

Microbial Metabolism and the Carbon Cycle

A symposium in honor of Stanley Dagley

Papers presented at a meeting held at the University of Minnesota in St. Paul and at the Gray Freshwater Biological Institute in Navarre, Minnesota, July 13-16, 1987.

Edited by

Scott R. Hagedorn

Contents

Preface	xi
1. Symposium Perspective	
Microbial Catabolism and the Carbon Cycle: A Perspective <i>Stanley Dagley</i>	3
Pathways to Understanding <i>Peter J. Chapman</i>	15
Those Were the Days: An Affectionate Retrospect <i>Edwin A. Dawes</i>	23
2. Microbial Catabolism	
Microbial Catabolism of Aromatic Hydrocarbons and the Carbon Cycle <i>David T. Gibson</i>	33
Natural Puzzles: Alicyclic Rings and Things <i>Peter Trudgill</i>	59
More About Phthalates <i>Douglas W. Ribbons</i>	85
Aromatic Metabolism by Mycelial Organisms: Actinomycete and Fungal Strategies <i>Ronald B. Cain</i>	101
3. Anaerobic Microbial Metabolism	
Degradative Metabolism of Aromatic Compounds in Anaerobic Environments <i>W. Charles Evans</i>	147

Anaerobic Growth of Bacteria on Benzoate Under Denitrifying Conditions <i>George Hegeman</i>	181
Procedures for Investigation of the Role of Inorganic Polyphosphates in Metabolism <i>Harland G. Wood, Joan E. Clark, Catherine A. Pepin, and Nancy A. Robinson</i>	191
Fermentative Degradation of Aromatic Compounds <i>Bernhard Schink and Andreas Tschsch</i>	213
Enzymes, Coenzymes, and Intermediates of Methanogenesis From Carbon Dioxide <i>Mark I. Donnelly and Ralph S. Wolfe</i>	227
4. Microbial Enzymology	
Properties of p-cresol Methylhydroxylases <i>David J. Hopper</i>	247
Mechanisms of Catecholic Dioxygenases <i>John D. Lipscomb, James W. Whittaker, David M. Arciero, Allen M. Orville, and Sanford A. Wolgel</i>	259
Enzyme Chemistry and Evolution in the β -Ketoacid Pathway <i>John W. Kozarich</i>	283
Oxygen Biochemistry at the Surface of the Skin <i>Karin U. Schallreuter and John M. Wood</i>	303
5. Microbial Genetics	
The <i>Pseudomonas</i> Genome—Its Analysis and Organization <i>B.W. Holloway</i>	327
Organisation of and Relationships Between Catabolic Genes of TOL Plasmids <i>Peter A. Williams, Linda E. Gibb, Heinrich Keil, and David J. Osborne</i>	339

CONTENTS

ix

Unity and Diversity in the Degradation of Xylenols by
Pseudomonas spp.: A Model for the Study of
Microbial Evolution
Ronald Bayly, Rakesh Jain, Chit Laa Poh, and Ronald Skurray 359

Genetic Studies of Methanol Metabolism in the Facultative
Methylotroph, *Methylobacterium Organophilum* Strain XX
*Sara Machlin, Patricia E. Tam, Larry Allen, and
Richard S. Hanson* 381

Sugar and Spice and All That's Nice—The Contribution of
Escherichia Coli to the Carbon Cycle
Ronald A. Cooper 393

Genetic Analysis of Carbohydrate Metabolism in *Pseudomonas*
Paul V. Phibbs, Jr. 413

Expression and Complementation of Naphthalene Dioxygenase
Activity in *Escherichia Coli*
Burt D. Ensley 437

6. Potential Applications of Microbial Metabolism

Poly- β -Hydroxybutyrate: An Intriguing Biopolymer
Edwin A. Dawes 459

Microbial Transformations of Toluene to Commodity Chemicals
S.R. Hagedorn and P.C. Maxwell 471

7. Poster Session 489

Index 515
