Technology, Duality, and Foreign Trade:

The GNP Function Approach to Modeling Imports and Exports

Ulrich Kohli University of Geneva

Pref Maj	Preface Major symbols		
1	Intro	oduction	1
	1.1 1.2 1.3	Duality theory, production theory, and trade theory Empirical work in international trade Outline Notes	1 5 15 16
Par	t 1:	Theoretical concepts	19
2	The	duality between production and cost functions	21
	2.1 2.2 2.3 2.4 2.5	The production possibilities set Production functions Cost functions The link between direct and inverse demand elasticities The Cobb-Douglas functional form Notes	22 22 25 27 29 31
3	Join	cost functions and variable profit functions	32
	3.1 3.2 3.3	Joint cost functions Variable profit functions The variable profit function in the Cobb-Douglas case Notes	32 35 39 41

	4			
4	Non	jointness and separability	42	
	4.1	Nonjoint production	42	
	4.2	Global separability between inputs and outputs	47	
	4.3	Weak separability	49	
	4.4	Production in the HOS model of international trade		
•		theory	51	
	4.5	Production in the specific-factors model	53	
		Notes	56	
Par	t 2:	The GNP function approach to modeling impor	ts	
		and exports	59	
5	The	GNP function approach to modeling the demand for		
	imp	imports		
	5.1	A simple model of import determination	63	
	5.2	Generalization to many factors	69	
	5.3	Interpreting import price elasticities	71	
		Notes	76	
6	The	GNP function approach to modeling the supply of exports	78	
	6.1	Exports and nontraded goods	78	
	6.2	Balanced trade	81	
	6.3	Generalization to many factors and many goods	85	
		Notes	88	
Pai	rt 3:	Empirical implementation	89	
· 7	Fun	ctional forms	91	
	7.1	Functional forms for cost functions	92	
	7.2	Functional forms for variable profit functions	97	
		Notes	102	
8	Oth	er technical issues	103	
	8.1	Technological change	103	
	8.2	Curvature conditions	107

	F	Content	S IX
Par	t 4:	"Closed-economy" models	121
9	Aggr	egate production and revenue functions	123
	9.1	A Translog production function	124
	9.2	A Generalized-Leontief production function	128
	9.3	A Translog joint revenue function	130
	9.4	A Generalized-Linear Generalized-Leontief joint	
		revenue function	134
	9.5	Global separability between inputs and outputs	137
		Notes	139
10	The l	Heckscher—Ohlin—Samuelson and the specific-factors	
	mod	els	142
	10.1	A GLGL joint cost function	142
	10.2	Nonjoint production	146
	10.3	The Heckscher-Ohlin-Samuelson model: estimates	148
	10.4	A two-by-two Leontief model	149
	10.5	A specific-factors model	150
		Notes	154
Pai	rt 5:	The demand for imports and the supply of	
		exports	157
11	Prod	uction and the demand for imports	159
	11.1	The production function approach to the demand for	
		imports	161
	11.2	The cost function approach to the demand for imports	164
	11.3	The GNP function approach to the demand for imports	167
	11.4	GNP price and quantity elasticities: indirect estimates	170
	11.5	Separability between imports and domestic factors	173
		Notes	178
12	The	GNP function, the demand for imports, and the	
	supp	ly of exports in the short run and the medium run	180
	12.1	A Translog GNP function and the derived demand for	
		imports and supply of exports	181
	12.2	Separability of outputs	185
	12.3	Labor as a variable input	189
	12.4	Medium-run elasticities: direct estimates	193
		INCLES	105
