

# Metal Complex–DNA Interactions

Edited by

NICK HADJILIADIS

*Department of Chemistry, University of Ioannina, Greece*

and

EINAR SLETTEN

*Department of Chemistry, University of Bergen, Norway*

 **WILEY**

A John Wiley & Sons, Ltd., Publication

# Contents

<i>Preface</i>	Page <b>xiii</b>
<i>List of Contributors</i>	<b>xv</b>
<i>Acknowledgements</i>	<b>xix</b>
<b>A BASIC STRUCTURAL AND KINETIC ASPECTS</b>	<b>1</b>
<b>1 Sequence-Selective Binding of Transition Metal Complexes to DNA</b>	<b>3</b>
<i>Einar Sletten and Nils Åge Frøystein</i>	
1.1 Introduction	3
1.2 <i>Ab initio</i> Calculations and Photo-Cleavage Studies	6
1.3 NMR Spectroscopic Studies of Metal Binding to DNA Oligonucleotides	9
1.4 Summary of Theoretical and Experimental Evidence for Sequence-Selective Binding to DNA	22
1.5 Sequence-Specific Groove Binding	22
Abbreviations	26
References	26
<b>2 Thermodynamic Models of Metal Ion–DNA Interactions</b>	<b>31</b>
<i>Vasil Bregadze, Eteri Gelagutashvili and Ketevan Tsakadze</i>	
2.1 Introduction	31
2.2 Interactions of Metal Ions with DNA	33
2.3 Model and Mechanisms of Metal-Induced Formation of Point Defects	43
2.4 Conclusions	48
Acknowledgements	49
Abbreviations	49
References	50

<b>3</b>	<b>Metal Ion Coordination in G-Quadruplexes</b>	<b>55</b>
	<i>Janez Plavec</i>	
3.1	Introduction	55
3.2	Cation Coordination and Stability of G-Quadruplexes	59
3.3	Structure of Sequences Consisting of Human Telomere Repeats	61
3.4	G-Quadruplexes Adopted by Promoter Regions	64
3.5	Bimolecular G-Quadruplexes of Analogues of the <i>Oxytricha</i> Telomere Repeat	67
3.6	Coordination of Cations within d[(TG <sub>4</sub> T) <sub>4</sub> ]	69
3.7	Coordination of Cations within d[(G <sub>4</sub> T <sub>4</sub> G <sub>4</sub> ) <sub>2</sub> ]	73
3.8	Cation Movement within G-Quadruplexes	78
3.9	Summary	80
	Acknowledgements	81
	References	81
<b>4</b>	<b>Supramolecular Chemistry of Metal–Nucleobase Complexes</b>	<b>95</b>
	<i>P. J. Sanz Miguel, P. Amo-Ochoa, O. Castillo, A. Houlton and F. Zamora</i>	
4.1	Introduction	95
4.2	Discrete Architectures	98
4.3	Infinite Architectures	108
4.4	Overview of Metal Coordination Sites and Base-Base Hydrogen Bonding	121
4.5	M-DNA	124
4.6	Conclusion	127
	Acknowledgements	127
