CONTENTS

Preface

xiii

PART I

Confocal Microscopy: Practical Considerations

1. Introduction to Confocal Three-Dimensional Volume Investigation

John K. Stevens

I. Introduction to Volume Investigation	3
II. Data Collection: The Image Stack	8
III. Segmenting the Image Stack	13
IV. Three-Dimensional Visualization	15
V. Three-Dimensional Analysis	21
VI. Value of Volume Investigation	23
References	24

2. Background Rejection and Optimization of Signal to Noise in Confocal Microscopy

D. R. Sandison, D. W. Piston, and W. W. Webb

I. Introduction	29
II. Calculations	32
III. Signal	35
IV. Background	36
V. Signal-to-Background Ratio	38
VI. Signal-to-Noise Ratio	40
VII. Discussion	42
References	45

3. Sources of Noise in Three-Dimensional Microscopical Data Sets

James B. Pawley

I. Introduction	48
II. Notional Specimens	49
III. Three-Dimensional Fluorescence Microscopy	50
IV. Signal and Contrast in Three-Dimensional Microscopy	52
V. Noise Sources in Three-Dimensional Microscopy	54
VI. Noise in Confocal Microscopy	58
VII. Noise in Wide-Field Method	74
VIII. Conclusions	89
References	90

4. Simultaneous Ultraviolet and Visible Wavelength Confocal Microscopy

A. Christyne Bliton, James D. Lechleiter, and David E. Clapham

I. Introduction	95
II. Design and Principle	95
III. Summary	99
References	100

5. Fluorescent Labels for Confocal Microscopy

Sam Wells and Iain Johnson

I. Introduction	101
II. Criteria for Fluorescent Dye Selection	102
III. Excitation	105
IV. Photobleaching	112
V. Signal Detection and Isolation	115
VI. Intermolecular Perturbations: Environmental Effects	121
VII. Conclusions	125
References	126

6. Display Methods for Gray-Scale, Voxel-Based Data Sets

Victoria Interrante, William Oliver, Stephen Pizer, and Henry Fuchs

I. Indirect Methods	132
II. Direct Methods for Display of Surfaces in Binary Data	138
III. Direct Binary Methods for Display of Surfaces in Gray-Scale Data	140

IV. Direct Binary Methods for Display of Intensity Distributions in Gray-Scale Data	142
V. Direct Nonbinary Methods for Display of Gray-Scale Data	142
VI. Object Definition and Segmentation	151
VII. Conclusions	160
References	160
7. Three-Dimensional Volume Reconstruction in Confocal Microscopy: Practical Considerations	
Robert Bacallao and Alan Garfinkel	
I. Introduction	169
II. Theory of Confocal Microscopy	171
III. Specimen Preparation	172
IV. Optimization of Fixation Protocols	173
V. Volume Reconstructions	174
VI. Examples of Three-Dimensional Reconstruction	178
VII. Conclusion	179
References	180

PART II

Biological Applications of Confocal Microscopy

8. Imaging Ion Channels in Live Central Neurons Using Fluorescent Ligands. I. Ligand Construction	
Owen T. Jones, Elizabeth J. Koncz, and Austin P. So	
I. Introduction	183
II. Design of Probes	185
III. Introduction of Labels	194
IV. Purification of Labels	199
V. Solvent Removal and Storage of Purified Conjugates	202
VI. Characterization of Probes	203
References	207
9. Imaging Ion Channels in Live Central Neurons Using Fluorescent Ligands. II. Labeling of Cells and Tissues	
Owen T. Jones, Elizabeth J. Koncz, and Austin P. So	
I. Labeling of Cells and Tissues	215
II. Problems	223

III. Limitations of Labeling Ion Channels with Fluorescent Ligands	228
IV. Future Applications and Developments	229
References	230
10. Expression of G Protein-Coupled Receptors in Baculovirus/Sf9 Cells: Imaging Receptor Distribution by Confocal Fluorescence Microscopy	
Roman L. Zastawny, Gordon Y. K. Ng, Judy E. Trogadis, Susan R. George, John K. Stevens, and Brian F. O'Dowd	
I. Introduction	233
II. Structure and Function of G Protein-Coupled Receptors	235
III. G Proteins and Regulation of Receptor Function	238
IV. Expression of G Protein-Coupled Receptors by Baculovirus/Sf9 Cells	240
V. Studying Behavior of Receptors by Scanning Confocal Microscopy	246
References	250
11. Dynamic Intracellular Calcium Compartments: Confocal Microscopy Using Fluo-3 in Cells and Organelles	
Linda R. Mills	
I. Introduction	254
II. Methods	255
III. Results	258
IV. Discussion	272
References	277
12. Confocal Microscopy of Living Eggs and Embryos	
Stephen A. Stricker	
I. Introduction	281
II. Factors Affecting <i>in Vivo</i> Studies Using Epifluorescent Confocal Microscopy	282
III. <i>In Vivo</i> Developmental Studies Using Confocal Microscopy	289
IV. Confocal Microscopy of Development: Advantages and Future Directions	297
References	298

13. Spatial Organization of Microtubules in PC12 Cells: Three-Dimensional Electron Microscopy and Confocal Microscopy Applied to Volume Investigation

Judy E. Trogadis and John K. Stevens

I. Introduction	301
II. Techniques	302
III. Results	310
IV. Discussion of Results	314
V. Roles of Electron and Confocal Microscopy in Volume Investigation	317
References	320

14. Confocal Imaging of Living Neurons and Organelles

Linda R. Mills, Charles E. Niesen, and Robert Kerr

I. Introduction	325
II. Practical Aspects of Confocal Microscopy and Three-Dimensional Reconstruction	326
III. Imaging Living Neurons in Three Dimensions	329
IV. Labeling of Subcellular Mechanisms Involved in Neuronal Calcium Regulation	335
V. Three-Dimensional Reconstructions	344
VI. Summary	347
References	347

15. Confocal Microscopy in Diagnostic Cytology

Mathilde E. Boon, Gerda Sutedja-Bol, and L. P. Kok

I. Introduction	353
II. Exploiting Confocal Microscopy	354
III. Techniques	355
IV. Application in Cervical Cytology	356
V. Applications in Effusion Cytology	366
VI. Resolution	369
VII. Conclusions	374
References	374

16. Confocal Microscopy in Diagnostic Pathology

Richard P. Dutrieux, Madeleine M. C. Bosch, Gerda Sutedja-Bol, L. P. Kok, and Mathilde E. Boon

I. Introduction	377
II. High-Resolution Imaging	379

III. Stereoscopy	381
IV. Confocal Image Analysis in Paraffin Sections	387
V. Confocal Staining Procedures	389
References	393

PART III

Alternative Approaches and Future Applications

17. Ultrathin Optical Sectioning and Dynamic Volume Investigation with Conventional Light Microscopy

Shinya Inoué

I. Introduction	397
II. Conventional Light Microscopy	398
III. Image Resolution and Contrast in Conventional and Confocal Light Microscopy	402
IV. Ultrathin Optical Sections with Conventional Light Microscopy	404
V. Examples of Three- and Four-Dimensional Imaging and Analysis with Conventional Light Microscopy	414
References	418

18. Serial Electron Microscopy as an Alternative or Complement to Confocal Microscopy for the Study of Synapses and Dendritic Spines in the Central Nervous System

Kristen M. Harris

I. Introduction	421
II. Series Sample Analysis	424
III. Three-Dimensional Reconstruction from Serial Electron Microscopy	433
IV. Summary and Cautions	442
References	442

19. Confocal Scanning Ophthalmoscopy: Applying Laser Scanning Technology to Retinal Imaging

Andreas Plesch

I. Introduction	447
II. Principles of Confocal Scanning Laser Ophthalmoscopy	449

III. Applications and Results	455
IV. Future Applications and Developments	465
References	466
20. Use of Three-Dimensional Reconstructed Magnetic Resonance Imaging Data for Neurosurgical Planning	
Ron Kikinis, Matthew R. Moore, Ferenc A. Jolesz, William E. Lorensen, Harvey E. Cline, Philip E. Stieg, P. Langham Gleason, Mitsunori Matsumae, and Peter McL. Black	
I. Introduction	470
II. Clinical Material and Methods	471
III. Illustrative Case Reports	473
IV. Results	482
V. Discussion	483
References	488
Index	491
