# Contents

<i>Preface</i>	xi
<i>About the Authors</i>	xiii
<i>Acknowledgements</i>	xv
<i>Note to Instructors</i>	xvii
<i>Instrumentation</i>	xix
<i>Nomenclature</i>	xxi
<i>Introduction</i>	xxiii
<i>Conceptual Outline for Experiments</i>	xxiii
<i>Experimental Procedures</i>	xxiii
<i>Laboratory Safety</i>	xxv
<i>General Operating Procedures</i>	xxvi
<b>PART 1 – Manipulation of DNA</b>	<b>1</b>
Reference	2
Lab Session 1   Getting Oriented: Practicing with Micropipettes	3
Station Checklist	3
Micropipetting	4
Micropipetting Self-Test	6
Laboratory Exercise: BSA Serial Dilutions and Nitrocellulose Spot Test	7
Preparing BSA Dilutions	7
Performing a Nitrocellulose Spot Test	7
Discussion Questions	9
Lab Session 2   Purification and Digestion of Plasmid (Vector) DNA	11
Introduction to Plasmid Purification	11
Alkaline Lysis	11
Silica Adsorption	12
DNA Quantification	12
Introduction to Expression Vectors	12
Principles of Gene Expression	13
Expression Vectors	13

	Orientation and Reading Frame	14
	Orientation	14
	Reading Frame	15
	Laboratory Exercises	16
	Alkaline Lysis and Silica Adsorption Protocol	16
	DNA Quantification	18
	Restriction Digestion of Expression Vector DNA pET-41a, a GST Fusion Protein Vector	19
	Discussion Questions	20
	Reference	20
Lab Session 3	PCR Amplification of <i>egfp</i> and Completion of Vector Preparation	21
	Introduction	21
	What is the Polymerase Chain Reaction (PCR)?	21
	Why Clone by PCR?	23
	TA Cloning	23
	PCR Cloning by Incorporation of Restriction Sites	23
	Cloning Synthetic Genes	24
	Laboratory Exercises	25
	PCR Amplification of <i>egfp</i> from the pEGFP-N1 Plasmid	25
	PCR Protocol	25
	Clean-up of Digested pET-41a Vector	25
	Agarose Gel Electrophoresis	27
	Discussion Questions	29
	References	29
Lab Session 4	Preparation of Insert DNA ( <i>egfp</i> ) PCR Product	31
	Check PCR Reactions on an Agarose Gel	31
	Spin Column Cleanup of PCR Product	31
	Quantification of <i>egfp</i> PCR Product	31
	Restriction Digestion of <i>egfp</i> PCR Product	32
	Removing Enzymes and Cleaning Digested DNA Using a Spin Column	32
	Discussion Questions	33
Lab Session 5	DNA Ligation and Transformation of <i>Escherichia coli</i>	35
	Introduction	35
	Ligation	35
	Transformation	36
	Laboratory Exercises	37
	Ligations and Ligation Controls	37
	Divalent Cation-Mediated Transformation	39
	Electrophoresis of Ligation Reactions	39
	Discussion Questions	40
	Reference	40
	<b>PART 2 – Screening Transformants</b>	<b>41</b>
Lab Session 6	Colony Hybridization	43

Lab Session 6A	Interim Laboratory Session	44
	Introduction	44
	Laboratory Exercises	44
	Counting Transformants and Replica Plating	44
	Replica Plating	44
Lab Session 6B	Colony Hybridization: Monoclonal Antibody Probe	46
	Introduction	46
	Laboratory Exercises	47
	Colony Hybridization with an $\alpha$ -EGFP Monoclonal Antibody Probe: Part 1	47
Lab Session 6	Discussion Questions	49
Lab Session 7	Characterization of Recombinant Clones: Part 1	51
Lab Session 7A	Completion of Colony Hybridization with a Monoclonal Antibody Probe	52
	Introduction	52
	Laboratory Exercise	52
	Colony Hybridization with an $\alpha$ -EGFP Monoclonal Antibody Probe: Part 2	52
Lab Session 7B	PCR Screening	54
	Introduction	54
	Laboratory Exercise	54
	Polymerase Chain Reaction Screen for Recombinant Clones	54
Lab Session 7C	Prepare Fresh Replica Plate	57
Lab Session 7	Discussion Questions	57
Lab Session 8	Characterization of Recombinant Clones: Part 2	59
Lab Session 8A	Interim Laboratory Session	60
	Laboratory Exercise	60
	Inoculate Cultures for Minipreps	60
Lab Session 8B	Analysis of PCR Screen Results	61
	Introduction	61
	Laboratory Exercise	61
	Gel Electrophoresis and Analysis of PCR Samples from Last Week	61
Lab Session 8C	Isolation of Miniprep DNA from Potential Transformants	62
	Introduction	62
	Laboratory Exercise	63
	Isolation of Miniprep DNA from Potential Transformants	63
	Plasmid DNA Purification Using the QIAprep Spin Miniprep Kit and a Microcentrifuge	63

Lab Session 8D	Visualization of Green Fluorescent Protein: Part 1	65
	Introduction	65
	Laboratory Exercise	65
	Green Fluorescence Assay and Preparation of a Fresh Master Plate	65
Lab Session 8	Discussion Questions	66
Lab Session 9	Characterization of Recombinant Clones: Part 3	67
Lab Session 9A	Characterization of Miniprep DNA from Potential Transformants (Restriction Enzyme Analysis of Putative Transformants)	68
	Introduction	68
	Laboratory Exercise	68
	Restriction Enzyme Analysis of Miniprep DNA	68
Lab Session 9B	Visualization of Green Fluorescent Protein: Part 2	70
	Introduction	70
	Laboratory Exercise	70
	Visualization of Clones Expressing the Enhanced Green Fluorescent Protein on IPTG Plates	70
Lab Session 9C	Computational Analysis of DNA Sequence from a Positive Clone: Part 1	72
	Introduction	72
	Laboratory Exercise	74
	References	76
Lab Session 9	Discussion Questions	76
Lab Session 10	Computational Analysis of DNA Sequence from a Positive Clone: Part 2	77
	Introduction	77
	Laboratory Exercise	81
	Discussion Questions	85
	Reference	85
<b>PART 3 – Expression, Detection and Purification of Recombinant Proteins from Bacteria</b>		<b>87</b>
Lab Session 11	Expression of Fusion Protein from Positive Clones, SDS-PAGE and Western Blot: Part 1	89
Lab Session 11A	Interim Laboratory Session	90
	Laboratory Exercise	90
	Inoculate Cultures for SDS-PAGE	90
Lab Session 11B	Expression of Fusion Protein from Positive Clones, SDS-PAGE and Western Blot	91
	Introduction	91
	Laboratory Exercise	93
	SDS-PAGE and Western Blot: Part 1	93
	Reference	97
Lab Session 11	Discussion Questions	97

Lab Session 12	Expression of Fusion Protein from Positive Clones, SDS-PAGE and Western Blot: Part 2	99
	Introduction	99
	Laboratory Exercises	99
	SDS-PAGE and Western Blot: Part 2	99
	Replica Plate Positive Clone	101
	Discussion Questions	101
Lab Session 13	Extraction of Recombinant Protein from <i>Escherichia coli</i> Using a Glutathione Affinity Column	103
Lab Session 13A	Interim Laboratory Session	104
	Laboratory Exercise	104
	Inoculate Cultures for Protein Purification	104
Lab Session 13B	Extraction of Recombinant Protein from <i>Escherichia coli</i> and Purification Using a Glutathione Affinity Column	105
	Introduction	105
	Laboratory Exercises	108
	Growing Bacterial Suspension Cultures for Fusion Protein Purification	108
	Harvesting IPTG-Induced Cultures	108
	Breaking Open Bacterial Cells	108
	Removing Insoluble Debris from the Crude Homogenate	109
	Purifying Protein by Affinity Chromatography	109
Lab Session 13	Discussion Questions	111
Lab Session 14	Analysis of Purification Fractions	113
Lab Session 14A	Analysis of Purification Fractions	114
	Introduction	114
	Laboratory Exercises	115
	SDS-PAGE of Purified Fusion Protein	115
	Fluorescence Analysis of Affinity Purification	116
Lab Session 14B	Replica Plate Positive Clone	120
Lab Session 14	Discussion Questions	120
<b>PART 4 – Analysis of mRNA Levels</b>		<b>121</b>
	Challenges of Working with RNA	122
	References	123
Lab Session 15	Total RNA Purification	125
Lab Session 15A	Interim Laboratory Session	126
	Laboratory Exercise	126
	Inoculate Cultures for RNA Purification	126

Lab Session 15B	Total RNA Purification	127
	Introduction	127
	Laboratory Exercises	129
	Purification of Total RNA	129
	DNase Digestion	131
	Quantification of RNA	131
	References	132
Lab Session 15	Discussion Questions	132
Lab Session 16	Analysis of <i>gst::egfp</i> mRNA Levels by RT-qPCR: Part 1	133
	Introduction	133
	Reverse Transcription	134
	Quantitative PCR	135
	Laboratory Exercises	137
	Reverse Transcription	137
	Quantitative PCR (qPCR)	138
	Discussion Questions	140
	Reference	140
Lab Session 17	Analysis of <i>gst::egfp</i> mRNA Levels by RT-qPCR: Part 2	141
	Introduction	141
	Laboratory Exercise	144
	Relative Quantification of <i>gst::egfp</i> Levels	144
	References	146
	Discussion Questions	146
Lab Session 18	Analysis of <i>gst::egfp</i> mRNA Levels by Semi-Quantitative RT-PCR: Part 1	147
	Introduction	147
	Laboratory Exercises	148
	Reverse Transcription (RT)	148
	Semi-Quantitative PCR	148
	Discussion Questions	151
Lab Session 19	Analysis of <i>gst::egfp</i> mRNA Levels by Semi-Quantitative RT-PCR: Part 2	153
	Introduction	153
	Laboratory Exercises	153
	Agarose Gel Electrophoresis	153
	Quantification	154
	Discussion Questions	155
	Reference	155
	<i>Appendix 1: Equipment</i>	157
	<i>Appendix 2: Prep List</i>	159
	<i>Appendix 3: Preparation of Competent E. coli Cells</i>	181
	<i>Appendix 4: Pre-Lab Questions</i>	185
	<i>Index</i>	197
