site of Beef Heart Cytochrome <i>c</i> Oxidase is not Electron Transfer Efficient. <i>F. Nicoletti et al. ROME, CAGLIARI</i>	174

PART 4
THE MICROENVIRONMENT OF MITOCHONDRIA AND CELLS:
DIFFUSION GRADIENTS, SHUTTLES AND SIGNALS

ADP Diffusion Gradients and Metabolic Oscillatory Signals to Mitochondria in Heart and Liver Cells <i>V.A. Saks, E.V. Vasilyeva, Z.A. Khuchua, Y.O. Belikova, M.K. Aliev, T. Kesvaterra, T. Tiivel, K. Anflous, R. Ventura-Clapier, Ch. Keriel, E. Fontaine, X. Leverve. TALLINN, MOSCOW, PARIS, GRENOBLE</i>	178
Effect of Macromolecules on ADP-Transport into Mitochondria <i>F.N. Gellerich, F.D. Laterveer, E. Gnaiger, K. Nicolay. UTRECHT, INNSBRUCK</i>	181
Macromolecules Increase the Channeling of ADP from Mitochondrially Associated Hexokinase to the Mitochondrial Matrix <i>F.D. Laterveer, F.N. Gellerich, E. Gnaiger, K. Nicolay. UTRECHT, INNSBRUCK</i>	186
How does Oxygen Pressure Control Oxygen Flux in Isolated Mitochondria? A Methodological Approach by High-Resolution Respirometry and Digital Data Analysis <i>G. Méndez, E. Gnaiger. INNSBRUCK, BUENOS AIRES</i>	191
Determination of Creatine Kinase Fluxes with Purified Creatine Kinase and Isolated Mitochondria using ³¹ P Nuclear Magnetic Resonance <i>S. Soboll, A. Conrad, M. Gruwel. DÜSSELDORF</i>	195
Oscillations of Intracellular pH or High Energy Phosphate Content Cannot be Detected by Gated NMR during the Cardiac Cycle of an Isovolumic Perfused Rat Heart <i>J.A. Hoerter, B. Gillet, P. Mateo, P. Lechene, J.-C. Beloeil. CHATENAY MALABRY, GIF S/YVETTE</i>	199
The Appearance of the ATP Concentration Gradient in the Intermembrane Space of Mitochondria. <i>T.Yu. Lipskaya, S.P. Bessman. MOSCOW, LOS ANGELES</i>	201
Energy Flow Around the Outer Mitochondrial Membrane. <i>O. Demin et al. MOSCOW, KAUNAS, UTRECHT, INNSBRUCK, AMSTERDAM</i>	201
How to Vary the Proportion of Dynamic Channelling Flux at Constant Total Flux. <i>P. Mendes, D.B. Kell, H.V. Westerhoff. ABERYSTWYTH, AMSTERDAM</i>	202
A New Approach to Knowledge-Based Potentials of Mean-Force in Polypeptides and Proteins. <i>J. Quedenau, H.-G. Holzhütter. Berlin</i>	203

PART 5
THE IMPACT OF BIOENERGETICS
ON CELLULAR, PHYSIOLOGICAL AND BIOTECHNOLOGICAL PROCESSES

Chemical Forces in the Cell: Calculations for the ATP System <i>E. Gnaiger, M. Wyss. INNSBRUCK</i>	207
The Flow-Force Relation of Oxidative Phosphorylation in Human Forearm Muscle is Sigmoidal <i>J.A.L. Jeneson, S.A. Jubrias, M.J. Kushmerick. UTRECHT, SEATTLE</i>	213

Muscular Contraction, Dissipation and Schrödinger's Negative Entropy <i>J. Mejsnar, F. Marsík. PRAHA</i>	215
Modelling of Oxidative Phosphorylation in <i>E. coli</i> <i>P.R. Jensen, J.M. Rohwer, O. Michelsen, H.V. Westerhoff. LYNGBY, AMSTERDAM</i>	218
Do Oscillations Control the Bacterial Cell Cycle? <i>I. Fishov. BEER-SHEVA</i>	221
A Thermochemical Study of the Production of Lactate by Glutaminolysis and Glycolysis in Mouse Macrophage Hybridoma Cells <i>R.B. Kemp, S. Hoare, M. Schmalfeldt, C.M.C. Bridge, P.M. Evans, E. Gnaiger. ABERYSTWYTH, INNSBRUCK</i>	226
Catabolic Capacity of Carbon- or Nitrogen-Starved Cultures of <i>Saccharomyces cerevisiae</i> <i>C. Larsson, A. Nilsson, L. Gustafsson. GÖTEBORG</i>	232
Energy Allocation and Material Flux in Fish Hepatocytes under Stress <i>G. Krumschnabel, W. Wieser. INNSBRUCK</i>	238
Carbon Flux in Lysine Producing Strain <i>Corynebacterium glutamicum</i> MH20-22B: Analysis by ¹³ C-NMR of Amino Acids and Metabolite Balancing <i>A. Marx, A.A. de Graaf, W. Wiechert, L. Eggeling, H. Sahm. JÜLICH</i>	240
Remarks on Biocalorimetry and Biothermodynamics Aimed at Characterization of the Physiological State <i>B. Zentgraf. FURTWANGEN</i>	244
The molecular origin of energy dissipation in mammals. <i>G.C. Brown. LONDON</i>	248
Comparison of Thermogenesis in Perfused Skeletal Muscle and Brown Adipose Tissue. <i>A. Matthias et al. Tasmania</i>	249
Mathematical Model of the Human Erythrocyte Describing its Physio- logical Function. <i>R. Krause, R. Schuster, H.-G. Holzhütter. BERLIN</i>	250
Control of Mitochondrial Oxidative Phosphorylation in Saponin-Skinned Rat <i>M. soleus</i> Fibers. <i>W.S. Kunz, E. Wisniewski, F.N. Gellerich. MAGDEBURG, INNSBRUCK</i>	250
Downregulation of Protein Synthesis and Turnover in Mitochondria during Cellular Quiescence. <i>S.C. Hand, K. E. Kwast, T.J. Ancho doguy. BOULDER</i>	251
Life, Death, Dormancy and Social Resuscitation in Non-Sporulating Bacteria. <i>D.B. Kell et al. ABERYSTWYTH, MOSCOW</i>	252
Energy Metabolism and Growth Kinetics of <i>Kluyveromyces marxianus</i> in Oxygen-dependent pH-auxostat Culture. <i>Ph. Groeneveld et al. AMSTERDAM</i>	254
Control of Glycolytic Oscillations in <i>Saccharomyces cerevisiae</i> . <i>B. Teusink, K. van Dam, H.V. Westerhoff. AMSTERDAM</i>	255
Information about Previous Phosphate Fluctuations in the Properties of the Phosphate Uptake System of a Blue-Green Alga. <i>G. Falkner, F. Wagner. SALZBURG</i>	256

PART 6
THE IMPACT OF BIOENERGETICS
ON CLINICAL AND PATHOLOGICAL PROBLEMS

The Permeability Transition Pore. Pathophysiology of a Cyclosporin A-sensitive Mitochondrial Channel <i>V. Petronilli, A. Nicolli, P. Costantini, R. Colonna, P. Bernardi. PADOVA</i> . . .	259
Mitochondrial Function in the Atrial Appendage of the Human Heart. Characterization by High-Resolution Respirometry <i>F.N. Gellerich, R. Steinlechner, M. Wyss, T. Eberl, L.C. Müller, D. Skladal, W. Sperl, O. Dapunt, R. Margreiter, E. Gnaiger. INNSBRUCK</i> . . .	263
Preservation of Mitochondrial Functions in Human Skeletal Muscle during Storage in High Energy Preservation Solution (HEPS) <i>D. Skladal, W. Sperl, R. Schranzhofer, M. Krismer, E. Gnaiger, R. Margreiter, F.N. Gellerich. INNSBRUCK</i>	268
Application of Control Analysis to the Study of Metabolic Diseases in Mitochondria. Metabolic Expression of Mitochondrial DNA Mutations <i>J.-P. Mazat, T. Letellier, M. Malgat, S. Jouaville, R. Morkuniene. BORDEAUX, KAUNAS</i>	272
Change in Flux Control Coefficient of Cytochrome c Oxidase in Copper Deficient Mottled Brindled Mice <i>A.V. Kuznetsov, J.F. Clark, K. Winkler, W.S. Kunz. MAGDEBURG, OXFORD</i> .	275
Insulin-Dependent Diabetes Mellitus in MELAS-Mitochondriopathy: Discussion of Possible Causal Relations <i>K. Oexle, J. Oberle, C. Hübner</i>	278
Simulation of the Flow-Force Relation of Oxidative Phosphorylation in Complex I Deficiency <i>J.A.L. Jeneson, H.V. Westerhoff. UTRECHT, AMSTERDAM</i>	280
Oxygen Dependence of Cellular Respiration in Endothelial Cells: A Sensitive Toxicological Test <i>R. Steinlechner, T. Eberl, R. Margreiter, E. Gnaiger. INNSBRUCK</i>	283
Endothelial Cell Cultures as a Model for Organ Preservation Studies <i>T. Eberl, R. Steinlechner, W. Salvenmoser, B. Abendstein, M. Rhomberg, H. Schröcksnadel, T. Schmid, E. Gnaiger, R. Margreiter. INNSBRUCK</i>	288
The Effect of 2-Chlorodeoxyadenosine on Endogenous Respiration of a Human Lymphoma Cell line (U-937) <i>A. Knoblochner, R. Steinlechner, M. Schirmer, F.N. Gellerich, R. Margreiter, G. Konwalinka, E. Gnaiger. INNSBRUCK</i>	294
Elasticity Analysis in Ischemia-Damaged Heart Mitochondria and Oxidative Phosphorylation System. <i>V. Borutaitė et al. KAUNAS, LONDON, CAMBRIDGE</i>	297
Kinetics of Tumor Necrosis Factor may Explain High Levels in Tumor Promotion and Chronic Inflammation. <i>H. Daams, D. Molenaar, H.V. Westerhoff. AMSTERDAM</i>	297
Control Analysis of Trypanosomal Glycolysis for Strategic Drug Design. <i>B.M. Bakker et al. AMSTERDAM, BRUSSELS</i>	299
Daunorubicin Transport in DNA-containing Plasma Membrane Vesicles from Multidrug-resistant Cells. <i>M. Guiral, J. Lankeima, Hans V. Westerhoff. AMSTERDAM</i>	300

PART 7
COMPUTER SOFTWARE FOR BIOENERGETICS
AND METABOLIC CONTROL ANALYSIS

Simultaneous Estimates of Single-Enzyme Kinetic Parameters for Multi-Enzymatic Systems Using Artificial Neural Networks
P. Mendes, D.B. Kell. ABERYSTWYTH 302

Design of a Software Framework for Flux Determination by ¹³C NMR Isotope Labelling Experiments
W. Wiechert. JÜLICH 305

Calorimetric Investigations with the AT-DSC Method (Alternating Temperature DSC). *J.E.K. Schawe, G.W.H. Höhne. ULM* 311

BioThermoKinetics and the Internet. *J.H. Woods, D.A. Fell. OXFORD* 311

ANNOUNCEMENTS

INULA. Vienna, Austria 314
