CONTRIBUTORS	ix
PREFACE	xi

The Structural Basis of Integrin–Ligand (RGD) Interaction

JEFFREY W. SMITH

I. Introduction	1
II. General Structural Features of Integrins	2
III. Integrins, RGD, and Aspartic Acid	4
IV. Early Analysis of the Integrin–Ligand (RGD) Binding Site	6
V. Integrin-Derived Synthetic Peptides Mimic Receptor–Ligand Interactions	8
VI. The Role of Divalent Cations in Ligand Binding	11
VII. The Activation State of Integrins: Platelet Integrin $\alpha_{IIb}\beta_3$ as a Prototype	19
VIII. Molecular Mimicry of Integrin Adhesive Sequences	21
IX. Toward a Three-Dimensional Structure for Integrins and Their Ligands	23
X. Knowledge of Integrin Ligands Used to Engineer Integrin-Specific Antibodies	24
XI. Summary	27
References	31

Integrins as Signal Transducing Receptors

MARTIN A. SCHWARTZ

I. Introduction	33
II. Gene Expression	34
III. Tyrosine Phosphorylation	35
IV. Protein Kinase C	37
V. Intracellular Calcium	38
VI. Intracellular pH	40
VII. Inositol Lipid Metabolism	42
VIII. Summary and Perspectives	43
References	44

Interactions between Integrins and the Cytoskeleton: Structure and Regulation

KEIKO O. SIMON and KEITH BURRIDGE

I. Introduction	49
II. Historical Background	49
III. Integrin–Cytoskeletal Interactions: β Subunits	54
IV. Integrin–Cytoskeletal Interactions: α Subunits	58
V. Cytoskeletal Interactions in Focal Adhesions	59
VI. Molecular Biology Approaches	60
VII. Epithelial Cell Integrins	65
VIII. Assembly of Focal Adhesions	66
IX. Future Directions	69
References	69

Integrins, Signaling, and the Remodeling of the Extracellular Matrix

JOHN ASHKENAS, CAROLINE H. DAMSKY, MINA J. BISSELL, and ZENA WERB

I. Introduction	79
II. Integrins as Transducers of Information from the ECM	80
III. Regulation of ECM Remodeling Influences Information Flow from the ECM	83
IV. Integrins Regulate Expression of Matrix Metalloproteinases	86
V. Integrins and Proteinases Are Partners in Regulating the Invasive Phenotype of Cells in Normal and Pathological Processes	90
VI. Integrins in Cellular Invasion during Peri-implantation Development	92
VII. Integrin-Mediated Cell–ECM Interactions and ECM Remodeling Have Reciprocal Effects on Tissue-Specific Gene Expression	96
VIII. Manipulating ECM Remodeling in the Mammary Gland	98
References	103

Integrins in Development

THOMAS LALLIER, MARK D. HENS, and DOUGLAS W. DESIMONE

I. Introduction	111
II. Integrin Expression during Development	113
III. Integrin Function in Development	123
IV. Regulation of Integrin Expression and Function in Development	129
V. Conclusions	132
References	133

Distinctive Functions of $\alpha 6\beta 4$ and Other Integrins in Epithelial Cells

VITO QUARANTA, RICHARD N. TAMURA, GINETTA COLLO,
HELEN M. COOPER, MARKETTA HORMIA, CARLA ROZZO, GUIDO GAETTA,
and LISA STARR

I. Introduction	141
II. Epithelial Cell Integrins	142
III. Conclusions	157
References	158

Leukocyte Integrins

MARIANO J. ELICES

I. Introduction	163
II. The Integrin $\alpha 4\beta 1$ (VLA-4)	164
III. The $\beta 2$ Integrin Subfamily	172
IV. The Integrin $\alpha 4\beta 7$ (LPAM-1)	178
V. Future Prospects	180
References	180

Molecular Properties of Human Platelet Integrin $\alpha_{IIB}\beta_3$

THOMAS J. KUNICKI and ZAVERIO M. RUGGERI

I. Introduction	195
II. Platelet Integrins	196
III. The α_{IIB} Subunit	197
IV. The β_3 Subunit	200
V. Assembly and Properties of the $\alpha_{IIB}\beta_3$ Complex	201
VI. Calcium Dependence of $\alpha_{IIB}\beta_3$ Complex Integrity	204
VII. Signal Transduction through $\alpha_{IIB}\beta_3$	204
VIII. Molecular Mechanisms of $\alpha_{IIB}\beta_3$ Receptor Function	207
IX. Molecular Models of the RGD Binding Site	212
X. Role of Divalent Cations in Ligand Binding Mediated by RGD	217
XI. Cytoskeleton and Intermediate Filament Proteins: Association with $\alpha_{IIB}\beta_3$	218
XII. Relevance of $\alpha_{IIB}\beta_3$ Antigenicity to the Structure-Function of This Integrin	219
XIII. Conclusion	224
References	224

Therapeutic Potential of Integrin Antagonists**JEFFREY M. STADEL, ANDREW J. NICHOLS, DONALD R. BERTOLINI, and
JAMES M. SAMANEN**

I. Introduction	237
II. Thrombosis, Platelets, and α_{IIb}/β_3	239
III. Osteoporosis: Role of Adhesion in Bone Remodeling	257
IV. Conclusions	264
References	265
INDEX	273
