The Macroeconomics of Self-Fulfilling Prophecies

Roger E. A. Farmer

The MIT Press
Cambridge, Massachusetts
London, England

Contents

	List of Figures	xi
	Preface	xiii
1	**Introduction**	1
	1.1 Equilibrium Theory as an Approach to Macroeconomics	1
	1.2 A Preview of the Argument	3
	1.3 An Example	4
	1.4 Concluding Remarks	8
2	**Linear Difference Equations: Part 1**	11
	2.1 Introduction	11
	2.2 Linearizing Nonlinear Models	11
	2.3 Solving First-Order Linear Models	17
	2.4 Solving Higher-Order Linear Models	24
	2.5 Concluding Remarks	38
3	**Linear Difference Equations: Part 2**	39
	3.1 Introduction	39
	3.2 Linear Rational Expectations Models	39
	3.3 Solving Linear Rational Expectations Models	45
	3.4 Cross-Equation Restrictions and the Lucas Critique	50
	3.5 Concluding Remarks	55
4	**General Equilibrium Theory under Certainty**	57
	4.1 Introduction	57
	4.2 The Idea of Equilibrium	60
	4.3 The Theory of Consumer Choice	61
	4.4 Excess Demand Functions	64
	4.5 Equilibria and Their Properties	67
	4.6 General Equilibrium Theory and Efficient Allocations of Resources	72
	4.7 Concluding Remarks	76
5	**Infinite Horizon Economies and Representative Agents**	77
	5.1 Introduction	77
	5.2 The Representative Agent Economy	80

	5.3	Competitive Equilibrium and the Planner's Problem	86
	5.4	Using the Representative Agent Model to Explain Time Series Data	90
	5.5	Concluding Remarks	101
6	**Infinite Horizon Economies and Overlapping Generations**		103
	6.1	Introduction	103
	6.2	The Structure of the Overlapping Generations Economy	104
	6.3	The Consumer's Problem	105
	6.4	An Example of a Pareto Inferior Equilibrium	107
	6.5	Institutions That May Improve Allocations	108
	6.6	The Set of Equilibria in the Overlapping Generations Model	110
	6.7	Some Questions about the Model	116
	6.8	More General Examples of Overlapping Generations Economies	120
	6.9	Concluding Remarks	123
7	**Infinite Horizon Economies with Nonconvexities**		125
	7.1	Introduction	125
	7.2	A Growth Model with Increasing Returns	126
	7.3	Empirical Evidence for Increasing Returns	132
	7.4	Equilibria in the Increasing Returns Economy	136
	7.5	Comparing the Theoretical Properties of RA and IR Models	138
	7.6	Comparing Some Empirical Predictions of RA and IR Models	143
	7.7	Concluding Remarks	149
8	**General Equilibrium Theory and Uncertainty**		151
	8.1	Introduction	151
	8.2	Debreu's Formulation of the Problem	151
	8.3	Arrow's Formulation of the Problem	157
	8.4	Infinite Horizon Economies with Uncertainty	162
	8.5	Concluding Remarks	168

9	**Sunspots**	171
	9.1 Introduction	171
	9.2 Do Sunspots Matter?	172
	9.3 An Example of a Macroeconomic Model in Which Sunspots Matter	177
	9.4 Concluding Remarks	188
10	**Macroeconomic Models of Money**	189
	10.1 Introduction	189
	10.2 Models of Money	191
	10.3 The Dynamics of a Cash-in-Advance Model	197
	10.4 Equilibrium under Interest Rate Control	201
	10.5 Equilibrium under a Fixed Money Growth Rate Rule	208
	10.6 Concluding Remarks	211
11	**Applied Monetary Theory**	213
	11.1 Introduction	213
	11.2 The Monetary Facts: What There Is to Explain	214
	11.3 A Simple Monetary Model: Using Equilibrium Theory to Explain the Facts	217
	11.4 How Do Equilibria Behave?	226
	11.5 Concluding Remarks	233
	Notes	235
	Bibliography	243
	Name Index	249
	Subject Index	251
