

PALEOECOLOGY

Concepts and Applications

Second Edition

J. Robert Dodd

*Professor of Geology
Department of Geology
Indiana University*

Robert J. Stanton, Jr.

*Professor of Geology
Department of Geology
Texas A & M University*

WILEY

A WILEY-INTERSCIENCE PUBLICATION

JOHN WILEY & SONS

New York / Chichester / Brisbane / Toronto / Singapore

Contents

PREFACE TO SECOND EDITION	vii
PREFACE TO FIRST EDITION	ix
1 INTRODUCTION	1
Definitions and Subject Matter / 1	
Objectives and Organization of This Book / 4	
The Data Base in Paleoecology / 5	
The Nature of the Fossil Record / 10	
2 TAXONOMIC UNIFORMITARIANISM	13
Environmental Parameters / 21	
Currents / 23	
<i>Global Circulation / 24</i>	
<i>Local Currents / 27</i>	
<i>Biological Effects / 29</i>	
Temperature / 32	
<i>Vertical Variation / 35</i>	

Geographic Variation / 35

Biological Effects / 35

Salinity / 39

Nutrient Elements (Productivity) / 45

Vertical Variation / 45

Geographic Variation / 46

Temporal Contrast / 49

Biological Effects / 49

Depth / 51

Dissolved Oxygen / 53

Substrate / 57

Nonmarine Factors / 60

Ancient Taxonomic Uniformitarianism / 63

3 BIOGEOCHEMISTRY

69

Skeletal Mineralogy / 71

Mineral Components / 71

Factors Controlling Skeletal Mineralogy / 75

Geologic Application of Skeletal Mineralogic Data / 82

Trace Chemistry / 83

Factors Controlling Trace Chemistry / 83

Geologic Application of Trace Chemical Relationships / 99

Isotopic Techniques / 91

Physical Chemistry / 92

Measurement of Isotopic Ratios / 95

Physiologic (Genetic) Factors / 97

Environmental Factors / 99

Geologic Applications of the Isotopic Technique / 112

4 SKELETAL STRUCTURE

125

Growth Mechanism / 126

Foraminifera / 131

Anthozoa / 135

Mollusca / 144

Shell Structure Types / 144

Skeletal Banding / 148

Skeletal Banding in Other Fossil Groups / 153

5 ADAPTIVE FUNCTIONAL MORPHOLOGY

157

Theory / 157

Adaptive Functional Morphology Studies / 171

Morphologic Distribution Patterns and Gradient / 171

Theoretical Morphology / 172

Analysis of Specific Structures / 177

6 ICHNOLOGY

191

The Trace Fossil Record / 192

Trace Fossil Classification / 194

Environment and Behavior / 197

Environmental Stress and Predation / 197

Food, Water Energy, and Sedimentation / 201

Oxygen / 204

Trace Fossil Analysis and Environmental Interpretation / 206

Distribution Patterns and Ichnofacies / 206

Trace Fossil Abundance / 210

Trace Fossils as Clues to Sedimentation / 212

Sediment Strength / 212

Rate of Sedimentation / 213

Hardgrounds and Depositional Hiatuses / 213

Applications in Sedimentology / 214

Organisms as Agents of Sedimentation / 219

Stratification / 220

Texture / 220

<i>Sediment Destruction and Construction</i>	221
<i>Chemical Effects</i>	221

7 TAPHONOMY	223
--------------------	------------

Taphonomic Processes / 224

Necrolysis / 224

Biostratinomy / 230

Fossil Diagenesis / 248

Applications / 252

Evaluation of the Quality of the Fossil Record / 252

Paleoenvironmental Reconstruction / 256

Taphofacies / 268

8 POPULATIONS IN PALEOECOLOGY	277
--------------------------------------	------------

Population Growth / 278

Population Size Variation / 283

Modern Examples / 283

Opportunistic and Equilibrium Species / 286

Fossil Opportunistic and Equilibrium Species / 288

Population Structure / 290

Age- and Size-Frequency Plots / 290

Life Tables and Survivorship Curves / 297

Information from Population Structure / 305

Examples of Population Dynamics Studies / 305

Dispersion Patterns / 310

Random Distribution / 312

Regular Distribution / 314

Clumped Distribution / 314

Dispersion in Fossils / 315

Morphologic Variation / 318

9	ECOSYSTEMS AND COMMUNITIES IN PALEOECOLOGY	323
	The Community Concept / 324	
	Community Recognition / 328	
	<i>Q-Mode Analysis / 328</i>	
	<i>R-Mode Analysis / 329</i>	
	Taxonomic-Uniformitarian Analysis / 330	
	Community Structure Analysis / 331	
	Diversity Terminology / 332	
	Diversity Measures / 333	
	<i>Richness / 334</i>	
	<i>Dominance Diversity / 335</i>	
	<i>Evenness / 337</i>	
	Diversity Causes and Patterns / 337	
	<i>Time / 339</i>	
	<i>Stability / 342</i>	
	<i>Resource / 344</i>	
	Trophic Structures / 345	
	Applications of the Community in Paleoenvironmental Reconstruction / 350	
	<i>Taxonomic Uniformitarian Analysis / 350</i>	
	<i>Community Structural Analysis / 364</i>	
10	PALEOBIOGEOGRAPHY: THE PROVINCIAL LEVEL	385
	Concepts / 387	
	Factors Controlling Geographic Distribution of Species / 389	
	<i>Depth-Elevation / 389</i>	
	<i>Temperature / 390</i>	
	<i>Other Environmental Parameters / 394</i>	
	<i>Geologic History / 396</i>	
	Island Biogeography / 401	
	Defining Provincial Boundaries / 404
