CONTENTS

Preface	xi
1. History and Morphology of the Lysosome	1
<i>Renate Lüllmann-Rauch</i>	
Morphology of Lysosomes	2
History of the Lysosome Concept	11
2. Transport of Lysosomal Enzymes	17
<i>Stephan Storch and Thomas Bräulke</i>	
Synthesis and Modifications of Soluble Lysosomal Proteins	17
Formation of Mannose 6-Phosphate Recognition Marker	18
Mannose 6-Phosphate Receptors	19
Signal Structure-Dependent Trafficking of MPRs	20
Sorting Functions of Mannose 6-Phosphate Receptors	21
Delivery to the Endosomal/Lysosomal Compartment	21
Mannose 6-Phosphate Receptor-Independent Pathways	21
Perspectives	22
3. Adaptor Proteins in Lysosomal Biogenesis	27
<i>Peter Schu</i>	
Heterotetrameric Adaptor-Protein Complexes	27
Membrane Binding of Adaptor-Proteins	29
Adaptor-Protein Sorting Pathways	30
Coadaptor Proteins	32
4. Lysosomal Membrane Proteins	37
<i>Paul Saftig</i>	
LAMPs and LIMPs as Major Components of the Lysosomal Membrane	39
LAMP-Deficient Mice	40
Intracellular Trafficking of the Major Lysosomal Membrane Glycoproteins	42
Less Abundant Integral Components of the Lysosomal Membrane	43
Perspectives	46
5. Lysosomal Proteases: Revival of the Sleeping Beauty	50
<i>Klaudia Brix</i>	
Expression and Distribution of Lysosomal Proteases	51
Importance of the in Situ Determination of Proteolytic Activities	52
Functions of Lysosomal Proteases	53

6. Lysosomal Storage Disorders	60
<i>Ole Kristian Greiner-Tollersrud and Thomas Berg</i>	
The Lysosomal Storage Disorders	62
Defects in Glycan Degradation	62
Defects in Glycoprotein Degradation (Glycoproteinoses)	62
Defects in Glycolipid Degradation	64
Degradation of G _{M1} Ganglioside	66
Degradation of Sulfatide	66
Degradation of Globotriaosylceramide	66
Defects in Glycosaminoglycan Degradation (Mucopolysaccharidoses)	66
Defects in Glycogen Degradation	68
Defects in Lipid Degradation	68
Defects in Protein Degradation	68
Defects in Lysosomal Transporters	69
Defects in Trafficking	69
7. Lysosomal Transporters and Associated Diseases	74
<i>Frans W. Verheijen and Grazia M.S. Mancini</i>	
The Lysosomal Membrane and Storage Diseases	74
Cystinosis, CTNS and Cystinosis	76
Sialin, SLC17A5 and Sialic Acid Storage Disease	77
CLN3 and Batten Disease (Juvenile Ceroid Lipofuscinosis)	78
NPC1 and Niemann-Pick Disease	78
SLC36A1 Encoding LYAAT-1, a Transporter for Small Neutral Amino Acids	79
MCOLN1, Mucolipin and Mucopolipidosis Type IV	79
TCIRG-1 and CICN7, A3 Subunit ATPase and Chloride Channel 7, Lysosomal Acidification Disorder, Infantile Malignant Osteopetrosis (Albers-Schonberg Disease)	79
8. Neuronal Ceroid-Lipofuscinoses	82
<i>Jaana Tyynelä</i>	
Classification and Genetics	82
Clinical Characteristics	84
Neuronal Degeneration	84
Neuronal Storage Material	86
Palmitoyl-Protein Thioesterase 1 (PPT1)	86
Tripeptidyl Peptidase I (TPPI)	88
Cathepsin D	89
CLN3 Protein	90
CLN5, CLN6 and CLN8 Proteins	90
Animal Models	91
Pathogenetic Considerations	93

9. Cholesterol Transport in Lysosomes	100
<i>Judith Storch and Sunita R. Cheruku</i>	
Intracellular Cholesterol Transport	100
Endogenously Synthesized Cholesterol Transport	101
Exogenously Derived Cholesterol Transport	102
Mechanism of Cholesterol Transport from Lysosomes	104
Lysosomal Cholesterol Transport Candidates:	
Niemann-Pick C Disease	104
NPC1	105
NPC2	106
10. Therapy of Lysosomal Storage Diseases	112
<i>Ulrich Matzner</i>	
Lysosomal Storage Diseases	112
Enzyme Replacement Therapy	116
Transplantation Therapy	117
In Vivo Gene Therapy	120
Enzyme Enhancement Therapy	122
Substrate Reduction Therapy	123
11. Lysosomal Proteome and Transcriptome	130
<i>Jobst Landgrebe and Torben Lübke</i>	
Analysis of Lysosomal Structure and Function Using Proteomics and Transcriptomics	130
Proteome Analysis of Lysosomal Proteins	130
Transcriptome Analysis of Lysosome Functions	137
12. External Lysosomes: The Osteoclast and Its Unique Capacities to Degrade Mineralised Tissues.....	144
<i>Vincent Everts and Wouter Beertsen</i>	
The Osteoclast as a Highly Polarized Proton-Secreting Cell	144
13. Membrane Resealing Mediated by Lysosomal Exocytosis	156
<i>Norma W. Andrews</i>	
"Secretory" Lysosomes	156
Ca ²⁺ -Regulated Secretion of Conventional Lysosomes	158
Regulation of Lysosomal Exocytosis by Synaptotagmin VII	158
14. Macroautophagy in Mammalian Cells.....	166
<i>Eeva-Liisa Eskelinen</i>	
Macroautophagic Pathway	166
Induction and Regulation of Macroautophagy	171
Functions of Autophagy	172
Autophagy Genes	173
Quantitation of Autophagy	175
Guidelines for Identification of Autophagic Vacuoles in Transmission Electron Microscopy	177
Future of Autophagy	177

15. Chaperone-Mediated Autophagy	181
<i>Erwin Knecht and Natalia Salvador</i>	
Distinctive Characteristics of Chaperone-Mediated Autophagy	184
Lysosomes Can Take Up Selectively Ribonuclease A and Other Proteins from Cytosol	185
An Amino Acid Sequence of Ribonuclease A Is Essential for Its Selective Lysosomal Targeting	185
The Selective Lysosomal Pathway for the Degradation of Proteins Containing KFERQ-Like Sequences Is Active in Various Cell Types under Certain Conditions	187
Molecular Chaperones Participate in the Selective Lysosomal Transport of Proteins	187
LAMP2a Is a Receptor Protein in the Lysosomal Membrane for the Entry of Proteins from the Cytosol into Lysosomes by Chaperone-Mediated Autophagy	189
Index	195
