1 INTRODUCTION	3
1.1 Changes in the perception and analysis of technological change	3
1.2 Technological change and institutions	6
1.3 Research and development, innovation and firm organisation	9
1.4 Static and dynamic perspectives	14
1.5 The problem of aggregation	15
1.6 Some methodological questions	17
1.7 Technological change and public policy	19
2 THE FIRM, PRODUCTION AND TECHNICAL CHANGE	23
2.1 The neo-classical theory of production	24
2.2 Post neo-classical theory of the firm	29
2.3 Managerial motivation	32
2.4 Firm structure	34
2.5 Technical change and the theory of the firm	39
2.6 Conclusion	48
3 RESEARCH AND DEVELOPMENT IN THE FIRM: I. STRATEGY AND STRUCTURE	50
3.1 Introduction	50

3.2	The theoretical context of R & D strategy formulation	51
3.3	The determination of the R & D budget	55
3.4	The allocation of resources to major activities within R & D	60
3.5	Allocation of resources to broad areas	62
3.6	Allocation of resources to objectives within areas	64
3.7	Conclusion	67
4	RESEARCH AND DEVELOPMENT IN THE FIRM: II. ORGANISATION AND EXECUTION	70
4.1	Introduction	70
4.2	R & D projects	70
	Origins of projects	70
	Project evaluation and selection	74
	Monitoring and control	82
4.3	The organisation of the R & D function	84
4.4	Conclusion	88
 PART II ECONOMIC ANALYSIS AND TECHNOLOGICAL CHANGE		
5	PATTERNS OF INNOVATION	93
5.1	The demand pull/technology push debate I: theoretical ancestry	94
5.2	The demand pull/technology push debate II: empirical studies	96
5.3	Induced innovation	104
5.4	Innovation firm size and market structure	109
× 5.5	Technology, the selection environment and the firm	114
5.6	The diffusion of technological innovation	120
	The epidemics model	121
	Criticisms of the epidemics model and alternatives	124
5.7	Conclusion	133
6	TECHNOLOGICAL CHANGE, OUTPUT, EMPLOYMENT AND TRADE	135
6.1	Classical economists and economic growth	138

6.2	The Harrod–Domar model	139
6.3	Neo-classical models of economic growth	140
6.4	Heterodox approaches	145
× 6.5	An evolutionary approach to economic growth	146
6.6	Pasinetti’s model of economic growth and structural change	149
6.7	Technological change and unemployment	151
6.8	Technological change and international trade	153
6.9	Conclusion	163
7	TECHNOLOGY AND STRUCTURAL CHANGE: OUTPUT AND EMPLOYMENT IN THE LONG RUN	165
7.1	Structural change	165
7.2	Long waves of economic growth	172
7.3	Neo-Schumpeterian theories of long waves	175
7.4	The role of the labour market	182
7.5	Institutional innovation in long waves	190
7.6	Information technology and the current long wave	193
7.7	Conclusion	195
PART III POLITICAL AND SOCIAL ASPECTS OF TECHNOLOGICAL CHANGE		
8	GOVERNMENT INTERVENTION IN TECHNICAL CHANGE	199
8.1	Introduction	199
8.2	The possibility of intervention	202
8.3	Why does government intervene?	205
8.4	Historical background to government intervention	212
9	THE PROMOTION AND CONTROL OF TECHNOLOGY BY GOVERNMENT	223
9.1	Introduction	223
9.2	Labour government policies for promotion of technology	224
9.3	Conservative policies for promotion of technology	229

9.4	The examples of aero engines and motor vehicles	233
9.5	Government policy and microelectronics	235
9.6	Some pre-conditions for government control of technology	238
9.7	Control of technology: attempts to anticipate the need for regulations	240
9.8	Mechanisms for the control of technology	241
9.9	Assessment of risk in the control of technology: the philosophy behind regulations	243
9.10	Institutions for control of technology in the UK	246
9.11	The effect of regulation on innovation	251
9.12	Conclusions	253
10	NON-GOVERNMENT INFLUENCES ON TECHNICAL CHANGE	255
10.1	Introduction	255
10.2	Public participation in technology policy	256
10.3	The trade union movement	259
10.4	Pressure groups	264
10.5	Conflict and consensus	268
10.6	The role of experts	271
11	SUMMARY AND CONCLUSION	273
	<i>Bibliography</i>	279
	<i>Index</i>	293
