

# **MOLECULAR MECHANISMS IN CELLULAR GROWTH AND DIFFERENTIATION**

Edited by

**Anthony R. Bellvé**

**Henry J. Vogel**

College of Physicians and Surgeons  
Columbia University  
New York, New York

**ACADEMIC PRESS, INC.**

**Harcourt Brace Jovanovich, Publishers**

San Diego New York Boston  
London Sydney Tokyo Toronto

# Contents

Preface

xv

## **PART I POLYPEPTIDE GROWTH FACTORS AND OTHER SIGNALS: CELL MEMBRANE RECEPTORS, TRANSDUCTION MECHANISMS, AND PROLIFERATIVE RESPONSE**

### **1 A Dual Binding Site Hypothesis of the Type I Insulin-Like Growth Factor Receptor**

JUDSON J. VAN WYK AND SAMUEL J. CASELLA

Introduction	3
Which Receptor Mediates the Actions of IGF-II?	4
References	8

### **2 Insulin Action on Membrane Protein Recycling**

MICHAEL P. CZECH, SILVIA CORVERA, MARK A.  
TEPPER, CAROL M. BROCKLEBANK, AND  
RICHARD G. MACDONALD

Introduction	9
Membrane Protein Recycling	9
Conclusions	17
References	18

### 3 Growth-Factor and Oncogene-Mediated S6 Phosphorylation during the Mitogenic Response: A Novel S6 Kinase

PAUL JENÖ, L. M. BALLOU, AND GEORGE THOMAS

Stimulation of S6 Phosphorylation	19
Activation of S6 Kinase	20
Phosphatases	21
Characteristics of the S6 Kinase	21
Pathways Involved in S6 Phosphorylation	22
References	23

### 4 Phosphorylation of pp60<sup>c-src</sup>

TONY HUNTER, CHRISTINE A. CARTWRIGHT, JAMES R. WOODGETT, AND KATHLEEN L. GOULD

Introduction	25
Serine 12	27
Serine 17	29
Other Amino-Terminal Phosphorylations	30
Tyrosine 416	31
Tyrosine 527	32
Platelet-Derived Growth Factor Treatment	34
Neuronal pp60 <sup>c-src</sup>	35
pp60 <sup>c-src</sup> and Polyomavirus Middle T Antigen	37
Vanadate Treatment	39
Elevation of pp60 <sup>c-src</sup> Protein Kinase Activity in Transformed Cells	39
Summary	40
References	41

### 5 G Proteins May Exist as Polymeric Proteins: A Basis for the Disaggregation Theory of Hormone Action

MARTIN RODBELL

Introduction	45
Depolymerization Theory	47
Current Thoughts on G Proteins	47
Some Structural Aspects of G Proteins	49
Pertussis Toxin Actions	51
Effects of Detergents on G Proteins	52

Signal Transduction and Cytoskeletal Elements	55
Summary and Speculations	55
References	57
<b>6 Pleiotropic Functions of the Insulin Receptor</b>	
ALAN R. SALTIEL	
Introduction	59
Purification and Biological Characterization of the Insulin-Sensitive Enzyme Modulators	61
The Enzyme Modulators Are Inositol Phosphate Glycans	62
The Inositol Phosphate Glycan Enzyme Modulators Are Produced by an Insulin-Sensitive Phosphatidylinositol Glycan-Specific Phospholipase C Activity	65
Turnover of Glycosylphosphatidylinositol in Insulin Action	66
References	67
<b>7 Cooperative Regulation of Gene Expression in Liver Cells by Hormones and Extracellular Matrix</b>	
LOLA M. REID, ISABEL ZVIBVEL, TOHRU WATANABE, YASU FUJITA, MARIA AGELLI, KATE MONTGOMERY, ANDREA KRAFT, AND ANDREAS OCHS	
Introduction	69
Cell Culture	71
Gene Expression in Normal Liver	80
Gene Expression Studies in Hepatoma Cells	90
Hypotheses on the Mechanisms of Matrix and Hormonal Regulation of Gene Expression: Delivery of Protein Hormones to the Nucleus by Proteoglycan/Glycosaminoglycan Carriers	94
Summary	95
References	98
<b>8 Receptor-Ligand Interactions: Role in Cancer Invasion and Metastasis</b>	
MARK E. SOBEL AND LANCE A. LIOTTA	
Introduction	107
Basement Membrane and the Three-Step Hypothesis of Invasion	108
Components of Basement Membrane	108
Laminin Receptor	109

Role of Laminin and Laminin Receptor in Tumor Cell Metastasis	109
Monoclonal Antibodies to Human Laminin Receptor	110
Isolation of Human Laminin Receptor cDNA	110
Overlapping Domain of Laminin Receptor cDNA Inserts Nucleotide and Deduced Amino Acid Sequence of the 2H5 Epitope of Human Laminin Receptor	111
Synthetic Peptides and the Putative Ligand Binding Domain of Laminin Receptor	113
Expression of Laminin Receptor mRNA	116
Conclusions	118
References	119

## 9 Control of Cell Proliferation by Transforming Growth Factors

H. L. MOSES, J. BARNARD, C. C. BASCOM,  
R. D. BEAUCHAMP, R. J. COFFEY,  
R. M. LYONS, AND N. J. SIPES

Introduction	121
Transforming Growth Factor- $\alpha$	121
Transforming Growth Factor- $\beta$	123
Autocrine Regulation of Epithelial Cells by Transforming Growth Factors- $\alpha$ and - $\beta$	125
References	126

## PART II POLYPEPTIDE GROWTH FACTORS AND THEIR CELL MEMBRANE RECEPTORS: RELATION TO ONCOGENES

### 10 The EGF Receptor Protooncogene: Structure, Evolution of Properties of Receptor Mutants

JOSEPH SCHLESSINGER

Introduction	131
Structure of the EGF Receptor	132
Properties of EGF Receptor Mutants	133
References	134

<b>11</b>	<b>Biological Effects of the <i>v-erbA</i> Oncogene in Transformation of Avian Erythroid Cells</b>	
	BJÖRN VENNSTRÖM, HARTMUT BEUG, KLAUS DAMM, DOUGLAS ENGEL, ULLRICH GEHRING, THOMAS GRAF, ALBERTO MUÑOZ, JAN SAP, AND MARTIN ZENKE	
	Biological Effects of the <i>v-erbA</i> and <i>v-erbB</i> Oncogenes	138
	Comparison of the <i>v-erbA</i> and <i>c-erbA</i>	138
	Effects of Mutant <i>v-erbA</i> Genes on Erythroblasts	140
	How Does <i>v-erbA</i> Contribute to Transformation of Erythroblasts?	141
	Conclusions	145
	References	147
<b>12</b>	<b><i>ras</i> Transformation of 3T3 Cells Induces Basic Fibroblast Growth Factor Synthesis <i>in Vitro</i> and <i>in Vivo</i></b>	
	MICHAEL KLAGSBRUN, PAUL FANNING, AND SNEZNA ROGELJ	
	Introduction	149
	Results	150
	Discussion	151
	References	154
<b>13</b>	<b>Cellular Oncogenes Conferring Growth Factor Independence on NIH 3T3 Cells</b>	
	MITCHELL GOLDFARB	
	Introduction	157
	Results	158
	Discussion	171
	References	172
<b>14</b>	<b>Potential Function of the <i>mos</i> Protooncogene in Germ Cell Differentiation and Early Development</b>	
	GEOFFREY M. COOPER	
	Introduction	175
	Expression of <i>mos</i> in Male Germ Cells	177

Expression of <i>mos</i> in Oocytes	178
Posttranscriptional Processing of <i>mos</i> in Eggs	179
References	181

### **PART III POLYPEPTIDE GROWTH FACTORS AND THEIR CELL MEMBRANE RECEPTORS: ROLE IN DIFFERENTIATION AND DEVELOPMENT**

#### **15 Pleiotypic Actions of the Seminiferous Growth Factor**

ANTHONY R. BELLVÉ AND WENXIN ZHENG

Introduction	187
Expression of Mitogenic Activity	188
Biochemical Characterization	189
Two Testicular Cell Lines: TM <sub>3</sub> Leydig and TM <sub>4</sub> Sertoli Cells	191
Proliferation of TM <sub>3</sub> Leydig and TM <sub>4</sub> Sertoli Cells	192
Extracellular Accumulation of Sulfated Glycoprotein	194
Synthesis of Specific Peptides	196
Immunological Properties of Heparin-Binding Growth Factors	200
Discussion	201
References	203

#### **16 Regulation of Blood Vessel Growth and Differentiation**

WERNER RISAU, HANNES DREXLER, HANS-  
GÜNTER ZERWES, HARALD SCHNÜRCH,  
URSULA ALBRECHT, AND RUPERT HALLMANN

Introduction	207
Growth and Development	207
Embryonic Stem Cells as an Experimental Model System for Early Vascular Development	211
Endothelial Cell Differentiation	217
Concluding Remarks	221
References	221

## 17 Vascular Endothelium: Role in Albumin Transport

G. E. PALADE AND A. J. MILICI

Multiplicity of Endothelial Functions	223
General Organization	224
Continuous Microvascular Endothelium	225
Physiological Data	226
Attempts at Structural-Functional Integration	227
Perspectives	245
References	246

## 18 A Growth Factor Homologous Gene Controlling Pattern Formation in *Drosophila*

WILLIAM M. GELBART

Introduction	249
Overview of the Organization of the <i>decapentaplegic</i> Gene	249
Contribution of the <i>Hin</i> Region to <i>dpp</i> Function	250
Nature of the <i>dpp</i> Polypeptide	254
References	257

## PART IV SEQUENCE-SPECIFIC DNA-BINDING PROTEINS: ROLE IN DIFFERENTIATION AND DEVELOPMENT

### 19 The Role of Master Regulatory Genes in Controlling Development

E. B. LEWIS

Text	261
References	265

### 20 *engrailed*, A Gene for All Segments

THOMAS KORNBERG, CHIHIRO HAMA,  
NICHOLAS J. GAY, AND STEPHEN J. POOLE

Introduction	267
The <i>engrailed</i> Gene Promoter	268
The <i>engrailed</i> Protein Is a Phosphoprotein	269
References	278

**21 Sequence-Specific DNA-Binding Activities of *Even-Skipped* and Other Homeo Box Proteins in *Drosophila***

TIMOTHY HOEY, MANFRED FRASCH, AND  
MICHAEL LEVINE

Introduction	279
Results	281
Discussion	296
Materials and Methods	301
References	303

**22 Identification and Characterization of Two Mouse Genes, *EN-1* and *EN-2*, with Sequence Homology to the *engrailed* and *invected* Genes of *Drosophila***

GAIL R. MARTIN AND ALEXANDRA L. JOYNER

Introduction	305
Results	308
Discussion	315
References	317

**23 Structure and Developmental Expression of Murine Homeo Box Genes**

PETER GRUSS, CAROLA DONY, BERND  
FÖHRING, AND MICHAEL KESSEL

Introduction	319
Results and Discussion	320
References	325

**PART V SMALL MOLECULES IN DIFFERENTIATION AND DEVELOPMENT**

**24 Molecular Dissection of Pattern Formation in Vertebrate Limbs: Concepts and Experimental Approaches**

GREGOR EICHELE AND CHRISTINA THALLER

Background	329
Retinoic Acid Mimics ZPA Tissue and Induces Pattern Duplications in a Highly Specific Way	331

Retinoic Acid Can Induce Digit Formation in the Absence of ZPA Tissue	334
Limb Buds Contain Endogenous Retinoic Acid	336
Future Problems	339
References	340
<b>25 Differentiation of a Multipotent Human Intestinal Cell Line: Expression of Villin, a Structural Component of Brush Borders</b>	
D. LOUVARD, M. ARPIN, E. COUDRIER, B. DUDOUE, J. FINIDORI, A. GARCIA, O. GODERFROY, C. HUET, E. PRINCAULT, S. ROBINE, AND C. SAHUQUILLO MERINO	
The Intestinal Epithelium: A Model System for Study of Cell Differentiation and the Development of a Polarized Cytoskeleton	341
A Pluripotent Human Intestinal Cell Line That Can Be Induced to Differentiate in Culture	343
Organization of Intestinal Brush Border Cytoskeleton	344
Villin, a Calcium-Regulated Actin-Binding Protein	347
Villin Is an Organ-Specific Marker in Adults and Embryos	348
Villin Expression during Intestinal Differentiation	350
Summary and Conclusions	351
References	351
