PART I BIOGRAPHIA

2 The banking reformer	
2.1 Introduction	9
2.2 The Newcastle background	9
2.2.1 Genealogy	9
2.2.2 Newcastle banks	11
2.2.3 Joplin's <i>Essay on Banking</i>	12
2.3 From banking to macroeconomics	13
2.4 The struggle for recognition	16
2.4.1 The outsider	16
2.4.2 The 1825 crisis	17
2.4.3 The continued campaign for reform	19
2.5 Country-wide joint-stock promotion	23
2.6 The major schemes	27
2.6.1 Undermining the Bank of England monopoly	27
2.6.2 The Provincial Bank of Ireland	28
2.6.3 The National Provincial Bank of England	30
2.7 The Break with the National Provincial	32
2.7.1 The campaign	32
2.7.2 The local shareholding issue	33
2.7.3 Managerial shortcomings	35
2.7.4 Expenses and payments	36
2.8 Conclusion	37
Notes	37
3 Defence and disappointment	
3.1 Introduction	39
3.2 The joint-stock defence campaign	39
3.3 Other business affairs	42
3.4 Monetary reform: the 1840s	44
3.5 A pioneer unrewarded	46

vi *Thomas Joplin and classical macroeconomics*

3.6	The mysterious adversary	48
3.7	Final attempts to obtain compensation	50
3.8	The last years	51
3.9	Conclusion	54
	Notes	55
4	Joplin and his fellow economists	
4.1	Introduction	56
4.2	Joplin and his predecessors	56
4.3	The Physiocrats and Smith	57
4.4	Undigested material	58
4.5	Joplin as a controversialist	60
4.6	Bullionist precursors	62
4.7	Joplin and the Birmingham School	64
4.8	The Banking School	67
4.9	Ricardo	69
	4.9.1 Influences	69
	4.9.2 Plagiarism – the charge	70
4.10	The Currency School and the Act of 1844	72
	4.10.1 The Currency School	72
	4.10.2 The 1844 Act	73
	4.10.3 Overstone and Norman	75
	4.10.4 Macroeconomic fundamentals	78
	4.10.5 The agricultural dimension	79
4.11	Conclusion	81
	Notes	82

PART II THE MACROECONOMIC MODEL

5	Income, expenditure and aggregate monetary demand	
5.1	Introduction	85
5.2	National output and expenditure	87
5.3	The basic macro model	89
	5.3.1 The circular flow	89
	5.3.2 The money supply	90
	5.3.3 The income multiplier	91
	5.3.4 The transmission mechanism	91
	5.3.5 Depression	92
	5.3.6 Aggregate supply	93
	5.3.7 Unemployment	94
5.4	Conclusion	95
	Notes	95

6	Problems of a paper currency	
6.1	Introduction	97
6.2	Problems of note issue	97
6.3	The rate of interest	99
6.4	'Abstract' and 'consumptive' circulation	100
6.5	Country banks and country bank notes	101
6.5.1	The demand for loanable funds	101
6.5.2	The fixed lending rate	104
6.5.3	Confused money market signals	104
6.5.4	Country banks and the balance of payments	105
6.5.5	Deposits	108
6.6	Conclusion	108
	Notes	109
7	Monetary disequilibrium	
7.1	Introduction	110
7.2	The London money market	110
7.2.1	Market clearing	110
7.2.2	The balance of payments	111
7.2.3	Gold through London	112
7.2.4	Country bank London reserves	113
7.2.5	The 'doubling' effect	113
7.2.6	Deposit creation	115
7.2.7	Liquidity panics	116
7.2.8	Last resort lending	116
7.3	Savings and investment	117
7.3.1	Hoarding	117
7.3.2	Excessive investment	118
7.3.3	Saving	118
7.3.4	Saving and aggregate demand	119
7.3.5	Saving and money supply changes	120
7.3.6	The demand for loanable funds	121
7.3.7	Velocity changes	122
7.3.8	Forced saving	123
7.4	The role of government expenditure in aggregate demand	124
7.4.1	Reductions in borrowing	124
7.4.2	Direct effects of government expenditure	125
7.4.3	Pump priming	125
7.4.4	Crowding out	126
7.4.5	Trade credit	126
7.4.6	Peacetime	127

7.5	Problems of monetary control – the Bank of England	127
7.5.1	Managerial shortcomings	127
7.5.2	The one-pound notes	128
7.5.3	Lack of national monetary control	129
7.5.4	The government's bank	130
7.5.5	Reaction to gold loss	130
7.5.6	The Bank as shock-absorber	131
7.5.7	Constraints on the Bank	133
7.5.8	The Palmer Rule	135
7.6	Conclusion	136
	Notes	137

PART III THE BANKING SYSTEM

8	The principle of metallic fluctuation	
8.1	Introduction	141
8.2	Joplin on convertibility	141
8.3	The 'metallic' principle	142
8.4	A national money supply	144
8.5	Joplin's 'metallic' plan – the <i>Outlines</i>	145
8.6	Evolution of the plan	146
8.7	Modifications to the plan	148
8.8	Proposed operation of the plan – the Currency School disowned	151
8.8.1	The metropolitan perspective	151
8.8.2	Separation of departments	151
8.8.3	Metallic reserves	152
8.8.4	Emergency suspension of convertibility	152
8.8.5	Banking reserves	153
8.8.6	The London money market and the Bank	154
8.8.7	Panics	154
8.8.8	Monetary dislocation	156
8.8.9	An assured gold base	157
8.9	Conclusion	157
9	The structure of banking	
9.1	Introduction	159
9.2	The problem of partnerships	159
9.3	Joint-stock organization	163
9.3.1	The strengths of joint-stock banks	163
9.3.2	The lessons of Scottish banking	164
9.3.3	Competitive opportunities	166

9.4	A joint-stock banking structure	167
9.4.1	A centralized branch system	167
9.4.2	The local shareholding issue	168
9.4.3	A strengthened banking system	171
9.4.4	Banking operations	172
9.4.5	Forgery	173
9.4.6	Limited liability	174
9.5	Conclusion	176
	Notes	176
10	Competition and regulation	
10.1	Introduction	177
10.2	No 'free banking'	177
10.3	Banking regulation proposals	179
10.4	The Bank of England	181
10.4.1	Privileges	181
10.4.2	Joplin's discovery	182
10.4.3	A useless and harmful monopoly	183
10.4.4	The Bank's anti-competitive behaviour	186
10.4.5	The Bank as exploiter of crisis	188
	(a) The Northern and Central	
	(b) The American houses	
10.5	Conclusion	191
PART IV TRADE AND AGRICULTURE		
11	Agricultural prices and the monetary system	
11.1	Introduction	195
11.2	The agricultural sector	195
11.2.1	Joplin's concern	195
11.2.2	A target price	196
11.2.3	The role of corn imports	197
11.2.4	Monetary effects	197
11.2.5	Price stability	198
11.2.6	Supply-demand interdependence	200
11.3	The Corn Laws	202
11.4	Monetary forces and the price of corn	204
11.5	Monetary reform priority	207
11.6	Conclusion	209
12	Reciprocal demand	
12.1	Introduction	211

12.2	Barter equilibrium	211
12.3	Relative international prices and reciprocal demand	214
12.4	Protection and the terms of trade	215
12.5	Conclusion	218

PART V MODELS AND DATA

13	Methodology and the use of data	
13.1	Introduction	223
13.2	Joplin's methodology	223
13.3	Joplin's use of data	227
13.3.1	The stability of corn prices	227
13.3.2	Corn prices and monetary variation	228
13.3.3	Money supply and the rate of interest	230
13.3.4	Monetary base control	230
13.3.5	Gold flows and the Bank of England note issue	231
13.3.6	Country bank note issues and the rate of interest	232
13.3.7	The steadiness of the Scots note issue	232
13.4	Testing Joplin's hypotheses	233
13.4.1	Price levels and monetary statistics 1810–26	233
13.4.2	Monetary base control	235
13.4.3	Corn prices and imports 1813–26 and 1833–44	237
13.4.4	From Bank charter renewal to Bank Act	237
13.5	Conclusion	241
	Appendix A: Tables	242
	Appendix B: A note on data sources	254
	Notes	255
14	A formal Joplin model	
14.1	Introduction	256
14.2	Variable list	256
14.3	The goods market	257
14.4	The money market	260
14.4.1	Goods market transactions	260
14.4.2	Financial market transactions	263
14.5	The balance of payments	264
14.6	Aggregate supply and the labour market	265
14.7	Aggregate demand	268
14.8	Conclusion	269
	Notes	270

PART VI CONCLUSION

15 Joplin's achievement	273
