

M. Falcke D. Malchow (Eds.)

Understanding Calcium Dynamics

Experiments and Theory

Springer

Contents

1. Regulation of IP₃ Receptors by IP₃ and Ca²⁺	1
<i>Colin W. Taylor and Jane E. Swatton</i>	
1.1. An Introduction to IP ₃ Receptors.....	1
1.2. Biphasic Regulation of IP ₃ -Evoked Ca ²⁺ Mobilization by Cytosolic Ca ²⁺	2
1.3. Effects of Ca ²⁺ on IP ₃ Binding to its Receptors.....	4
1.4. Activation of IP ₃ Receptors by Cytosolic Ca ²⁺	6
1.5. Inhibition of IP ₃ Receptors by Cytosolic Ca ²⁺	8
1.6. Conclusions	11
References	11
2. The Endoplasmic Reticulum: A Central Player in Cell Signalling and Protein Synthesis.	17
<i>H. Llewelyn Roderick, Michael J. Berridge and Martin D. Bootman</i>	
2.1. ER Structure	17
2.2. Role of the ER in Ca ²⁺ Signalling	19
2.3. The ER as a Ca ²⁺ Storage Organelle.....	19
2.4. Ca ²⁺ Signaling from the ER.....	20
2.5. Signalling from the Inside Out	24
2.6. Role of Ca ²⁺ in Protein Folding Within the ER.....	25
2.7. ER Plasticity and Distal Consequences.....	27
2.8. Conclusion.....	28
References	28
3. Mitochondrial and ER Calcium Uptake and Release Fluxes and their Interplay in Intact Nerve Cells	37
<i>David D. Friel</i>	
3.1. Introduction	37
3.2. Orientation, Basic Principles and Terminology.....	38
3.3. Case 1: Cytoplasmic Ca ²⁺ Dynamics under the Control of Plasma Membrane Transport	41
3.4. Case 2: Coupled Dynamics of Cytoplasmic and Intramitochondrial Calcium Concentrations - Mitochondria as Reversible, [Ca ²⁺] _i - Regulated Ca ²⁺ Buffers.....	43
3.5. Case 3: Coupled Dynamics of Cytoplasmic and Endoplasmic Reticular Calcium Concentrations - Multiple Modes of Ca ²⁺ -Induced Ca ²⁺ Release	51
3.6. Case 4: Coupled Dynamics of Cytoplasmic, Mitochondrial and Endoplasmic Reticular Calcium - Mitochondria as Regulators of CICR Modes.....	57

3.7 Summary and Questions for Future Study	60
References	64
4. Global and Local Regulation of Neuronal Differentiation by Calcium Transients	67
<i>Nicholas C. Spitzer</i>	
4.1. Introduction	67
4.2. Calcium Spikes	68
4.3. Growth Cone Calcium Transients	72
4.4. Filopodial Calcium Transients	79
4.5. Conclusions	79
References	81
5. Role of NAADP in Coordinating Spatiotemporal Aspects of Calcium Signalling	85
<i>Grant C. Churchill and Antony Galione</i>	
5.1. The Properties of NAADP are Distinct from IP ₃ and cADPR	85
5.2. Spatial and Temporal Control of Ca ²⁺ Signals	86
5.3. NAADP Mediates Ca ²⁺ Waves by Diffusion	88
5.4. NAADP-Mediated Ca ²⁺ Responses are Amplified by CICR	89
5.5. Model for the Control of Spatial Ca ²⁺ Signalling by NAADP	90
5.6. NAADP-Induced Ca ²⁺ Oscillations via a Two-Pool Mechanism	91
5.7. Summary	93
References	93
6. Models of Cardiac Ca²⁺-Induced Ca²⁺ Release and Ca²⁺ Sparks	97
<i>Eric A. Sobie, M. Saleet Jafri, W. J. Lederer</i>	
6.1. Introduction	97
6.2. Why Model Cardiac CICR?	99
6.3. A Straightforward, but Problematic, Model of CICR	99
6.4. Why is Cardiac CICR Graded?	102
6.5. Models of Cardiac Ca ²⁺ Sparks	104
6.6. Mechanisms of Ca ²⁺ Spark Termination	106
6.7. Current Unanswered Questions	107
6.8. Conclusions	109
Appendix	109
References	111
Color Figures	115
7. Hormone-Mediated Intercellular Calcium Signalling in an Insect Salivary Gland - Pathways and Mechanisms	119
<i>Bernhard Zimmermann and Bernd Walz</i>	
7.1. Introduction	119
7.2. The Temporal Pattern of 5-HT-Induced Intracellular Calcium Changes	120

7.3. Subcellular Organization of Calcium Waves	123
7.4. Regenerative Intercellular Calcium Waves - Phenomenology	124
7.5. The Mechanisms of Intra- and Intercellular Calcium Waves	125
7.6. Mitochondria Modulate the Frequency of InsP_3 -Induced Calcium	127
References	128
8. From Simple to Complex Ca^{2+} Oscillations: Regulatory Mechanisms and Theoretical Models.....	131
<i>G. Dupont, G. Houart and A. Goldbeter</i>	
8.1. Introduction	131
8.2. Regulatory Mechanisms for Ca^{2+} Oscillations and Related Theoretical Models	132
8.3. Complex Ca^{2+} Oscillations	141
8.4. Link Between Ca^{2+} Oscillations and Bistability	146
8.5. Concluding Remarks	148
References	149
9. Information Processing in Calcium Signal Transduction.....	153
<i>Ann Zahle Larsen and Ursula Kummer</i>	
9.1. Introduction	153
9.2. Dynamic Calcium Signal Encoding; Mechanisms and Models.....	154
9.3. Decoding of Signals	161
9.4. Discussion and Perspectives.....	174
References	175
10. Modeling Calcium Waves	179
<i>James Sneyd and Krasimira Tsaneva-Atanasova</i>	
10.1. Introduction	179
10.2. Generic Model Equations	180
10.3. Intracellular Calcium Waves	183
10.4. Intercellular Waves.....	190
Appendix	192
References	195
11. Mathematical Modelling and High Resolution Fluorescence Imaging for Studying Calcium Regulation.....	201
<i>Dietmar Uttenweiler</i>	
11.1. Introduction	201
11.2. Basic Principles of Ca^{2+} -Ion Regulation.....	202
11.3. High Resolution Fluorescence Imaging Techniques	204
11.4. Compartment Models	209
11.5. Mathematical Models for Complex Cellular Geometries	212
11.6. Spatially and Temporally Resolved Models for Ca^{2+} -Ion Regulation.....	215
11.7. Summary and Conclusions	227

References	228
12. Langevin Modeling of Intracellular Calcium Dynamics.....	231
<i>J.W Shuai and P. Jung</i>	
12.1. Introduction	231
12.2. Stochastic Models for Ca^{2+} Release from ER.....	232
12.3. Results	244
12.4. Conclusions	250
References	250
13. Building a Wave – Models of the Puff-to-Wave Transition.....	253
<i>Martin Falcke</i>	
13.1. Introduction	253
13.2. Cluster Models	259
13.3. Stochastic Wave Patterns	269
13.4. Ca^{2+} Dynamics Without Ca^{2+}	281
13.5. Concluding Remarks	285
References	287
Glossary.....	291
Index.....	297
