

The Epic History of Biology

Anthony Serafini

PLENUM PRESS • NEW YORK AND LONDON

Contents

CHAPTER 1.	THE BEGINNINGS	1
CHAPTER 2.	MESOPOTAMIA	9
CHAPTER 3.	GREEK MEDICINE	15
CHAPTER 4.	ROME	45
CHAPTER 5.	THE MIDDLE AGES	55
CHAPTER 6.	THE RENAISSANCE	59
CHAPTER 7.	PESTILENCE IN THE RENAISSANCE	69
CHAPTER 8.	THE AGE OF VESALIUS	75
CHAPTER 9.	THE HARVEY ERA	89

CHAPTER 10.	THE AGE OF NEWTON	103
CHAPTER 11.	THE MICROSCOPE AND LEEUWENHOEK	111
CHAPTER 12.	THE MEETING OF BIOLOGY AND CHEMISTRY	117
CHAPTER 13.	RAY AND THE EMERGENCE OF CELL THEORY	125
CHAPTER 14.	THE AGE OF LINNAEUS AND THE ENLIGHTENMENT	139
CHAPTER 15.	LAMARCK AND HIS SYSTEM	171
CHAPTER 16.	THE RISE OF PALEONTOLOGY	185
CHAPTER 17.	BIOLOGY IN THE VICTORIAN ERA	195
CHAPTER 18.	DARWIN AND HIS AGE	209
CHAPTER 19.	EMBRYOLOGY AND BIOCHEMISTRY IN THE DARWINIAN ERA	233
CHAPTER 20.	THE AGE OF PASTEUR AND THE DEVELOPMENT OF THE MICROSCOPE	249
CHAPTER 21.	BIOLOGY IN THE TWENTIETH CENTURY	269
CHAPTER 22.	T. H. MORGAN AND THE RISE OF GENETICS	291

CHAPTER 23.	ON THE TRAIL OF DNA	331
CHAPTER 24.	EVOLUTION AND GENETIC ENGINEERING	363
EPILOGUE		371
ENDNOTES		373
INDEX		377
