Preface, vii

Introduction, ix

Contributors, xv

## Part I. THEORY AND DATA FOR DEMAND ANALYSES

1. Concepts of Consumer Demand Theory, 3
2. Data Sources for Demand Analyses, 33
3. Data Problems in Demand Analyses: Two Examples, 54

## Part II. COMPLETE DEMAND SYSTEMS

4. Comparison of Estimates from Three Linear Expenditure Systems, 91
5. Persistence in Consumption Patterns: Alternative Approaches and an Application of the Linear Expenditure System, 114
6. Analysis of Household Demand for Meat, Poultry, and Seafood Using the S<sub>1</sub>-Branch System, 128
7. Analysis of Food and Other Expenditures Using a Linear Logit Model, 143
8. Complete Demand Systems and Policy Analysis, 154

**Part III. PARTIAL SYSTEMS: FACTORS INFLUENCING FOOD PURCHASES**

9. Partial Systems of Demand Equations with a Commodity Emphasis, 171
10. Socioeconomic, Demographic, and Psychological Variables in Demand Analyses, 186

**Part IV. POLICY ISSUES AFFECTING NUTRITION**

11. Consumer Demand for Nutrients in Food, 219
12. Food Consumption and Nutrient Intake Patterns of School-Age Children, 236
13. Impact of the Food Stamp Program on Food Expenditures and Diet, 255

**Index, 281**
