

# **Air Pollution and Conservation**

## **Safeguarding our Architectural Heritage**

Edited by

**Jan Rosvall**

Co-editor

**Stig Aleby**

*Published in Cooperation with  
Swedish Institute of Classical Studies in Rome  
Department of Conservation, University of Göteborg*

This material has also been published as a special issue of  
*Durability of Building Materials*, Vol. 5, Nos. 3 and 4.

**ELSEVIER**

**Amsterdam - Oxford - New York - Tokyo 1988**

## CONTENTS

Preface.....	vii
Opening Speech	
R. Pålsson (Stockholm, Sweden).....	1
Concluding Speech	
B. Ekman (Göteborg, Sweden) .....	3
Introduction to Air Pollution and Conservation	
J. Rosvall (Göteborg, Sweden).....	5
Declaration .....	21
Final Statement.....	22
<i>General Papers</i>	
Air pollution and conservation	
J. Rosvall (Göteborg, Sweden) .....	25
A short introduction to conservation of cultural property in Europe	
Sir Bernard M. Feilden (Wells next the Sea, Great Britain) .....	55
<i>Appendix: Manifesto (by William Morris, Founder of the Society for     Protection of Ancient Buildings, 1877) .....</i>	77
<i>Appendix: International Charter for the Conservation and     Restoration of Monuments and Sites .....</i>	79
Conservation principles and their theoretical background	
J. Jokilehto (Rome, Italy) .....	83
Conservation of historic masonry: The social and technical parameters	
J.M. Fitch (New York, NY, U.S.A.) .....	95
Air pollution — Historical trends	
P. Brimblecombe (Norwich, Great Britain) and H. Rodhe (Stockholm, Sweden) .....	107
<i>General scientific papers</i>	
Chemical–physical factors in stone deterioration	
A.E. Charola (Rome, Italy) .....	125
Environmental pollution in relation to stone decay	
V. Fassina (Venice, Italy) .....	133
Biotransformations in monuments – A sociobiological study	
W.E. Krumbein (Oldenburg, F.R.G.) .....	175
Air pollution and the conservation of building materials	
G. Torracca (Rome, Italy) .....	199
Air pollution in Rome and its role in the deterioration of porous building materials	
D. Brocco, A. Giovagnoli, M. Laurenzi Tabasso, M. Marabelli, R. Tappa and R. Polesi (Rome, Italy) .....	209
Mechanisms of deterioration in cement-based materials and in lime mortar	
P.W. Brown and J.R. Clifton (Gaithersburg, MD, U.S.A.) .....	225

Mechanisms of deterioration in ceramics and glass	
R. Carlsson (Göteborg, Sweden) .....	237
Ageing of plaster facades after renewal	
E. Engelbrektsson (Stockholm, Sweden) .....	245
Corrosion of calcareous stones in humid air containing SO <sub>2</sub> and NO <sub>2</sub>	
L.-G. Johansson, O. Lindqvist and R.E. Mangio (Göteborg, Sweden) .....	255
<i>Area surveys and specific studies</i>	
Assessment of the impact of a proposed oil refinery on Taj Mahal in India	
D. Bose (Calcutta, India) .....	267
Effects of air pollution on the monuments in Ankara — Case study: Temple of Augustus	
E.N. Caner, E.H. Göktürk, A.K. Türkmenoğlu and G. Eseller (Ankara, Turkey) .....	279
Factors of deterioration of the built environment in Greece — Approaches to conservation — Effects of air pollution	
D.A. Zivas (Athens, Greece) .....	291
Ancient marble monuments in Rome: A contribution to their conservation	
M.L. Conforto and G. Martines (Rome, Italy) .....	311
Air pollution and decay of architectural monuments in the city of Cracow	
J. Haber, H. Haber, R. Kozłowski, J. Magiera and I. Pluska (Cracow, Poland) .....	315
Stone deterioration on the Cathedral of Cologne	
P.W. Mirwald (Dortmund, F.R.G.), K. Kraus (Siegen, F.R.G.) and A. Wolff (Köln, F.R.G.) .....	365
Deterioration of architecture in Scandinavia — Effects of air pollution on stone	
T. Andersson (Stockholm, Sweden) .....	387
A case study on the deterioration of stone: The Cathedral Well (Domkyrkobrunnen) in Göteborg	
O. Lindqvist, R.E. Mangio, L.E. Olsson and J. Rosvall (Göteborg, Sweden) .....	397
<i>Appendix: "Guidelines" — A working model for case studies on the deterioration of stone</i> .....	420
