

SCIENCE

*The Growth of
Large-Scale Research*

STANFORD UNIVERSITY PRESS
STANFORD, CALIFORNIA 1992

Contents

Contributors	ix
Introduction: The Many Faces of Big Science <i>Peter Galison</i>	I
PART I: The Big Physics of Small Particles	
<hr/>	
1 The Origins of the Lawrence Berkeley Laboratory <i>Robert Seidel</i>	21
2 Controlling the Monster: Stanford and the Growth of Physics Research, 1935–1962 <i>Peter Galison, Bruce Hevly, and Rebecca Lowen</i>	46
3 Some Thoughts on the Early History of CERN <i>Dominique Pestre and John Krige</i>	78
4 Big Science and Colonialist Discourse: Building High- Energy Physics in Japan <i>Sharon Traweek</i>	100
5 SLAC and Big Science: Stanford University <i>W. K. H. Panofsky</i>	129
PART II: Sponsored Research and External Interests	
<hr/>	
6 Big Science in Context: Cornell and MIT <i>S. S. Schweber</i>	149

7	The Biggest Kind of Big Science: Astronomers and the Space Telescope <i>Robert W. Smith</i>	184
8	Background to History: The Transition from Little Physics to Big Physics in the Gravity Probe B Relativity Gyroscope Program <i>C. W. F. Everitt</i>	212
9	Du Pont and the Management of Large-Scale Research and Development <i>David A. Hounshell</i>	236
PART III: Big Science and National Security		
10	Mission Change in the Large Laboratory: The Los Alamos Implosion Program, 1943-1945 <i>Lillian Hoddeson</i>	265
11	From Military Research to Big Science: Lloyd Berkner and Science-Statesmanship in the Postwar Era <i>Allan A. Needell</i>	290
12	K_1S_2 : Korea, Science, and the State <i>Daniel J. Kevles</i>	312
13	Far Beyond Big Science: Science Regions and the Organization of Research and Development <i>Robert Kargon, Stuart W. Leslie, and Erica Schoenberger</i>	334
	AFTERWORD: Reflections on Big Science and Big History <i>Bruce Hevly</i>	355
	Select Bibliography on Big Science	367
	Index	375
