Contents

Introduction

R. A. Gayer

vii

Part I – Finnmarkian Geology

1. **U–Pb ages of nepheline syenite pegmatites from the Seiland Magmatic Province, N Norway**
R. B. Pedersen, G. R. Dunning and B. Robins 3
2. **Chronology of Caledonian tectonothermal activity within the Gaissa and Laksefjord Nappe Complexes (Lower Allochthon), Finnmark, Norway: evidence from K–Ar and $^{40}\text{Ar}/^{39}\text{Ar}$ ages**
R. D. Dallmeyer, A. Reuter, N. Clauer and N. Liewig 9
3. **Regional correlations in NE Troms–W Finnmark: the demise of the “Finnmarkian” orogeny?**
R. E. Binns 27
4. **Evidence of intracratonic Finnmarkian orogeny in central Norway**
D. Tietzsch-Tyler 47
5. **The timing of orogenesis in northern Norway: did the Finnmarkian orogeny occur?**
C. Townsend and R. A. Gayer 63

Part II – Regional Geology

6. **The Middle Allochthon in Västerbotten, northern Sweden: tectonostratigraphy and tectonic evolution**
R. O. Greiling 69
7. **The Middle Allochthon of the Scandinavian Caledonides at Kvikkjokk, northern Sweden: sedimentology and tectonics**
R. O. Greiling and R. Kumpulainen 79
8. **Age Relationships between Normal and Thrust Faults near the Caledonian Front at the Vietas Hydropower Station, Northern Sweden**
L. Hansen 91
9. **Basement-cover evolution during Caledonian orogenesis, Troms, N Norway**
M. W. Anderson 101
10. **The structure and stratigraphy of the southwestern portion of the Gaissa Thrust Belt and the adjacent Kalak Nappe Complex, Finnmark, N Norway**
C. Townsend, A. H. N. Rice and A. Mackay 111
11. **Palaeogeographic reconstruction of the pre- to syn-Iapetus rifting sediments in the Caledonides of Finnmark, N Norway**
R. A. Gayer and A. H. N. Rice 127

Part III – Igneous Geology

12. **Basic igneous rocks from a portion of the Jotun Nappe: evidence for Late Precambrian ensialic extension of Baltoscandia?**
T. F. Emmett 143

13. **The geochemistry of the Sulitjelma ophiolite and associated basic volcanics: tectonic implications**
A. P. Boyle 153
14. **Xenolithic dykes on Seiland and preliminary observations on the lithospheric mantle beneath the Seiland Province, W Finnmark, Norway**
J. M. Leaver, M. C. Bennett and B. Robins 165

Part IV – Metamorphic Geology

15. **Evolution of low-grade metamorphic zones in the Caledonides of Finnmark, N Norway**
A. H. N. Rice, R. E. Bevins, D. Robinson and D. Roberts 177
16. **Metamorphic evolution of the Caledonian nappes of north central Scandinavia**
A. J. Barker 193
17. **High-pressure ultramafic rocks from the allochthonous nappes of the Swedish Caledonides**
H. L. M. van Roermund 205
18. **Status of the supracrustal rocks in the Western Gneiss Region, S Norway**
I. Bryhni 221

Part V – Palaeontology and Biostratigraphy

19. **The stratigraphy and faunas of the Parautochthon and Lower Allochthon of southern Norway**
D. L. Bruton, D. A. T. Harper and J. E. Repetski 231

Part VI – Devonian Geology

20. **Microtectonic evidence of Devonian extensional westward shearing in southwest Norway**
A. Chauvet and M. Séranne 245

Part VII – East Greenland Caledonian Geology

21. **The Late Proterozoic sedimentary record of East Greenland: its place in understanding the evolution of the Caledonide Orogen**
M. J. Hambrey 257
22. **Carbonate shelf and slope facies evolution prior to Vendian glaciation, central East Greenland**
P. M. Herrington and I. J. Fairchild 263
23. **Dolomitic stromatolite-bearing units with storm deposits from the Vendian of East Greenland and Scotland: a case of facies equivalence**
I. J. Fairchild 275
24. **The Tillite Group and related rocks of East Greenland: implications for Late Proterozoic palaeogeography**
A. C. M. Moncrieff 285
25. **The structural setting of the Late Proterozoic tillites of East Greenland**
G. M. Manby and M. J. Hambrey 299
